*Origins of Intelligence* Michael Lewis, 2013-06-29 Since the first edition of this volume was published in 1976 interest in the problem of intelligence in general and infant intelligence in particular has continued to grow The response to the first edition was heartening many readers found it a source of information for the diverse areas of study in infant intelligence Because of the success of that volume we have decided to issue a second edition This edition is in many ways both similar to and different from the first Its similarity lies in the fact that many of the themes and many of the contributors remain the same Its difference can be found in the updating of old chapters and the addition of several new ones Taken together the chapters present a rounded picture of the central issues in infant intelligence Because the aim was to present a picture of the issues no attempt other than the selection of authors and themes can be made to integrate these chapters into a single coherent whole In large part this reflects the diversity of study found in the area of early intellectual behavior Rather than having a comprehensive theory of infant intelligence the field abounds with a series of critical questions To unite these chapters into some coherence it will be necessary to articulate what these issues might be Five major themes run throughout the field of infant intelligence and thus through this volume **Development in Infancy** Martha E. Child,Lionel Cust,Roger Fry,1905 The Lancet ,1891 **Explorations in Temperament** Jan Strelau,Alois Angleitner,2013-11-11 The growing interest in research on temperament during the last decade has been re corded by several authors e g R Plomin J E Bates from such sources of informa tion as the Social Sciences Citation Index or Psychological Abstracts The editors inquiry shows that the number of cases in which the term temperament was used in the title of a paper or in the paper s abstract published in Psychological Abstracts reveals an essential increase in research on temperament During the years 1975 to 1979 the term temperament was used in the title and or summary of 173 abstracts i e

34 6 publications per year during the next five years 1980 1984 it was used in 367 abstracts 73 4 publications per year whereas in the last five years 1985 to 1989 the term has appeared in 463 abstracts that is in 92 6 publications per year Even if the review of temperament literature is restricted to those abstracts it can easily be concluded that temperament is used in different contexts and with different meanings hardly allowing any comparisons or general statements One of the consequences of this state of affairs is that our knowledge on temperament does not cumulate despite the increasing research activity in this field This situation in temperament research motivated the editors to organize a one week workshop on The Diagnosis of Temperament Bielefeld Federal Republic of Germany September 1987      The Variation of the Upper Atmospheric Scale Height and Its Effect on Atmospheric Tidal Wavelengths William J. Taffe, 1969 Using atmospheric models from the U S Standard Atmosphere 1966 Supplements the extremes of the atmospheric scale height profile are obtained and compared with an average profile The first and second height derivatives of all three profiles are calculated and compared An expression is obtained for the wavelength of the atmospheric tide a function of the scale height and its derivatives which is more exact than the one in common use and the extent of validity of the approximate formula is shown The change in the tidal wavelength due to variation of the scale height profile is also explicated Author      **Developmental Science** Marc H.
