The book explores broad themes of

surface treatment such as wainscot rustication plasterwork and staircase embellishment together with chapters focused on virtuoso buildings and set pieces which illuminate these themes Archaeology Hotspot Great Britain Donald Henson, 2015-03-12 The Archaeology Hotspots series offers reader friendly and engaging narratives of the archaeology in particular countries Written by archaeological experts with a general reader in mind each book in the series focuses on what has been found and by whom what the controversies and scandals have been ongoing projects and how it all fits into a broader view of the history of the country In Archaeology Hotspot Great Britain expert Donald Henson first chronicles the deep archaeology of a long settled region including England Wales and Scotland then explores both the famously ancient finds cave art at Creswell Crags Stonehenge and more recent and iconic historic sites and monuments such as Westminster Abbey and Ironbridge Gorge He profiles the often larger than life personalities and the previously marginalized women who have contributed to British archaeology the controversies influencing how we see the past are also highlighted Henson considers London's position in the antiquities trade and the safeguarding of heritage sites As a whole the book tells a fascinating story of Great Britain's history culture national heritage and ongoing role as a hotspot of archaeology **British** Reports, Translations and Theses British Library, Document Supply Centre, 1989 Crossing Paths Or Sharing Tracks? Audrey J. Horning, Marilyn Palmer, 2009 This volume brings together over 30 leading scholars in post medieval archaeology and examines where this relatively new discipline has developed from and perhaps more importantly where it is going in the "Stone was the One Crop that Never Failed" Christopher Casswell, Patrick Daniel, Carol Allen, 2010 In decades to come 2006 and 2007 a 94km long gas pipeline was excavated across the Pennines from Pannal in North Yorkshire to Nether Kellet in Lancashire N W England Around twenty archaeological excavations were undertaken to mitigate the impact of the construction of the pipeline on the archaeology of the route and these form the subject of this volume The excavated remains were generally slight and were widely scattered along the route the range of periods they represent is equally broad and intermittent The earliest recorded evidence was a Mesolithic flint scatter from Ribblesdale Bronze Age activity was represented by ringworks burnt mounds and rock art with an apparent concentration on the Craven lowlands during this period The prehistoric remains seem to reveal a low and shifting population more concerned with monumentality and remembering than with settlement and land division Very few traces of activity attributable to the 1st millennium BC were encountered Romano British remains were surprisingly sparse considering the military infrastructure and transport network inserted into the region at this time The pattern of slight and transient landuse with low levels of material culture established in prehistory appears to have been an enduring characteristic of the area The excavations along the Pannal to Nether Kellet pipeline have undoubtedly helped to characterise the archaeological resource of the Pennine river valleys through which it passed and have refined the understanding of the distribution and chronology of various activities and site types across a range of time periods Some questions have been answered and many new ones framed These sites now exist as a comparator for future work both in the local area and nationally Sherborne Abbey and School Excavations 1972-76 and 1990
