German National Identity After The Holocaust:

German National Identity After the Holocaust Mary Fulbrook, 2002 *German National Identity in the Twenty-First Century* R. Wittlinger, 2010-10-01 Wittlinger takes a fresh look at German national identity in the 21st century and shows that it has undergone considerable changes since unification in 1990 Due to the external pressures of the post cold war world and recent domestic developments Germany has re emerged as a nation which is less hesitant to assert its national interest

German Media and National Identity Sanna Inthorn, 2007 Fascination with what makes the Germans tick has produced a vast range of texts that explore German postwar politics culture and society Yet within this considerable body of work there is a paucity of academic analysis that acknowledges the role of media discourse in the representation and construction of German identity This book makes an important contribution to the study of German national identity by offering a detailed and large scale academic analysis of how German media discourse between 1998 and 2005 represents German national identity It brings together a variety of case studies European integration citizenship and immigration sports and consumption It makes the case for the role of popular culture in the discursive formation of national identity and demonstrates that the nation is constructed against political and non political subjects By looking at a variety of topic contexts this book identifies a master narrative of the German nation It tells the story of a nation that has its roots firmly in the memory of National Socialism and constructs ethnocentric nationalism as taboo Yet at the same time it cannot escape the past as it harbors racist images of self and other This is an important book for collections in European studies and media studies as well as scholars engaged in studying the impact of media on culture This book demonstrates that reports of the death of the nation state are without any doubt exaggerated The particular complex of discourses analysed here was and is only present in Germany It could not be found in Germany's German speaking neighbours such as Austria or Switzerland or indeed anywhere else While the influence of globalisation is undeniable the nation state and its media remain a key location for the negotiation of national identity and much more This wide ranging and engagingly written book offers us an exceptional insight into that process Professor Hugh O'Donnell Glasgow Caledonian University Music and German National Identity Celia Applegate, Pamela Potter, 2002-08 Concert halls all over the world feature mostly the works of German and Austrian composers as their standard repertoire composers like the three Bs of classical music Bach Beethoven and Brahms all of whom are German Over the past three centuries many supporters of German music have even nurtured the notion that the German speaking world possesses a peculiar strength in the cultivation of music This book brings together seventeen contributors from the fields of musicology ethnomusicology history and German literature to explore these questions how music came to be associated with German identity when and how Germans came to be regarded as the people of music and how music came to be designated the most German of arts Unlike previous volumes on this topic many of which focused primarily on Wagner and Nazism the essays here are wide ranging and comprehensive examining philosophy

literature politics and social currents as well as the creation and performance of folk music art music church music jazz rock and pop The result is a striking volume adeptly addressing the complexity and variety of ways in which music insinuated itself into the German national imagination and how it has continued to play a central role in the shaping of a German identity Contributors to this volume Celia Applegate Doris L Bergen Philip Bohlman Joy Haslam Calico Bruce Campbell John Daverio Thomas S Grey Jost Hermand Michael H Kater Gesa Kordes Edward Larkey Bruno Nettle Uta G Poiger Pamela Potter Albrecht Riethmüller Bernd Sponheuer Hans Rudolf Vaget

Ambiguous Memory Siobhan Kattago, 2001-07-30 *Ambiguous Memory* examines the role of memory in the building of a new national identity in reunified Germany The author maintains that the contentious debates surrounding contemporary monuments to the Nazi past testify to the ambiguity of German memory and the continued link of Nazism with contemporary German national identity The book discusses how certain monuments and the ways Germans have viewed them contribute to the different ways Germans have dealt with the past and how they continue to deal with it as one country Kattago concludes that West Germans have internalized their Nazi past as a normative orientation for the democratic culture of West Germany while East Germans have universalized Nazism and the Holocaust transforming it into an abstraction in which the Jewish question is downplayed In order to form a new collective memory the author argues that unified Germany must contend with these conflicting views of the past incorporating certain aspects of both views Providing a topography of East West and unified German memory during the 1980s and the 1990s this work contributes to a better understanding of contemporary national identity and society The author shows how public debate over such issues as Ronald Reagan's visit to Bitburg the renarration of Buchenwald as Nazi and Soviet internment camp the Goldhagen controversy and the Holocaust Memorial debate in Berlin contribute to the complexities surrounding the way Germans see themselves their relationship to the past and their future identity as a nation In a careful analysis the author shows how the past was used and abused by both the East and the West in the 1980s and how these approaches merged in the 1990s This interesting new work takes a sociological approach to the role of memory in forging a new integrative national identity

[Nation and Identity in the New German Cinema](#) Inga Scharf, 2008-06-30 In this original study Scharf investigates issues of national identity in films of the New German Cinema Using a cultural studies analysis Scharf argues that the conflict between this generation of critical filmmakers and their Germanness translates into feature films that construct and are pervaded by a sense of homelessness at home As the first cultural studies investigation of this cinematic movement the book challenges existing film studies accounts by analyzing the New German Cinema within its social temporal and spatial contexts Furthermore with its broad concerns for the West German production context the New German Cinema's reception both nationally and internationally as well as issues of representation narration and Othering *Nation and Identity in the New German Cinema* offers an interdisciplinary contribution to the ongoing debate on national cinema

Migration and the Construction of German Identities, 1949-2004 Bethany Erin Hicks, 2023-10-24 Migration in its many forms has often

been found at the center of public and private discourse surrounding German nationalism and identity significantly influencing how both states construct conceptions of what it means to be German at any given place and time The attempt at constructing an ethnically homogeneous Third Reich was shattered by the movement of refugees expellees and soldiers in the aftermath of the Second World War and the contracting of foreign nationals as Gastarbeiter in the Federal Republic and Vertragsarbeiter in the German Democratic Republic in the 1960s and 70s diversified the ethnic landscape of both Cold War German states during the latter half of the Cold War Bethany Hicks shows how the regional migration of East Germans into the western federal states both during and after German unification challenged essential Cold War assumptions concerning the ability to integrate two very different German populations German Historians and the Bombing of German Cities Bas Benda-Beckmann, 2025-10-01 Today strategic aerial bombardments of urban areas that harm civilians at times intentionally are becoming increasingly common in global conflicts This book reveals the history of these tactics as employed by nations that initiated aerial bombardments of civilians after World War I and during World War II As one of the major symbols of German suffering the Allied bombing left a strong imprint on German society Bas von Benda Beckmann explores how German historical accounts reflected debates on postwar identity and looks at whether the history of the air war forms a counternarrative against the idea of German collective guilt Provocative and unflinching this study offers a valuable contribution to German historiography **The Shaping of German Identity** Len Scales, 2012-04-26 German identity began to take shape in the late Middle Ages during a period of political weakness and fragmentation for the Holy Roman Empire the monarchy under which most Germans lived Between the thirteenth and fifteenth centuries the idea that there existed a single German people with its own lands language and character became increasingly widespread as was expressed in written works of the period This book the first on its subject in any language poses a challenge to some dominant assumptions of current historical scholarship that early European nation making inevitably took place within the developing structures of the institutional state and that in the absence of such structural growth the idea of a German nation was uniquely radically and fatally retarded In recounting the formation of German identity in the late Middle Ages this book offers an important new perspective both on German history and on European nation making *Helmut Kohl's Quest for Normality* Christian Wicke, 2015-02-01 During his political career Helmut Kohl used his own life story to promote a normalization of German nationalism and to overcome the stigma of the Nazi period In the context of the cold war and the memory of the fascist past he was able to exploit the combination of his religious generational regional and educational he has a PhD in History experiences by connecting nationalist ideas to particular biographical narratives Kohl presented himself as the embodiment of normality a de radicalized German nationalism which was intended to eclipse any anti Western and post national peculiarities This book takes a biographical approach to the study of nationalism by examining its manifestation in Helmut Kohl and the way he historicized Germany's past A German Catastrophe? Bas Von Benda-Beckmann, 2010 Akademisch

proefschrift ter verkrijging de graad van doctor aan de Universiteit van Amsterdam op gezag van de Rector Magnificus prof dr D C van den Boom ten overstaan van een door het college voor promoties ingestelde commissie in het openbaar te verdedigen in de Agnietenkapel op woensdag 20 oktober 2010 te 12 00 uur **The Impact of Nazism** Alan E.

Steinweis, Daniel E. Rogers, 2003-01-01 The essays address the nature of Nazism as reflected in contemporary perceptions of Nazi Germany in the United States the origins and character of fascism the many forms of antisemitism German scholars efforts to promote persecution in the Third Reich the role of ethnic Germans in the anti Jewish and anti Slavic policies of the Reich the actions of German police in the occupation of eastern Europe and in the Holocaust Hitler s style of leadership the nazification of the German military high command and the politics surrounding the memory of Nazism and the Holocaust after 1945 BOOK JACKET Negotiating Positions Simon Ward, 2001 This study offers new perspectives on Wolfgang Koeppen a writer too often consigned to the margins of post 1945 literary history Examining the interaction of the personal and the social in Koeppen s writings this book demonstrates that the politics of his works are inherent to their form Through a series of close readings the book explores the positive and negative aspects of liminality a dominant trope in Koeppen s works Stressing the thematic and formal continuities of his oeuvre the first section illustrates how his protagonists perpetually establish a space for themselves in between states The second section examines how Koeppen negotiates with the discourse of nation during two central periods of his career It shows how his experiences in the Third Reich and his reappraisal of the years prior to 1933 determine his perspective on modernity modernism and Germany after 1945 Having defined the location of culture in his works the book concludes by resituating Koeppen s writings within post war West German literary culture *Partisan Histories* P. Kenney, M. Friedman, 2016-09-23 *Partisan Histories* is an introduction to the multiple uses of history in contemporary political debate and conflict As communities reimagine themselves a contest over defining legitimacy identifying us and others and jockeying for political control intersects with fights over history and memory Here distinguished scholars examine how competing versions of national identity are legitimized through appeals to carefully constructed pasts both in democracies and in repressive regimes The essays focus on the cases of Armenia Chile France Germany India and Pakistan Israel and Palestine Japan Nigeria and the United States to draw broader conclusions about the worldwide effect of traumatic memory questions of punishment and restitution and the instrumentalization of the past for political purposes **Identity** Gerald Izenberg, 2019-03-08 *Identity The Necessity of a Modern Idea* is the first comprehensive history of identity as the answer to the question who or what am I It covers the century from the end of World War I when identity in this sense first became an issue for writers and philosophers to 2010 when European political leaders declared multiculturalism a failure just as Canada which pioneered it was hailing its success Along the way the book examines Erik Erikson s concepts of psychological identity and identity crisis which made the word famous the turn to collective identity and the rise of identity politics in Europe and America varieties and theories of group identity debates over

accommodating collective identities within liberal democracy the relationship between individual and group identity the postmodern critique of identity as a concept and the ways it nonetheless transformed the social sciences and altered our ideas of ethics At the same time the book is an argument for the validity and indispensability of identity properly understood Identity was not a concept before the twentieth century because it was taken for granted The slaughter of World War I undermined the honored identities of prewar Europe and as a result the idea of identity as something objective and stable was thrown into question at the same time that people began to sense that it was psychologically and socially necessary We can't be at home in our bodies act effectively in the world or interact comfortably with others without a stable sense of who we are Gerald Izenberg argues that while it is a mistake to believe that our identities are givens that we passively discover about ourselves decreed by God destiny or nature our most important identities have an objective foundation in our existential situation as bodies social beings and creatures who aspire to meaning and transcendence as well as in the legitimacy of our historical particularity

The PDS - A symbol of eastern German identity? Adrian Webb, 2009-03-26 Die Linke the Left is now Germany's third largest political party and the fourth largest political grouping in the Bundestag Germany's parliament Die Linke however is the result of a fusion in June 2007 between the left wing of the German social democratic party SPD and the Partei des demokratischen Sozialismus PDS the successor to East Germany's former effectively Communist ruling party the SED In practice the PDS contributed 60 000 of the new party's 72 000 members making Die Linke an essentially eastern German party Moreover the PDS had been unique in enjoying a level of electoral success denied to other Communist successor parties which had not turned themselves into mainstream social democratic parties within the new liberal democratic order This book employing the period 2001-03 for its detailed analysis suggests that this uniqueness is best understood as either an expression of eastern German national sentiment or as deriving from a reinterpretation of Marxism attuned to the interests of a democratic twenty first century society and the book explores these alternative understandings in turn Noting both the historic distinctiveness of German capitalism and the contradictions within German communism it concludes that the PDS now fused in Die Linke remains nourished by the particularism of eastern Germany
