Communication Skills for Effective Management Owen Hargie,David Dickson,Dennis Tourish,2017-03-14 It is now widely recognized that communication is at the very heart of effective management There is therefore an ever expanding demand for valid and generalizable information on how best to relate to people in organizational contexts Communication Skills for

Effective Management meets this demand. It demonstrates how for managers to be successful they need to employ a range of key communication skills, styles and strategies. The contents are based upon the authors' considerable experiences of researching, teaching and consulting in a range of private and public sector organisations. From their academic and real world involvement, they have identified the core skills of effective management, presented in an academically rigorous yet student friendly way. The reader is encouraged to interact with the material covered. Each chapter contains a series of boxed text, diagrams, tables and illustrations which summarise core points. Exercises are also provided to enable managers to put the material reviewed into practice. All of this is underpinned and supported by a firm foundation of research findings. This will be an excellent text for undergraduate business and management students studying business communication and MBA students. Practising managers will also find this book to be an invaluable resource.

**A Manager's Guide to Human Behavior, Fifth Edition** Matthew Reis, Judith B. Geller, 2010. Understanding how and why employees behave as they do is a critical skill for managers in every organization. Managers are responsible for ensuring that the organization's mission and strategic goals are enacted, so it is of the utmost importance they know how to motivate and engage employees. This updated and revised edition of *A Manager's Guide to Human Behavior* will prepare managers to better understand, motivate and focus the energies of individual employees and the collective energy of their work teams. Building on the content in the fourth edition, this updated course reexamines key theories and focuses on their practical application to typical management situations. New topics in this edition include learning organizations and open systems as a context for understanding how individuals contribute to organizational effectiveness, self-awareness, Goleman's emotional intelligence and Bridges' transitions model of change. The performance management section has been enhanced with a simplified process model: define, develop, review and reward, and the section on leadership examines the concept of the versatile leader who engages the spirit, head, heart and hands of employees. Throughout the course, self-assessments, worksheets, checklists and questionnaires give students the opportunity to apply what they are learning. Each chapter incorporates an action plan tied to the objectives and competencies for the topic area. Short case studies enable students to apply their new knowledge to analyze, understand and influence human behavior.
