Five Minutes With The Bible And Science:

Five Minutes with the Bible and Science Walter Lang, 1974 **God and Nature** David C. Lindberg, Ronald L. Numbers, 1986-04-29 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language. Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions the image of warfare lingers in the public mind. To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians. In eighteen essays prepared especially for this book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing controversies over scientific creationism. They explore not only the impact of religion on science but also the influence of science and religion. This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship. Scholars and general readers alike will find it provocative and readable.

Evangelicals and Science in Historical Perspective David N. Livingstone, D. G. Hart, Mark A. Noll, 1999-04-08 In the eighteenth and nineteenth centuries evangelicals often took their place among prominent practicing scientists and their perspectives exerted a considerable impact on the development of modern western science. Over the last century however evangelical scientists have become less visible even as the focus of evangelical engagement has shifted to political and cultural spheres. *Evangelicals and Science in Historical Perspective* offers the first wide ranging survey of the history of the encounter between evangelical Protestantism and science. Comprising papers by leading historians of science and religion this collection shows that the questions of science have been central to the history of evangelicalism in the United States as well as in Britain and Canada. It will be an invaluable resource for understanding the historical context of contemporary political squabbles such as the debate over the status of creation science and the teaching of evolution.

God's Own Scientists Christopher P. Toumey, 1994 For more than five years Christopher P. Toumey talked with contemporary creationists joined in their Bible study and prayer groups and interviewed their leaders in order to understand their heartfelt opposition to the idea of evolution. The modern creationist movement is, Toumey argues, much more than a narrow doctrine extrapolated from a handful of biblical verses; rather it represents a broad cultural discontent with the moral disintegration of modern America and a remarkable faith in science itself.

The Creationists Ronald L. Numbers, 1993-01-01 Forty seven percent of the American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years. Ronald L. Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement's tangled roots in the theologies of late

nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers s story of today s widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth s antiquity to the insistence of present day scientific creationists that most fossils date back to Noah s flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science The Christian Science Journal ,1919 **The Publishers Weekly** ,1890 *Congressional Record* United States. Congress,1983 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 **But is it Science?** Michael Ruse,1988 Essays dealing with the nature of science and the Evolution Creationism controversy *The Saturday Review of Politics, Literature, Science and Art* ,1868 **Christian Science Sentinel** ,1899 **Seduced by Science** Steven Goldberg,2000-10 American religion Steven Goldberg claims has fallen into a trap Just at the moment when it has amassed the political strength and won the legal right to participate effectively in public debate it has lost its distinctive voice Instead of speaking of human values goals and limits it speaks in the language of science In the United States science has extraordinary influence and respect American religious leaders seeking prestige for their point of view regularly couch their responses to technological developments or defend their faith in scientific terms They claim for instance that medical studies demonstrate the power of prayer that science validates the Bible including its account of creation and that patenting the genetic code is dangerous because genes are the essence of who we are But when ministers priests and rabbis expound on double blind studies and the genetic causes of behavior they do not elevate religion Goldberg maintains they trivialize it Seduced by Science examines how by allowing scientific discourse to set the terms of the debate American religious leaders facilitate religion s move away from its more appropriate and important concerns of values morality and humility Science can tell us a lot about what is but precious little about what ought to be and our religious leaders often miss the chance to add an important voice from a faith based perspective to the public debate that follows scientific advances Discussing the most recent and pressing collisions between science and religion such as the medicinal benefits of prayer the human genome project and cloning Goldberg raises the timely question of what the appropriate role of religion might be in public life today Tackling the legal aspects of religious debate Goldberg suggests ways that religious leaders might confront new scientific developments in a more meaningful fashion Der Herold der Christlichen Wissenschaft ,1920 Gleanings from the Harvest-fields of Literature, Science and Art Charles Carroll Bombaugh,1860 The Truth Never Stands in the Way of a Good Story Jan Harold Brunvand,2000 Here he the author looks in detail at a dozen rampant and long lived examples of this vigorous category of contemporary folklore
