*German Industry and German Industrialisation* Robert Lee, 2017-07-14 Originally published in 1991 this book brings together 9 essays which address a number of central issues relating to the nature of German industrialisation including the role of foreign competition in fostering technological change the importance of market integration for economic development and the response of German banks to industrialisation The book also provides an important corrective to the traditional interpretation of German industrialisation and reassesses the economic impact of the customs union Zollverein The reappraisal of some dominant themes in German economic and business history is distinctive in its explicit use of economic theory in historical analysis of long term growth processes It also emphasises the importance of sectoral analysis and illustrates the usefulness of a differential regional approach for understanding the process of German industrialisation

**The Making of the German Post-War Economy** Christian L. Glossner, 2010-02-28 The years following the end of World War II in Germany were a significant period of change and upheaval This book on the economic reconstruction of post war West Germany traces the development of economic and socio political ideas and their gradual absorption by mainstream politicians officials and the general public during the period of transition between 1945 and 1949 In the aftermath of World War II several German think tanks political parties and individuals gave impulse to and then shaped the development of a viable socio political and economic model between the extremes of laissez faire capitalism and the collectivist planned economy In their endeavours to bring into effect their particular economic ideas often diametrically opposed to one another the parties of left and right stimulated not only academic and political debate but also public debate about the political and economic reconstruction of occupied post war Germany While all the various neo liberal approaches assigned to the people sovereign and decisive status in the institutional economic order and recognised the interdependence of politics economics and the public one particular school of economic thought outpaced the others in communicating a model of coordinated economic and social policy namely the Social Market Economy Christian Glossner here investigates whether or not it was primarily the subtlety of the political campaign for this model that led to its implementation by the then Economic Council and eventual validation by the German electorate The programmes published by the principal academic and political groups of the time and the practical day to day decisions of the first parliament in post war Germany are analysed with reference to popular preferences By examining both the formative involvement of German parties in post war reconstruction and the role of the public during the process of economic liberalisation this book provides explanations for why the Social Market Economy prevailed as the socio political and economic model for the Federal Republic of Germany It will be of interest to scholars of German economic and twentieth century history *Essays in Economic and Business History*, 1989 The Origins of Nonliberal Capitalism Wolfgang Streeck, Kozo Yamamura, 2005 In this book German sociologists and American and Japanese political scientists draw extensively on the work of economists and historians from their home countries as well as

from the United Kingdom and France      **The Rattle of Theta Chi** ,1932      **The Onondagan** ,1927      Corporate Germany Between Globalization and Regional Place Dependence C. Berndt,2001-03-29 Christian Berndt investigates how selected corporate actors in German small and medium sized enterprises and in large companies respond to globalisation and the apparent crisis of the German model By exploring the role of economic and non economic factors in shaping business strategies he argues that rather than simply being formal opposites forces of dynamic change and irrational persistence are intertwined      *Gopher* ,1925      The Gopher ,1925      Collective Skill Formation in the Knowledge Economy Giuliano Bonoli,Patrick Emmenegger,2022 Interest in collective skill formation systems has been high for a long time but recent structural economic and societal developments have led commentators to question their viability In particular the shift towards a knowledge economy creates a number of challenges for these highly praised systems of vocational training These challenges relate to the growing importance of knowledge intensive production in advanced economies and with the accelerated pace of change due to innovation and globalization What is more these issues are compounded by coinciding developments in growing inequality and the emergence of multicultural societies Can collective skill formation systems adapt fast enough to the needs of the knowledge economy Can they continue to be as successful as they have been in the past in integrating youth in the labour market Will employers be willing to participate in the delivery of vocational training in this new context In this book a world class team of leading experts on collective skill formation systems provide a thorough discussion of these and other questions raised by the shift to a knowledge economy The book argues that collective skill formation systems remain attractive for firms and governments However continuous and profound adjustments will be needed if they are to fulfil their objectives in terms of equity and efficiency      **The Routledge Companion to Accounting, Reporting and Regulation** Carien van Mourik,Peter Walton,2013-10-01 Financial accounting reporting and regulation is a vast subject area of huge global importance with interest rising significantly in the light of the ongoing global financial crisis The authors begin with a broad overview of the subject of accounting setting the stage for a discussion on the theoretical and practical issues and debates regarding financial reporting which are expanded on in the second part of the book This includes how to define the reporting entity recognition and measurement of the elements of financial statements fair values in financial reporting and the costs and benefits of disclosure The third part assesses the interest need and theories behind the accounting reporting and regulation industry while parts four and five look at the institutional social and economic aspects with issues such as accounting for environmental management and accounting regulation and financial reporting in Islamic countries both issues of ever increasing importance This authoritative Companion presents a broad overview of the state of these disciplines today and will provide a comprehensive reference source for students and academics involved in accounting regulation and reporting      The State and Business in the Major Powers Robert Millward,2013-03-12 In the 19th and early 20th centuries the state emerged as a major player in the economies of the Western World This important new

volume provides an economic history for the period 1815-1939 of state business relations in the major powers France Germany Japan Russia UK and the USA The book challenges the traditional story that the scale of state intervention reflected the degree to which each country was ideologically committed to laissez faire and which also tended to assume that governments were interested in economic growth and raising average living standards Robert Millward gives a rather different perspective arguing that the scale of state intervention and the differences across countries were motivated more by considerations of external defence and internal unification than by any notions of promoting economic growth or adherence to laissez faire This book provides for the first time an integrated economic history of these state business relations in the major powers in the period 1815-1939 and offers a completely new perspective on the links between tariff policies state enterprise in manufacturing the treatment of the peasantry regulation of railways taxation of the business sector policies on cartels trusts and competition
