Kinseng,2020-01-14 This book analyses social conflict among fishers in Indonesia by implementing class theory thus adopting a new approach to analysing fishers conflicts in Indonesia In using this approach the book enables a comprehensive understanding of the nature of fishers social conflicts It demonstrates that the primary cause triggering conflict among fishers in Indonesia is not exploitation but domination This domination causes injustice in terms of access among fishers which in turn threatens their livelihood The author unpacks the influence of political parties and how macro economic conditions and public policy have become contextual variables of these class conflicts in the fisheries community The book presents the unique characteristics of class conflicts among fishers compared to class conflicts in industrial sectors underpinned by Marxist theory This book will be relevant to fisheries policy makers in Indonesia and abroad researchers and students in anthropology sociology and development economics as well as community and rural development specialists and conservationists      **An Alphabetical Index of the Streets, Squares, Lanes, Alleys, &c. **Hunters, Fishers and Foragers in Wales** Malcolm Lillie,2015-07-31 Malcolm Lillie presents a major new holistic appraisal of the evidence for the Mesolithic occupation of Wales The story begins with a discourse on the Palaeolithic background In order to set the entire Mesolithic period into its context subsequent chapters follow a sequence from the palaeoenvironmental background through a consideration of the use of stone tools settlement patterning and evidence for subsistence strategies and the range of available resources Less obvious aspects of hunter forager and subsequent hunter fisher forager groups include the arenas of symbolism ritual and spirituality that would have been embedded in everyday life The author here endeavors to integrate an evaluation of these aspects of Mesolithic society in developing a social narrative of Mesolithic lifeways throughout the text in an effort to bring the past to life in a meaningful and considered way The term hunter fisher foragers implies a particular combination of subsistence activities but whilst some groups may well have integrated this range of economic activities into their subsistence strategies others may not have The situation in coastal areas of Wales in relation to subsistence settlement and even spiritual matters would not necessarily be the same as in

upland areas even when the same groups moved between these zones in the landscape The volume concludes with a discussion of the theoretical basis for the shift away from the exploitation of wild resources towards the integration of domesticates into subsistence strategies i e the shift from food procurement to food production and assesses the context of the changes that occurred as human groups re orientated their socioeconomic political and ritual beliefs in light of newly available resources influences from the continent and ultimately their social condition at the time of transition
