Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as

well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

You Are Here James Pollock,2012-11-15 Northrop Frye wrote that for Canadian poets the question of identity isn t so much Who am I as Where is here In his ground breaking book James Pollock gives his answer that where we are as a literary culture has a great deal to do with our relationship to elsewhere For far too long Canadians have refused to read our poetry in the larger international context of poetry as an art leaving our poets isolated and ignored Pollock sets out to situate our verse on the map of world poetry a map which like one of those incomplete globes from the sixteenth century still leaves Canada largely uncharted Acutely intelligent and unflinchingly honest in its judgements *You Are Here* is an eye opening guide to the new world of Canadian poetry sensitively exploring the work of such poets as Anne Carson Daryl Hine Jeffery Donaldson Karen Solie and Eric Ormsby The collection ends with a witty treatise on good criticism and a passionate and learned reconsideration of poetic values making *You Are Here* an essential companion for students and lovers of Canadian poetry everywhere
