Ethics and Metaphysics in the Philosophy of Edith Stein Michael F. Andrews, Antonio Calcagno, 2022-02-28 This book is dedicated to Edith Stein 1891-1942 who is known widely for her contributions to metaphysics Though she never produced a dedicated work on questions of ethics her corpus is replete with pertinent reflections This book is the first major scholarly volume dedicated to exploring Stein's ethical thought not only for its wide ranging content from her earlier to later works but also for its applications to such fields as psychology theology education politics law and culture Leading international scholars come together to provide a systematic account of Stein's ethics highlighting its relation to Stein's highly developed and complex metaphysics Questions about the good evil the rights and ethical comportment of the person the state and feminism are addressed The book appeals to scholars interested in the history of philosophical and ethical thought **Christianity, The Other, and The Holocaust** Michael R. Steele, 2003-02-28 According to the author

Christianity offers a powerful system of rewards and incentives to create cultural uniformity Those who do not join in this cultural uniformity become anathematized oppressed marginalized and ultimately removed from the Christian circle of moral obligation Using culture studies as a framework for analysis Steele investigates the ways in which Christianity created cultural conditions based on a theology of violence and the use of sacred violence to foster behaviors that would lead to the involvement of millions of perpetrators and bystanders during the many instances of extreme violence used against the Other over the centuries As the original Disconfirming Other in the Christian cultural world Jews often served as the primary target Thus there was a system of definitions rewards incentives and victims already in place when the Nazis came to power Calling for a re evaluation of the cultural practices and values that have developed within Christianity over time this important new book helps account for the phenomenon of the Nazi perpetrators and bystanders during the Holocaust Framing the Holocaust as a late but logical development in a long series of violent responses by Christianity to the Other those who stand outside the Christian world either by geographical accident religious tradition or some other factor the author attempts to show how the Holocaust while not a specifically Christian event was nevertheless sanctioned and conditioned by other events in the history of Christianity Using culture studies to frame his analysis Steele focuses on historical antecedents that help account for the apathy of bystanders and point to the preexistence of a moral framework supporting and empowering the perpetrators of the Holocaust This unique perspective concludes that the Nazis invented almost nothing with regard to the Shoah and that instead a long standing insistence on cultural hegemony played a much bigger role in the attempted destruction of the Jewish community
