**Negative/Positive** Geoffrey Batchen, 2020-12-21 As its title suggests Negative Positive begins with the negative a foundational element of analog photography that is nonetheless usually ignored and uses this to tell a representative rather than comprehensive history of the medium The fact that a photograph is split between negative and positive manifestations means that its identity is always simultaneously divided and multiplied The interaction of these two components was often spread out over time and space and could involve more than one person giving photography the capacity to produce multiple copies of a given image and for that image to have many different looks sizes and makers This book traces these complications for canonical images by such figures as William Henry Fox Talbot Kusakabe Kimbei Dorothea Lange Man Ray Seydou Ke ta Richard Avedon and Andreas Gursky But it also considers a number of related issues crucial to any understanding of photography from the business practices of professional photographers to the repetition of pose and setting that is so central to certain familiar photographic genres Ranging from the daguerreotype to the digital image the end result is a kind of little history of photography partial and episodic but no less significant a rendition of the photographic experience for being so This book represents a summation of Batchen s work to date making it be essential

reading for students and scholars of photography and for all those interested in the history of the medium      Art History and Fetishism Abroad Gabriele Genge, Angela Stercken, 2014-12-15 By focusing on the various modes and media of the fetishised object this anthology shifts the debates on thingness into a new global art historical perspective The contributors explore the attention given to those material images in both artistic and cultural practice from the heyday of colonial expansion until today They show that in becoming vehicles and agents of transculturality so called fetishes take shape in the 17th to 19th century aesthetics psychology and ethnography and furthermore inspire a recent discourse on magical practice and its secular meanings requiring altered art historical approaches and methods      **Portrait and Place** Giulia Paoletti, 2024-03-05 Strategically located on the Atlantic Ocean at the westernmost point of the continent Senegal is well known as an epicenter of Africa's modernities modernisms and liberation movements It was also one of the countries where the daguerreotype first arrived in sub Saharan Africa before circulating inland and across the region At that time Senegal did not exist as a nation state local kingdoms were still in power and the French presence was limited to trading posts along the coast The pioneers of photography in the 1840s were not exclusively Europeans but also African African American and Asian entrepreneurs In the decades that followed amateurs and professionals working in rural areas continued to explore and expand photography's possibilities Senegal's photographic histories thrived as part of a global visual economy during and despite the colonial experience Its works emerged as an integral part of the history of this medium which unlike any other was a global enterprise from the very beginning Portrait and place offers the first history of photography in this important country from its first iterations photographers and patrons of the 1840s to photographers such as Oumar Ka b 1930 and Mama Casset 1908 1992 who were active in the 1960s during the transition from the colonial to the postcolonial era Giulia Paoletti presents close studies of photographs firmly anchoring these objects their authors and their consumers in a global context that extends across West Africa the Black Atlantic and the greater Islamic community in other words beyond the borders of colonial empire Based on over ten years of field and archival research in Senegal this book features almost exclusively new previously unpublished visual material and explores both professional and amateur artists working in a wide variety of genres from landscape to portraiture and in media such as daguerreotypes and glass paintings As the first book to focus exclusively on Senegal's photographic histories Portrait and place expands the notions of what the medium has been and can be from a Eurocentric model to one that is decidedly insistently larger and more inclusive      **African Arts** ,2008      The British Journal of Photography ,2002
