Learning Leo van Lier,2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time **Patty Pearson's Boy, Or, Unto the**
