James Hendershot, 2014-10-14 Too much of humanity s history might have been lost through the great flood which mercifully rendered humankind another chance to dwell on the Earth This fictional account through Methuselah begins with the creation of the two Earths and follows Adam through his multiple wives torn by sons who murder each other His remaining sons divide into tribes separated by their relationship with the creator Nonetheless wickedness rose in Seth s tribe while righteousness comes forth from Cain s seed Eve rewards Irad after he avenges the murder of his mother who was a favored stepdaughter of Eve Eve rewards Irad with three of her cherished daughters They launch a new homeland beyond the two established borders and through their faith in the God of Adam find favor with the Ancient One who reestablishes his covenant with a descendant of Habil Cain Lilith and several of her daughter s bond with Duci one of Irad s wives exploring the wild unsettled bulk of Pangaea lands beyond the invisible border which protects humanity from the hungry dinosaurs living in the open wilderness Duci with help from the Nephilim build the foundations for their two new cities and multiple temples Irad s tribe sails on secret ships to the southern hemisphere and build a Holy nation serving the Ancient One Enoch settles his small family on a mountaintop protected by angels as humanity falls into the final stage of wickedness Irad and his wives end their long fruitful lives nevertheless they watch from heaven as the vast majority of their family chose to follow their own gods and disown the Ancient One Just three young men who must sail to a distant island with their wives remain servants of the Ancient One Noah builds a giant rectangle ship boarding his sons and many wild animals saving them through a large flood Avram sails through the flood with his small group while watching death consume the lands **Methuselah's Zoo**

Steven N. Austad, 2023-08-15 Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity Opossums in the wild don t make it to the age of three our pet cats can live for a decade and a half cicadas live for seventeen years spending most of them underground Whales however can live for two centuries and tubeworms for several millennia Meanwhile human life expectancy tops out around the mid eighties with some outliers living past 100 or even 110 Is there anything humans can learn from the exceptional longevity of some animals in the wild In Methuselah s Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in

the ocean live longest of all Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins Humans have dramatically increased their lifespan with only a limited increase in healthspan we re more and more prone to diseases as we grow older By contrast these species have successfully avoided both environmental hazards and the depredations of aging Can we be more like them
