Adventures in Superfund B. A. Nieveen, 2023-02-08 The EPA came to numerous towns in the mining west armed with a computer program that they were certain was more accurate than any testing method for determining blood lead that was currently known to man The EPA accepted the computer output as near sacred while they mocked real life raw data This resulted in declaring a phony health hazard followed by the labeling of properties with the death kiss of Superfund Complaints ensued with the most legitimate protests coming from innocent victims Congress had created this legal mutant but could not or would not fix it Meanwhile the courts were of little remedy since judges jumped from their lonely intellectual orientation onto the chummy buffoonery chessboard of Democrats and Republicans That platform that has lost its own moral up and down all the while the courts get to dissect laws so far beyond sunlight that the consideration of common sense is beyond the pale This is the story of several communities battle with an immoral misguided law

Europe, America, and Technology: Philosophical Perspectives P.T. Durbin, 2012-12-06 As Europe moves toward 1992 and full economic unity and as Eastern Europe tries to find its way in the new economic order the United States hesitates Will the new European economic order be good for the U S or not Such a question is exacerbated by world wide changes in the technological order most evident in Japan's new techno economic power As might be expected philosophers have been slow to come to grips with such issues and lack of interest is compounded by different philosophical styles in different parts of the world What this volume addresses is more a matter of conflicting styles than a substantive confrontation with the real world issues But there is some attempt to be concrete The symposium on Ivan Illich with contributions from philosophers and social critics at the Pennsylvania State University where Illich has taught for several years may suggest the old cliché of Old World vs New World Illich's fulminations against technology are often dismissed by Americans as old world style prophecy while Illich seems largely unknown in his native Europe But Albert Borgmann born in Germany though now settled in the U S

shows that this old dichotomy is difficult to maintain in our technological world Borgmann s focus is on urgent technological problems that have become almost painfully evident in both Europe and America **Kids and Media at the New Millennium** Donald F. Roberts,2000 The new communication technologies play a major role in the lives of children adolescents who have available an almost continual diet of highly vivid on demand audiovisual images In order to paint a comprehensive picture of children s media environment media use patterns a national study of the media environment media habits of U S children ages 2 through 18 years was undertaken This report includes results for two nationally representative samples totaling 3 155 children ages 2 18 years including over samples of both Black Hispanic children In addition week long media use diaries were collected from 621 of these children *Gas Logic* ,1928 *My Biggest Research Mistake* Robert J. Sternberg,2019-03-01 My Biggest Research Mistake helps students and professionals in the field of psychological science learn from the diverse mistakes of successful psychological scientists Through 57 personal stories drawn from the experiences of fellows in the Association for Psychological Science APS editor Robert J Sternberg presents the mistakes of experts in the field as opportunities for learning allowing students to avoid making the same mistakes in their own work
