Fishes Of Greece:

A Catalogue of the Fishes of Greece, with Notes on the Names Now in Use and Those Employed by Classical

Authors Horace Addison Hoffman, David Starr Jordan, 1892 Coastal Fishes of Greece Alistair Evelpidis Economakis, 1995

Coastal Greek waters have been well utilised for centuries by professional fishermen. In the past few years there has been a dramatic rise in the number of recreational fishermen and tourists which has resulted in an increased interest in marine life. The recent world wide concern for environmental issues has also greatly contributed to the increased attention given to the marine environment of Greece. As a result there is a need for literature which provides information about marine ecosystems and organisms in Greek waters. This book provides a valuable and accurate resource for tourists, divers, sport fishermen and ichthyologists to identify some of the common species of fishes which may be encountered in Greek waters. In addition general information about the life history of each fish described is included. To aid in the identification of each fish a colour photograph as well as a drawing of each fish with extended fins and defined markings is provided. *A Catalogue of the*

The volumes contain a taxonomic review of all named and identified taxa, their taxonomic history and current status as well as historical phylogenetic and biogeographic information. Volume 1 contains a synopsis of the fossil record and taxonomy of important groups of vertebrates represented in the fossil record of Greece. The volume deals with some of the early splitting clades including the basal and enigmatic conodonts and basal tetrapods like fishes, amphibians and reptiles like lizards, snakes, crocodiles, turtles and tortoises. The second part of the volume deals with basal mammalian clades, some of which are quite characteristic for the fossil record of the country: aardwarks, hyraxes, proboscideans, elephants and mammoths, sea cows, rodents and lagomorphs. The volume ends with special chapters on the primate fossil record of the country including some of our most recent and distant relatives.
