

Fuller knowledge of the Communist-ruled East German state — the German Democratic Republic (GDR) — has long been needed by anyone in the Western World who seeks a broader understanding of the trends of world politics in the 1970s.

A study of the experiences of the GDR, of its patterns of construction and growth, regulations and change, can teach us many things. It can tell us something about what a Communist regime can or cannot do in a society; the potentialities and limits of Communist patterns of organization and ideology; the relations between the new regime and existing local and national traditions, social structures, and cultural patterns; its handling of problems of economic growth and technological innovation, of science and mass education, of the selection of leaders and elites, of the needs for mass support, and the socialization of the young. But it can also tell us what a society and technology can do for a party and for its ideology. The GDR did not rise spontaneously out of local political processes or out of any German revolution. Its basis was created by the Soviet Army at the end of World War II. But today, a quarter of a century later, the GDR is more than a mere puppet. It has produced changes, and it has been changed itself. It shows how even a Communist regime in East Germany, there has also been an East German impact on Communist practices and institutions. The national history is likely to continue.

Another opportunity for better understanding comes from comparison. How are some of the problems of modern industrial societies dealt with in the GDR, in comparison to their treatment in the German Federal Republic, in the U.S.S.R., and in the United States? Everywhere, advanced industrialization creates problems of mass mobilization and elite selection, of claims for more leisure, higher living standards and more varied life styles,
