Flames in the Wind: A Florentine Deception Lauren Castillo, **The Flame in the Wind** Margaret Steele Anderson, 1913 **Flame in the Wind** Katherine Stenholm, Bob Jones University. Unusual Films, 1971* This souvenir program discusses the historical background principle actors and production personnel sets and locations and various technical aspects used to produce the film *Flame in the Wind* **Flame in the Wind** Tim Rogers, **Flame in the Wind** Margaret Pedler, 1938 **Impact of Natural Hazards on Oil and Gas Extraction** Ian Lerche, Elchin Bagirov, 2013-03-09 Since the dissolution of the Soviet Union almost a decade ago there has been rapid evolution of interactions between the Western nations and individual countries of the former Soviet Union As part of that interaction the autonomous independent Republic of Azerbaijan through its scientific arm the Geological Institute of the Azerbaijan Academy of Sciences under the Directorship of Academician Akif Ali Zadeh and Deputy Director Ibrahim Guliev arranged for personnel to be seconded to the University of South Carolina The idea here was to see to what extent a quantitative understanding could be achieved of the evolution of the Azerbaijan part of the South Caspian Basin from dynamical thermal and hydrocarbon perspectives The Azeris brought with them copious amounts of data collected over decades which together with the quantitative numerical codes available at USC enabled a concerted effort to be put forward culminating in two large books *Evolution of the South Caspian Basin Geological Risks and Probable Hazards* 675 pps and *The South Caspian Basin Stratigraphy Geochemistry and Risk Analysis* of which were published by the Azerbaijan Academy of 472 pps both Sciences and also many scientific papers Thus over the last four to five years an integrated comprehensive start has been made to understand the hydrocarbon proneness of the South Caspian Basin In the course of the endeavor to understand the basinal evolution it became clear that a variety of natural hazards occur in the Basin **The Flame in the Mist** Kit Grindstaff, 2013 Set in an imagined past this dark fantasy adventure features Jemma a fiery headed heroine held captive in Agromond Castle yet destined to save mist shrouded Anglavia *Wildland Fire* Michael John Gollner, Xinyan Huang, Jason John Sharples, Melanie C. Rochoux, 2020-08-28 *The Flame in the Wind* Margaret Steele Anderson, 1930 Wildland Fire Behaviour Mark A. Finney, Sara S. McAllister, Jason M. Fortthofer, Torben P. Grumstrup, 2021-11 Wildland fires have an irreplaceable role in sustaining many of our forests shrublands and grasslands They can be used as controlled burns or occur as free burning wildfires and can sometimes be dangerous and destructive to fauna human communities and natural resources Through scientific understanding of their behaviour we can develop the tools to reliably use and manage fires across landscapes in ways that are compatible with the constraints of modern society while benefiting the ecosystems The science of wildland fire is incomplete however Even the simplest fire behaviours how fast they spread how long they burn and how large they get arise from a dynamical system of physical processes interacting in unexplored ways with heterogeneous biological ecological and meteorological factors across many scales of time and space The physics of heat transfer combustion and ignition for example operate in all fires at

millimetre and millisecond scales but wildfires can become conflagrations that burn for months and exceed millions of hectares Wildland Fire Behaviour Dynamics Principles and Processes examines what is known and unknown about wildfire behaviours The authors introduce fire as a dynamical system along with traditional steady state concepts They then break down the system into its primary physical components describe how they depend upon environmental factors and explore system dynamics by constructing and exercising a nonlinear model The limits of modelling and knowledge are discussed throughout but emphasised by review of large fire behaviours Advancing knowledge of fire behaviours will require a multidisciplinary approach and rely on quality measurements from experimental research as covered in the final chapters

A History of the Wind Alain Corbin, 2022-11-09 Everyone knows the wind's touch its presence its force Sometimes it roars and howls at other times we hear its wistful sighs and feel its soothing caresses Since antiquity humans have borne witness to the wind and relied on it to navigate the seas And yet despite its presence at the heart of human experience the wind has evaded scrutiny in our chronicles of the past In this brilliantly original volume Alain Corbin sets out to illuminate the wind's storied history He shows how before the nineteenth century the noisy emptiness of wind was experienced and described only according to the sensations it provoked Imagery of the wind featured prominently in literature from the ancient Greek epics through the Renaissance and romanticism to the modern era but little was known about where the wind came from and where it went It was only in the late eighteenth century with the discovery of the composition of air that scientists began to understand the nature of wind and its trajectories From that point on our understanding of the wind was shaped by meteorology which mapped the flows of winds and currents around the globe But while science has enabled us to understand the wind and in some respects to harness it the wind has lost nothing of its mysterious force It still has the power to destroy and in the wind's ethereal presence we can still feel its connection with creation and death

YHWH in the Wind(s) Violet Chiswa Gandiya, 2025-01-31 From interdisciplinary intertextual and comparative analytical perspectives this book engages with the epistemologies of the Global South and Global North to reveal a fresh insight into the image of YHWH in the guise of the phenomenal wind's and the purpose of this image in the biblical Hebrew tradition Therefore this book showcases YHWH appearing with the potent wind's to create and transform chaos into cosmic order at primal creation Likewise this discourse presents YHWH breaking into the historical and social realm in his various sociopolitical roles to destroy all forms of chaotic force by his bluster of wind's and to establish maintain or restore world social order founded on his rule of justice and righteousness This accounts for the view that all creation and order originate from YHWH and are maintained by YHWH's innate rules of ethical governance This fresh insight into the sights and sounds of YHWH asserting his rule in the dramaturgical wind's not only renders new meaning to biblical texts within their contexts but also offers a persuasive message and alluring theological reflections that can shape new discourses to engage and address contemporary theological and social issues of equity justice and harmony within YHWH's intended design of world and social order The
