Aycock, Michael Keith Schoenecke, 1988 Offered here is a consideration of films and the dramas or books from which they

derive as seen through the eyes of literary critics a veteran Hollywood producer and the screenwriters themselves Sailing Home Norman Fischer, 2011-07-05 Homer's Odyssey holds a timeless allure. It is an ancient story for every generation: the struggle of a man on a long and difficult voyage, longing to return to love and family. Odysseus's strivings to overcome both divine and earthly obstacles and to control his own impulsive nature hold valuable lessons for us as we confront the challenges of daily life. *Sailing Home* breathes fresh air into a classic we thought we knew, revealing its profound guidance for the modern seeker. Dividing the book into three parts: Setting Forth, Disaster, and Return, Fischer charts the course of Odysseus's familiar wanderings. Readers come to see this ancient hero as a flawed human being who shares their own struggles and temptations, such as yielding to desire or fear or greed and making peace with family. Featuring thoughtful meditations, illuminating anecdotes from Fischer's and his students' lives, and stories from many wisdom traditions, including Buddhist, Judaic, and Christian, *Sailing Home* shows the way to greater purpose in our own lives. The book's literary dimension expands its appeal beyond the Buddhist market to a wider spiritual audience and to anyone interested in the teachings of myth and story.

**Developmental Psychopathology, Theory and Methods** Dante Cicchetti, Donald J. Cohen, 1995-05 The first of two complementary volumes on developmental psychopathology, a new perspective on mental illness that ties mental disorder to normal development. Developmental psychopathology is sufficiently different from older views of mental dysfunction as to be growing as a separate subdiscipline of psychology/psychiatry. This volume covers the history, theory, and methods of this new approach, including the contributions of several standard theoretical viewpoints: psychoanalytic, systems theory, organizational information processing, cross-cultural, etc. It examines the relationship between developmental psychopathology and genetics, neuropsychology, epidemiology, and ethology and looks at the implications for psychometric theory.

**Pastiche** Richard Dyer, 2024-11-01 Writing with his customary wit and style, Richard Dyer argues that while pastiche can be used to describe works which contain montage or collage, it can also be used to describe works which are a kind of imitation of previous works. Investigating a wide range of cultural texts drawn from films, videos, novels, poetry, rap tracks, music, and painting, Richard Dyer explores issues of text, genre, and the use of pastiche as a resource within a work. The final chapter draws together the underlying concern of the book with affect and poetics and discusses the politics of pastiche.

*Dacia Maraini's Narratives of Survival* Tommasina Gabriele, 2015-12-03 Dacia Maraini's *Narratives of Survival* Reconstructed focuses on Dacia Maraini's narrative from about 1984 to 2004 and makes substantive use of her interviews and essays. While acknowledging the importance and ongoing validity of feminist scholarship on Maraini's work, this book seeks to take scholarship on Maraini beyond feminist readings by identifying a critical framework that cuts across gender and genre and thereby invites alternative readings. Using a method of close textual analysis, the author includes studies of men, children, animals, and imaginary characters in Maraini's narrative, analyzes language, character, motifs, and symbols, and considers some of Maraini's work in light of declining postmodern and emerging posthuman critical social theory. This critical framework

identifies the paradigm of reconstruction as narrative center both strategy and theme of many of Maraini's works from this twenty year period and beyond Reconstruction here signifies the strategies by which Maraini's deep investment in survival which has its roots in the life threatening conditions she experienced as a small child in a WWII Japanese concentration camp is enacted in a narrative re building and re constructing of personal memory of various personal social and political histories of motherhood and maternal discourses of crime stories of postmodern fragmentation and even of the process of erasure itself Maraini's narrative is deeply attentive to the mechanisms that threaten survival of the body and not just the woman's body psychological and aesthetic survival the survival in the Italian canon of a woman author's work memory and legacy after her death the survival of a drug addicted and self destructive younger generation and by extension collective and ecological survival Never marked by nihilism or despair Maraini's narratives offer the ethos of reconstruction as a variation on the begin again that marks the end of many of her novels and as we can see in *Colomba* her own aesthetic process of renewal and regeneration This book focuses primarily on *Il treno per Helsinki* 1984 *Isolina* 1985 some of her short stories for children *La nave per Kobe* *Diari giapponesi di mia madre* 2001 *Buio Strega Literary Prize* 1999 and *Colomba* 2004

**Flashbacks of a Government Man**  
Tommy E. Cauthen, 2019-06-04 This is a story about one man's experience as a US Army soldier who served as a commissioned officer during the Cold War and afterwards as a special agent under the Federal Bureau of Investigation prior

to 9 11 The main character Markus Britt shares his experiences based on flashbacks of real historical events The story line is built on certain events that caused him to recall the event As an example the smell of wood burning watching TV programs reading news items the smell of certain cooked food the sounds of aircraft flying overhead and sometimes just a place or name could cause these flashbacks     The changing face of VR: Pushing the boundaries of experience across multiple industries Jordan Frith,Michael Saker,2022-09-20 VR occupies an interesting place in the media ecosystem On the one hand it is an emerging cutting edge technology backed by billions of USD by major corporations On the other hand VR is older than the World Wide Web and older than social networking sites After many years of hype and unfulfilled potential VR is now finally on the precipice of widespread adoption and has begun to be used in novel ways throughout various industries This edited collection brings together a diverse group of authors to analyse the current state of VR while recognizing that these many different use cases will likely become even more important with the increased investment in the technology To examine the current state of VR across multiple sites and industries we compiled a group of practitioners and academics to both examine VR practices and theorize new uses of VR The book also focuses on an inclusive analysis and includes authors from South America North America Europe Australia and Asia and the topics range from analyses of VR use in live events to the ethics of nature based VR apps to the social practices involved in using public VR at museum exhibits As we argue in the introduction this book is one of the first to bring together authors from different backgrounds and disciplines to chart just how widely VR has already spread And maybe most importantly the topics covered in this book will only become more relevant as VR continues to grow especially in the wake of the growth of the supposed Metaverse     **Sense of Wonder** Leigh Grossman,2011-12-20 A survey of the last 100 years of science fiction with representative stories and illuminating essays by the top writers poets and scholars from Edgar Rice Burroughs and Samuel Butler to Robert A Heinlein and and Jack Vance from E E Doc Smith and Clifford D Simak to Ted Chiang and Charles Stross and everyone in between More than one million words of classic fiction and essays
