Flashpoints In Environmental Policymaking:

Flashpoints in Environmental Policymaking Sheldon Kamieniecki, George A. Gonzalez, Robert O. Vos, 1997-04-25 As a contribution to public policy and to help educate students about natural resource issues this book identifies the likely hot spots of environmental policy and presents alternative and often opposing points of view on the major controversies that are likely to be with us well into the next century Among the topics covered are comparative risk assessment market incentives in environmental regulation environmental justice public versus private management of public lands international trade and sustainable development and the relationship between national security and environmental protection **Environmental Policymaking** Michael T. Hatch, 2012-02-01 The methods employed in the pursuit of environmental protection are often highly contested leading to alternative policy approaches This book details the frequently neglected topic of these alternative approaches to environmental policymaking through case studies drawn primarily from the United States Germany and Japan Among the policy instruments analyzed are eco audits voluntary agreements tradable permits green taxes environmental impact assessments and command and control regulations Also examined are international regulatory arrangements to encourage sustainable forestry management practices Various evaluative criteria are applied to each case study including environmental effectiveness economic and political efficiency administrative efficacy and technological innovation **New Principles in Planning Evaluation** Abdul Khakee, Angela Hull, 2016-12-05 This book provides recently developed and tested methods for assessing the strengths and weaknesses of planning and policy options Several contributions focus on new substantive areas of concern in planning evaluation including environmental justice and sustainable urban development Applications of evaluation in several planning contexts are demonstrated and special problems that these pose are assessed Several chapters address how to communicate the process and results to several stakeholder groups and how to engage these groups in the evaluation process Each chapter employs a real world case in practice thus dealing with the complexity of applying planning evaluation and providing practical advice useful in similar situations *Urban Areas and Global Climate Change* William Holt, 2012-10-12 Examining urban environmental issues at the macro municipal level down to the micro community and individual level this volume features cities and metropolitan regions across the global north and south with case studies from the United States Canada Eastern and Western Europe to India Central America South America and Africa **Competition, Choice, and Incentives in Government Programs** Albert Morales, John M. Kamensky, 2006 Since the 1980s the language used around market based government has muddled its meaning and polarized its proponents and critics making the topic politicized and controversial *Competition Choice and Incentives in Government Programs* hopes to reframe competing views of market based government so it is seen not as an ideology but rather as a fact based set of approaches for managing government services and programs more efficiently and effectively *New Ways of Doing Business* Mark A. Abramson, Ann M. Kieffaber, 2003-08-04 In their introduction the editors of *New Ways of Doing Business*

assert that in retrospect it will be apparent that today's government that of the early years of the 21st century was undergoing its most significant transformation since the decade of the 1930s when direct government delivered services grew significantly as part of the New Deal. This newest volume in the IBM Endowment for the Business of Government series is an invaluable guide to navigating the sometimes controversial changes taking place in the internal operations of government: the delivery of services to citizens and the delivery of environmental programs. Possibly the most monumental change taking place in our modern government is the lessening allegiance to the old model of in-house or departmental performance of tasks. The new model asks how and by whom can the tasks of government best be performed. The answer sometimes lies with another inter-governmental department leading to an in-house atmosphere of healthy competition and entrepreneurship and sometimes with outside contractors. *New Ways of Doing Business* provides descriptions and guidelines for successfully navigating management under the new model. There are also dramatic new ways in which services to the public can now be delivered via the Internet via contracts with private organizations and via faith-based initiatives and business improvement districts. Experts provide valuable checklists and guidelines and case studies exploring the merits and disadvantages of these new service delivery routes. Finally, *New Ways of Doing Business* explores what the editors call one of the most highly experimental policy arenas in government: that of the delivery of environmental programs. The authors of these articles explain via case study analysis many of the innovative programs currently in existence and postulate that the traditional command and control stance of government to businesses will be superseded by a flexibility that will allow for increased eco-efficiency and attention to market-based regulatory tools.

Food Policy Tim Lang, David Barling, Martin Caraher, 2009-03-19. For over half a century food policy has mapped a path for progress based upon a belief that the right mix of investment, scientific input and human skills could unleash a surge in productive capacity which would resolve humanity's food-related health and welfare problems. It assumed that more food would yield greater health and happiness by driving down prices, increasing availability and feeding more mouths. In the 21st century this policy mix is quietly becoming unstuck. In a world marred by obesity alongside malnutrition, climate change alongside fuel and energy crises, water stress alongside more mouths to feed and social inequalities alongside unprecedented accumulation of wealth, the old rubric of food policy needs re-evaluation. This book explores the enormity of what the new policy mix must address, taking the approach that food policy must be inextricably linked with public health, environmental damage and social inequalities to be effective. Written by three authors with differing backgrounds: one in political science, another in environmental health and health promotion and the third in social psychology, this book reflects the myriad of perspectives essential to a comprehensive view of modern food policy. It attempts to make sense of what is meant by food policy, explores whether the term has any currency in current policy discourse, assesses whether current policies help or hinder, what happens, judges whether consensus can triumph in the face of competing bids for understanding, looks at all levels of governance across the range of actors in the food system from

companies and the state to civil society and science considers what direction food policies are taking not just in the UK but internationally assesses who and what gains or loses in the making of these food policies and identifies a modern framework for judging how good or limited processes of policy making are This book provides a major comprehensive review of current and past food policy thinking and proposing the need for what the authors call an ecological public health approach to food policy Nothing less will be fit for the 21st century

Achieving Sustainable Development Hans T. Bressers, Walter A. Rosenbaum, 2003-12-30 Bressers Rosenbaum and their contributors analyze what until recently has been among the least examined issues implicit in the growing global discourse about sustainable development the creation of institutions and processes for effective governance of sustainability policies The creation and endurance of governance institutions capable of implementing sustainability policies is in fact fundamental for any viable conception of sustainable development The analyses focus not only on how societies can organize but on how they do organize to overcome such daunting obstacles in the Netherlands the Northwest United States Costa Rica Madagascar Senegal and the European Union The writers focus particularly upon the special problem embedded in the sustainability paradigm that of organizing governance across scales that is to say across and between geographic political ecological or other social levels in a sustainable regime In recent years the scale problem has emerged as a major and enlarging concern as international efforts proliferate to implement various sorts of sustainability policies The analyses focus not only on how societies can organize but on how they do organize to overcome such daunting obstacles The analyses place considerable emphasis upon the history and lessons to be learned from ongoing efforts to achieve such governance in several diverse international settings including the Netherlands the Northwest United States Costa Rica Madagascar Senegal and the European Union

International Policy Studies Stuart S. Nagel, David Rosenblum, 2000 The basic elements of this book involve integrating five policy problems and four fields of knowledge The five policy problems are economic technology social political and legal The four developing regions are Africa Asia Eastern Europe and Latin America The four fields of knowledge are natural science social science humanities and law

Managing Common Pool Groundwater Resources Mary Brentwood, Stephen Robar, 2004-03-30 Worldwide developed and developing countries increasingly depend on groundwater resources for domestic water supply Since groundwater is a hidden resource and individuals cannot see how much has been used and what is left this book attempts to make global groundwater use more visible so that policy makers can make informed decisions as to its management Organized into six geographical regions the authors describe the various physical cultural and institutional challenges of groundwater policy and management faced by countries worldwide Analysis of the challenges and responses to groundwater management at the national level hopes to generate a broader understanding for societies across the globe Each chapter provides the physical geography and demographics of the country its water use problems law politics and policy and future implications Chapters on representative countries within North America Western and Eastern Europe the Middle East Australia and China and

Africa provide a comprehensive perspective of groundwater issues internationally Nature's Experts Stephen Bocking, 2004 Annotation Explores the contributions and challenges presented when scientific authority enters the realm of environmental affairs Practical examples and case studies illustrate that science must be relevant credible and democratic

Sustainability, Growth, and Globalization Richard A. Diem, James E. Davis, 2013-04-01 Over the past decade the notion of sustainability has emerged as a precept that has been applied to government commerce the environment and technology This volume will discuss how sustainability is reflected in economics political science and geography through the lens of socio economic change and globalization through theoretical and real world perspectives Using the Costa Rican Cloud Forest community of Monteverde readers will be able to understand how the notion of sustainability has been applied in a community context whose experiences have global implications **Understanding Environmental Policy** Steven

Cohen, 2006-06-06 In *Understanding Environmental Policy* Steven Cohen introduces an innovative multidimensional framework for developing effective environmental policy within the United States and around the world He demonstrates his approach through an analysis of four case studies representing current local national and international environmental challenges New York City's garbage crisis the problem of leaks from underground storage units toxic waste contamination and the Superfund program and global climate change He analyzes the political scientific technological organizational and moral import of these environmental issues and the nature of the policy surrounding them He also places a specific focus on the response from the George W Bush administration Cohen considers how our current environmental policy and problems reflect the value we place on our ecosystems whether science and technology can solve the environmental problems they create and what policy is necessary to reduce environmentally damaging behaviors Cohen's multifaceted approach is essential reading for analysts managers activists students and scholars of environmental policy *International Security,*

Peace, Development and Environment - Volume I Ursula Oswald Spring, 2009-08-30 *International Security Peace Development and Environment* is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on International Security Peace Development and Environment deals in seven parts and two volumes with a myriad of issues of great relevance to our world such as human social gender and environmental security the transition in earth history from the holocene to the anthropocene potentially causing disasters and increasing resource scarcity limits to growth use of natural resources sustainable livelihood and productive system through technology rise of conflicts due to scarce and polluted resources and the concentration of humans in limited spaces of big cities the gender violence peace education and peace teaching as mechanisms to strengthen citizenship and to improve the understanding of cultural diversity mechanisms to strengthen the resistance against monopolist interests in the present global world and whistle blowing as a phenomenon to protect social peace and civil resistance The presentation culminates with a discussion on the means of active nonviolence to

reinforce democratic behavior and to reduce tensions and violent outcomes in a complex world These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

The Politics of the Environment Neil

Carter,2001-11-29 The rising profile of the environment in politics reflects growing public concern that we may be facing a large scale ecological crisis This unique textbook surveys the politics of the environment providing a comprehensive and comparative introduction to ideas activism and policy Part One explores environmental philosophy and green political thought assessing the relationship between green ideas and other political doctrines Part Two considers parties and movements including the development of green parties from protest parties the response of established political parties to the environmental challenge and the evolution of the environmental movement Part Three analyses public policy making and environmental issues at the international national and local levels As well as considering a wide variety of examples from around the world this important new textbook includes glossary lists of key issues chapter summaries and guides to further study

The Oxford Handbook of U.S. Environmental Policy Sheldon Kamieniecki,Michael Kraft,2013 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy will be a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world s leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book will therefore focus not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only grow in importance in the coming years and this will serve as an authoritative guide to any scholar interested in the issue

Class, Power and the State in Capitalist Society P. Wetherly,C. Barrow,P. Burnham,2007-12-14 This collection of new essays re examines and evaluates central themes in the work of Ralph Miliband a leading contributor to Marxist political theory in twentieth century It provides an essential reference point for research within the Marxist tradition and a valuable resource for students on a range of courses in political and social theory

Sustaining the Forests of the Pacific Coast

Debra Salazar, Donald K. Alper, 2011-11-01 Forests define the Pacific Coast in many ways Culturally they are part of the traditions of the First Nations economically they have sustained an industry that has created settlements and wealth throughout the area In the last twenty years the forests have become the subject of increasing conflict as economic interests clash with changing social and political values The war in the woods has escalated hardening battle lines and polarizing forest politics In this thoughtful collection of essays edited by Debra J Salazar and Donald K Alper forest policy in the U S Pacific Northwest and British Columbia is examined in a binational context While US and Canadian forest policy and forest management approaches differ the two countries face similar challenges and conflicts Contributors discuss the evolution of forest exploitation the response of timber companies to U S federal environmental regulations sovereignty for First Nations communities and the reshaping of the political economy of forests by global forces on both sides of the border Groups usually ignored in the forest policy debate such as First Nations peoples workers in the emerging non forest economy and citizen activists are also given voice in this fascinating compilation The contributors to Sustaining the Forests of the Pacific Coast offer new perspectives that recognize the complexity of the issues and the diversity of interests in forest politics A valuable contribution to the ongoing debate over forest policy on both sides of the Canada U S border these essays analyze the challenges facing forest policy makers and open the discussion up to those whose voices have not been heard before **The State of the Earth** Paul K. Conkin, 2006-12-15 An assessment of where we are where we re headed and what we need to do before it s too late Instructive well researched and easy to read John T Ackerman Strategic Studies Quarterly This era of staggering scientific and technological innovations with major changes in agriculture manufacturing commerce and communications seems to document unparalleled human achievement Yet when we examine the long term implications it becomes clear that the delicate environmental balance that sustains life on this planet is under serious threat and the past century may be remembered not as a period of great progress but as one marked by unrestrained consumption and failure to come close to a sustainable use of the earth s limited natural resources In The State of the Earth noted historian Paul K Conkin provides a comprehensive analysis of the many environmental hazards that humans must face in this still young century Our activities have threatened the survival of many plants and animals created scarcities in cultivatable soils and water needed for irrigation used up a large share of fossil fuels polluted air and water and most likely created conditions that will lead to devastating climate changes This is an invaluable resource for those who desire a broad yet thorough and scientifically informed introduction to present environmental challenges *Thinking About the Environment* Matthew Alan Cahn, Rory O'Brien, 2015-02-24 Underlying current controversies about environmental regulation are shared concerns divided interests and different ways of thinking about the earth and our proper relationship to it This book brings together writings on nature and environment that illuminate thought and action in this realm

Flashpoints In Environmental Policymaking Book Review: Unveiling the Magic of Language

In an electronic era where connections and knowledge reign supreme, the enchanting power of language has become much more apparent than ever. Its ability to stir emotions, provoke thought, and instigate transformation is really remarkable. This extraordinary book, aptly titled "**Flashpoints In Environmental Policymaking**," published by a very acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound impact on our existence. Throughout this critique, we will delve to the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
