*At Any Price* Craig Deayton, 2017-05-05 The enemy must not get the Messines Ridge at any price So read the orders to German troops defending the vital high ground south of Ypres On 7 June 1917 the British Second Army launched its attack with an opening like no other In the largest secret operation of the First World War British and Commonwealth mining companies placed over a million pounds of explosive beneath the German front line positions in 19 giant mines which erupted like a volcano This was just the beginning By the end of that brilliant summer's day one of the strongest positions on the Western Front had fallen in the greatest British victory in three long years of war For the ANZACs who comprised one third of the triumphant Second Army it was their most significant achievement to that point for the men of the New Zealand Division it would be their finest hour It is difficult to overstate the importance of Messines for the Australians whose first two years of war had represented an almost unending catalogue of disaster This was both the first real victory for the AIF and the first test in senior command for Major General John Monash who commanded the newly formed 3rd Division Messines was a baptism of fire for the 3rd Division which came into the line alongside the battle scarred 4th Australian Division badly mauled at Bullecourt just six weeks earlier The fighting at Messines would descend into unimaginable savagery a lethal and sometimes hand to hand affair of bayonets clubs bombs and incessant machine gun fire described by one Australian as 72 hours of Hell After their string of bloody defeats over 1915 and 1916 Messines would prove the ultimate test for the Australians

*Peenemunde: The German Experimental Rocket Center-Introduction* David Myhra PhD, 2013-09-28 This is the story and details of Peenemunde the German military rocket development and test site during World War II It was one of the most modern technological facilities in the world in the years between 1936 and 1945 The first launch of a missile into space took place here in October 1942 In the nearby air force testing area rocket engineers tested numerous flight objects equipped with revolutionary technology

From the start this research was directed toward one goal only achieving military superiority through advanced technology Slave laborers concentration camp inmates and prisoners of war provided the work that enabled the construction of the test sites and the later serial production of the rockets which the Nazi propaganda referred to as Vergeltungswaffe 2 or Vengeance Weapon 2 in so short a period of time Both the inhumane labor conditions and the attacks on Belgian British and French cities using the supposed wonder weapon claimed thousands of lives      **On Artillery** Bruce I.

Gudmundsson,1993-09-30 Gudmundsson tells the story of field artillery in the 20th century and its impact on the major conflicts of our time Its purpose is to provide the reader whether artilleryman or not with hitherto unavailable insights on the role that artillery plays in the larger battle and how that has helped shape the world that we live in today Unique aspects of the book include the treatment of technical issues in non technical language the extensive use of German and French sources generally unavailable to the English speaking reader the shattering of some long cherished myths and the discussion of issues that are often papered over in the literature of field artillery losses from friendly fire the frequent impotence of counter battery fire and the French origins of current American doctrine The bulk of the literature on field artillery can be fairly described as gunner propaganda Gudmundsson with his emphasis on the way artillery interacts with other arms and the dynamics of the battle as a whole takes a more balanced and a more critical view dealing with the failures as well as the achievements of field artillery This study provides a thorough overview of field artillery in non technical language that will be of interest to military professionals military historians and wargamers      **The "German Spirit" in the Ottoman and**

**Turkish Army, 1908-1938** Gerhard Grüßhaber,2018-04-09 The study focuses on the mutual transfer of military knowledge between the German and the Ottoman Turkish army between the 1908 Young Turk revolution and the death of Atatürk in 1938 Whereas the Ottoman and later the Turkish army were the main beneficiaries of this selective appropriation the German armed forces evaluated their prospective ally's military experiences to a lesser extent Through the analysis of archival and published sources and memoir literature the study provides evidence for the impact of this exchange on the armies of both countries and on the Turkish civil society Indeed the officer corps in both countries was a small but influential group of the society for the further development of their nations      *The Illustrated Encyclopedia of Warfare* DK,2012-04-16 Previously published in hardcover as War The Definitive Visual History War has been central to the rise and fall of civilizations since the dawn of time The history of warfare first emerges from legend in Mesopotamia the cradle of civilization around 3 000 years before the birth of Christ The first armies that we know about fought in Sumeria Ancient Egypt and Syria From these first battles fought with spears or axes on horseback or on foot The Illustrated Encyclopedia of Warfare traces the campaigns and conflicts that have shaped world history and examines the evolution of military tactics and technology The story of the development from these primitive battles to the global conflicts of the 20th century and the modern War on Terror is the story of humanity itself reflecting the same political cultural and technological forces that have defined human

history From longbows to laser guided missiles from chariots to jet aircraft and from Samurai warriors to SAS soldiers The Illustrated Encyclopedia of Warfare provides the definitive visual chronicle of this intense brutal and often heroic tale War combines a coherent and compelling spread by spread historical narrative with a wealth of supporting features on weapons and technology strategy and tactics the experience of war and history s fighting elites to recount the epic 5 000 year story of warfare and combat through the ages **Congressional Record** United States. Hunzeker,2021-07-15 In Dying to Learn Michael Hunzeker develops a novel theory to explain how wartime militaries learn He focuses on the Western Front which witnessed three great power armies struggle to cope with deadlock throughout the First World War as the British French and German armies all pursued the same solutions assault tactics combined arms and elastic defense in depth By the end of the war only the German army managed to develop and implement a set of revolutionary offensive defensive and combined arms doctrines that in hindsight represented the best way to fight Hunzeker identifies three organizational variables that determine how fighting militaries generate new ideas distinguish good ones from bad ones and implement the best of them across the entire organization These factors are the degree to which leadership delegates authority on the battlefield how effectively the organization retains control over soldier and officer training and whether or not the military possesses an independent doctrinal assessment mechanism Through careful study of the British French and German experiences in the First World War Dying to Learn provides a model that shows how a resolute focus on analysis command and training can help prepare modern militaries for adapting amidst high intensity warfare in an age of revolutionary technological change *The Coast Artillery Journal* ,1929 *DEUTSCHE PANZER EN* ,
