**Moore's Paradox** Mitchell S. Green, John N. Williams, 2007-01-11 G E Moore famously observed that to assert I went to the pictures last Tuesday but I don't believe that I did would be absurd Moore calls it a paradox that this absurdity persists despite the fact that what I say about myself might be true Over half a century later such sayings continue to perplex philosophers and other students of language logic and cognition Ludwig Wittgenstein was fascinated by Moore's example and the absurdity of Moore's saying was intensively discussed in the mid 20th century Yet the source of the absurdity has remained elusive and its recalcitrance has led researchers in recent decades to address it with greater care In this definitive treatment of the problem of Moorean absurdity Green and Williams survey the history and relevance of the paradox and leading approaches to resolving it and present new essays by leading thinkers in the area Contributors Jonathan Adler Bradley Armour Garb Jay D Atlas Thomas Baldwin Claudio de Almeida Andr Gallois Robert Gordon Mitchell Green Alan H jek Roy Sorensen John Williams      *Self-Reference* S.J. Bartlett, P. Suber, 2012-12-06 Self reference although a topic studied by some philosophers and known to a number of other disciplines has received comparatively little explicit attention For the most part the focus of studies of self reference has been on its logical and linguistic aspects with perhaps disproportionate emphasis placed on the reflexive paradoxes The eight volume Macmillan Encyclopedia of Philosophy for example does not contain a single entry in its index under self reference and in connection with reflexivity mentions only relations classes and sets Yet in this volume the introductory essay identifies some 75 varieties and occurrences of self reference in a wide range of disciplines and the bibliography contains more than 1 200 citations to English language works about reflexivity The contributed papers investigate a number of forms and applications of self reference and examine some of the challenges posed by its difficult temperament The editors hope that readers of this volume will gain a richer sense of the still largely unexplored frontiers of reflexivity and of the indispensability of reflexive concepts and methods to foundational inquiries in philosophy logic language and into the freedom personality and intelligence of persons      Communication and Consequences Robert Norton, David Allen Brenders, 1996 The communicative process allows sometimes forces one to make connections about the self and simultaneously how the self relates to the other and the world The bonus of communicating is that one makes connections with other individuals Not only are social connections made but political business spiritual

esoteric and functional connections as well Each connection holds the possibility of teaching the person more about the self and the world This book helps individuals understand the dynamics of change particularly by focusing on enthymematic communication that can be used to effect change It demonstrates the simultaneous potential of communication to both constrain and free the individual The first part of the book establishes the theoretical ground by identifying the definitional issues defining communication and relating content and style to the sense making function of interaction The second part examines the primary consequences of interaction in both self and relational identity Communication creates self identification as well as relational identity both of which provide a means of stabilizing the self and simultaneously allowing for change

**Gaither's Dictionary of Scientific Quotations** Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08

Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

*Legal Modernism* David Luban, 2010-05-06 Modernism in legal theory is no different from modernism in the arts both respond to a cultural crisis a sense that institutions and traditions have lost their validity Some doubt the importance of the rule of law others question the objectivity of legal reasoning We have lost confidence in the justice of our legal institutions and even in our very capacity to identify justice Legal philosopher David Luban argues that we cannot escape the modernist predicament Accusing contemporary legal theorists of evading rather than confronting the challenge of modernity he offers important and original objections to pragmatism traditionalism and nihilism He argues that only by weaving together the broken narrative and forgotten voices of history's victims can we come to appreciate the nature of justice in modern society Calling a trial the embodiment of the law's self criticism Luban demonstrates the centrality of narrative by analyzing the trial of Martin Luther King the Nuremberg trials and trial scenes in Homer Hesiod and Aeschylus With these examples Luban explores several of the tensions that motivate much more contemporary legal theory order versus justice obedience versus resistance statism versus communitarianism an illuminating account of how contemporary legal theory can be understood as an expression of the modernist predicament by exploring the analogy between modernism in the arts and modernism in law politics and philosophy a valuable critical discussion of modern legal theory

Choice David Luban is Morton and Sophia Macht Professor of Law at the University of Maryland and Research Scholar at the Institute for Philosophy and Public Policy His other books include *Lawyers and Justice An Ethical Study*

**From Rodin to Giacometti**, 2021-09-06 This book is a collection of papers delivered at an international conference in September 1996 at the Scottish National Gallery of Modern Art during a major Giacometti retrospective The contributors are leading curators art historians and literature specialists

While the relationship between nineteenth and twentieth century painters and writers has been the subject of intense interest in recent years the parallel relationship between sculptors and writers has been largely neglected These essays seek to redress the balance by looking at a variety of ways in which the conventional barriers between writing and sculpting were broken down by such pioneering figures as Rodin Degas Bourdelle Val ry Apollinaire Reverdy Breton Bataille Arp Picasso and Giacometti Among the topics discussed are the many personal and professional contacts dual artistic talent Ecrits d artistes ekphrasis sculpture as object the sculptorly representation of the poet the poetic representation of the sculptor sculpture as metaphor proprioception and mental images Fully illustrated throughout this book offers new perspectives on familiar masterpieces like Rodin s Gates of Hell but also opens up less well known subjects like Val ry s sculpture and Breton s Object Poems Above all it makes a provocative and original contribution to Word and Image studies **Why Did the Logician**

**Cross the Road?** Stan Baronett, 2021-08-12 Find out what connects logic and humor in this alternative guide to logical reasoning Combining jokes stories and ironic situations Stan Baronett shows how it is possible to ground the language of logic in everyday experience Each chapter introduces a basic logical reasoning concept based on happenings in daily life Using jokes as his examples Baronett reveals the inner workings of logic After all an effective joke often relies on an unanticipated assumption that leads to an unexpected result The assumption changes the normal context of an everyday situation so we are surprised by the ending A complex mind that learns from experience and builds a storehouse of regularly recurring patterns is a great survival tool But for a joke to work the punch line has to be something our minds don t logically anticipate The ending jolts our minds for a split second while we grasp the absurdity of the situation This is how logic works one part of your mind determines whether the information you are receiving is true or false while another part of your mind deals with logical consequences Injecting a sense of humor into logical language Baronett helps us understand how to analyze basic logical reasoning and provides light relief for anyone daunted by the complex world of logic
