Newman's Early Roman Catholic Legacy, 1845-1854 C. Michael Shea,2017-09-22 For decades scholars have assumed that the genius of John Henry Newman remained underappreciated among his Roman Catholic contemporaries In order to find the true impact of his work one must therefore look to the century following his death Newman s Early Roman Catholic Legacy 1845 1854 unpicks this claim Examining a host of overlooked evidence from England and the European continent C Michael Shea considers letters records of conversations and obscure and unpublished theological exchanges to show how Newman s 1845 Essay on the Development of Christian Doctrine influenced a host of Catholic teachers writers and Church authorities in nineteenth century Rome and beyond Shea explores how these individuals employed Newman s theory of development to argue for the definability of the new dogma of the Immaculate Conception of Mary during the years preceding the doctrine s definition in 1854 This study traces how the theory of development became a factor in determining the very language that the Roman Catholic Church would use in referring to doctrinal change over time In this way Newman s Early Roman Catholic Legacy 1845 1854 uncovers a key dimension of Newman s significance in modern religious history

**Hegel and Heidegger on Nature and World** Raoni Padui,2023-04-24 The philosophical concepts of nature and world have overlapped one another in a myriad of ways throughout the history of Western philosophy Nevertheless modernity has constructed a decisive philosophical dichotomy between the domain of nature and the domain of the human world as a response to the revolutions of the natural sciences in the seventeenth century In Hegel and Heidegger on Nature and World Raoni Padui investigates the responses to this distinction between nature and world in the works of Hegel and Heidegger Both philosophers attempt to heal the wounds of modernity and to reconcile the human historical world to the domain of nature and both refuse to accept the dichotomy between nature and world seeking to offer a way in which humans can inhabit a meaningful world without being alienated from the nature that conditions it However the difference in their modes of reconciliation illustrates the options opened up by modern philosophy either a Hegelian path of self determination that traces our historical emancipation from the natural domain or a Heideggerian rethinking of nature that seeks a renewed proximity to the domain of things

Continental Anti-Realism Richard Sebold,2014-11-03 There has been a resurgence of interest in the problem of realism the idea that the world exists in the way it does independently of the mind within contemporary Continental philosophy Many if not most of those writing on the topic demonstrates attitudes that range from mild skepticism to outright hostility Richard Sebold argues that the problem with this is that realism is correct and that the question should then become what happens to Continental philosophy if it is committed to the denial of a true doctrine Sebold outlines the reasons why realism is superior to anti realism and shows how Continental philosophical arguments against realism fail Focusing on the work of four important philosophers Kant Hegel Nietzsche and Husserl all of who have had a profound influence on more recent thinkers he provides alternative ways of interpreting their apparently anti realist sentiments and demonstrates that the insights of these Continental philosophers are nevertheless valuable despite their problematic metaphysical beliefs

phenomenology and existentialism He is therefore not only a path breaking thinker but also a pivotal figure in Western intellectual history Wide ranging well organised and timely this key volume makes Fichte s work both accessible and relevant It is essential reading for scholars graduate researchers and advanced students interested in Fichte German Idealism and the history of nineteenth century philosophy in the West     *The Persistence of Subjectivity* Robert B. Pippin, 2005-05-02 The Persistence of Subjectivity examines several approaches to and critiques of the core notion in the self understanding and legitimation of the modern bourgeois form of life the free reflective self determining subject Since it is a relatively recent historical development that human beings think of themselves as individual centers of agency and that one s entitlement to such a self determining life is absolutely valuable the issue at stake also involves the question of the historical location of philosophy What might it mean to take seriously Hegel s claim that philosophical reflection is always reflection on the historical actuality of its own age Discussing Heidegger Gadamer Adorno Leo Strauss Manfred Frank and John McDowell Robert Pippin attempts to understand how subjectivity arises in contemporary institutional practices such as medicine as well as in other contexts such as modernism in the visual arts and in the novels of Marcel Proust
