Berra, 2008-09-15 With more than 29 000 species fishes are the most diverse group of vertebrates on the planet Of that
number more than 12 000 species are found in freshwater ecosystems which occupy less than 1 percent of the Earth s
surface and contain only 2 4 percent of plant and animal species But on a hectare for hectare basis freshwater ecosystems
are richer in species than more extensive terrestrial and marine habitats Examination of the distribution patterns of fishes in
these fresh waters reveals much about continental movements and climate changes and has long been critical to
biogeographical studies and research in ecology and evolution Tim Berra s seminal resource *Freshwater Fish Distribution*
maps the 169 fish families that swim in fresh water around the world Each family account includes the class subclass and

Organization of the United Nations, 2002 This three volume field guide covers the species of interest to fisheries of the major
marine resource groups exploited in the Western Central Atlantic The area of coverage includes FAO Fishing Area 31 The
marine resource groups included are the bivalves gastropods cephalopods stomatopods shrimps lobsters crabs hagfishes
sharks batoid fishes chimaeras bony fishes sea turtles and marine mammals The introductory chapter outlines the
environmental ecological and biogeographical factors influencing the marine biota and the basic components of the fisheries
in the Western Central Atlantic Within the field guide the sections on the resource groups are arranged phylogenetically
according to higher taxonomic levels such as class order and family Each resource group is introduced by general remarks
on the group an illustrated section on technical terms and measurements and a key or guide to orders or families Each family
generally has an account summarizing family diagnostic characters biological and fisheries information notes on similar
families occurring in the area a key to species a checklist of species and a short list of relevant literature Families that are
less important to fisheries include an abbreviated family account and no detailed species information Species in the
important families are treated in detail arranged alphabetically by genus and species and include the species name frequent
synonyms and names of similar species an illustration FAO common name s diagnostic characters biology and fisheries
information notes on geographical distribution and a distribution map For less important species abbreviated accounts are

used Generally this includes the species name FAO common name s an illustration a distribution map and notes on biology fisheries and distribution The final volume concludes with an index of scientific and common names Vol 1 ISBN 92 5 104825 8 Vol 3 ISBN 92 5 104827 4 Order Beloniformes: Needlefishes, Sauries, Halfbeaks, and Flyingfishes Bruce B.
