Itohan Osayimwese

Germany Architecture:

Architecture and Politics in Germany, 1918-1945 Barbara Miller Lane, 1968 In the spring of 1933 the Nazi government began its campaign to eliminate modern tendencies in German art with particular emphasis on architecture and to eradicate what it chose to call art bolshevism The Bauhaus by then an internationally famous center of avant garde design was shut down In a close analysis of intellectual political social and economic developments Lane shows that Nazi views on architecture were generated by a complex of historical factors Far from being cohesive Nazi cultural policy was largely the product of the conflicting ideas about art held by the Nazi leaders and their efforts to advance these ideas during internal power struggles

Colonialism and Modern Architecture in Germany Itohan Osayimwese, 2017-07-19 Over the course of the nineteenth century drastic social and political changes technological innovations and exposure to non Western cultures affected Germany's built environment in profound ways The economic challenges of Germany's colonial project forced architects designing for the colonies to abandon a centuries long highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies such as prefabricated systems As German architects gathered information about the regions under their influence in Africa Asia and the Pacific during expeditions at international exhibitions and from colonial entrepreneurs and officials they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself Offering in depth interpretations across the fields of architectural history and postcolonial studies Itohan Osayimwese considers the effects of colonialism travel and globalization on the development of modern architecture in Germany from the 1850s until the 1930s Since architectural developments in nineteenth century Germany are typically understood as crucial to the evolution of architecture worldwide in the twentieth century this book globalizes the history of modern architecture at its founding moment

The Transparent State Deborah Ascher Barnstone, 2004-11-10 Examining the transformation of transparency as a metaphor in West German political thought to an analogy for democratic architecture this book questions the prevailing assumption in German architectural circles that transparency in governmental buildings can be equated with openness accessibility and greater democracy The Transparent State traces the development of transparency in German political and architectural culture tying this lineage to the relationship between culture and national identity a connection that began before unification of the German state in the eighteenth century and continues today The Weimar Republic and Third Reich periods are examined although the focus is on the postwar period looking at the use of transparency in the three projects for a national parliament the 1949 Bundestag project by Hans Schipper the 1992 Bundestag building by Gunter Behnisch and the 1999 Reichstag renovation by Norman Foster Transparency is an important issue in contemporary architectural practice this book will appeal to both the practising architect and the architectural

The Secret History is a masterful and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
