School Management and Effectiveness in Developing Countries Clive Harber, Lynn Davies, 2006-02-08 This book is quite different from existing Western books on school effectiveness It describes and analyses the way in which schools operate in developing countries and also tries to explain why they are as they are Examining them at three levels the macro the meso and the micro the authors use a theoretical framework that they have termed post bureaucracy The book has four interlinked sections First the authors examine the existing economic and theoretical contexts around school effectiveness including an analysis of the causes of economic crisis and its impact on school management In the second section the analysis of schools as bureaucratic facades is proposed The reality of school life from which any theory of school effectiveness must derive is illustrated by an ethnographic account of the job of the headteacher in developing countries The third section explores different ways to understand this reality operating on three levels global relationships national and community cultures and individual agency In the final section Harber and Davies draw these levels and realities together They argue for the democratization of schools as the only way forward for effective education for development

International Handbook of School Effectiveness and Improvement Tony Townsend,2007-09-21 This book reviews of the development implementation and practice of the disciplines of school effectiveness and school improvement Seven main topics are addressed History of the school effectiveness movement over the last 25 years Changes in accountability and standards Leadership in school effectiveness Changes in teacher education Impact of Diverse Populations Education Funding and its Impact and Best Practice Case Studies The contributors are active in school effectiveness research worldwide The Progressive Education Fallacy in Developing Countries Gerard Guthrie,2011-06-23 This book provides a provocative but carefully argued addition to the theory and practice of education in developing countries The book provides an ethical and empirical justification for support of formalistic teaching in primary and secondary schools in developing countries It also refutes the application of progressive education principles to curriculum and pre and in service teacher education in such contexts The central focus of this book is the formalistic teaching prevalent in the classrooms of many developing countries Formalistic teacher centred traditional didactic pedagogic teaching is appropriate in the many countries with revelatory epistemologies unpopular and old fashioned though these methods may seem in some western especially Anglophone ones Formalism has been the object of many failed progressive curriculum and teacher education reforms in developing countries for some 50 years School Effectiveness for Whom? Roger Slee,Sally Tomlinson,Gaby Weiner,2003-05-20 School effectiveness research together with what is now described as the school improvement movement Barber 1996 has captured both the Conservative and New Labour imaginations as a basis for educational planning and policy making in the UK Internationally school effectiveness enjoys an expanding and enthusiastic audience This book provides a critique of this

research genre particularly in the light of the recent calls for teaching to go back to the basics The editors argue that this school effectiveness research is simplistic in its analysis of educational problems Far from getting to the bottom of the problem of failing students and schools they argue these movements are merely scratching at the surface of the problems and coming up with notions for superficial improvements *School Effectiveness, School Improvement* David Reynolds,2004-11-01 The pressure on schools to improve and to raise achievement continues to be a dominant issue in both school and government policies School Effectiveness and School Improvement seeks to develop the debate further providing academics and practitioners alike with a summary and discussion of research on school effectiveness and school improvement up to the present new perspectives on these fields developed from other traditions of thinking and research a consideration of the role of organization theory an integrated view of these current perspectives and clear practical implications for policy and practice Effective School Librarianship Patrick Lo,Heather Rogers,Dickson K.W. Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way

Schools, Classrooms, and Pupils Stephen W. Raudenbush, J. Douglas Willms, 2014-05-10 Schools Classrooms and Pupils International Studies of Schooling from a Multilevel Perspective examines multilevel or hierarchical linear models of research on schooling and the statistical and computational issues that arise in applying them Some of the likely benefits of using multilevel methods to study schools and classrooms are also discussed including the increased credibility of the statistical findings Comprised of 15 chapters this book begins by considering how the explicit modeling of the organizational structure of schooling creates new opportunities for research After presenting a basic guide to the techniques of multilevel modeling the effect of school class and individual variables on science achievement in Israeli elementary schools is analyzed using a two level hierarchical model with emphasis on reform in the science curriculum which began in the early 1970s Subsequent chapters focus on the use of multilevel models to link educational progress with curriculum coverage trends in attainment in Scottish secondary schools the technical and vocational education initiative in Britain and sex discrimination in teachers salary This monograph should be of considerable interest to students teachers school administrators researchers and educational policymakers

Educational Evaluation, Assessment and Monitoring Cees Glas, Jaap Scheerens, Sally M. Thomas, 2006-01-16 This book looks at the foundations of school self evaluation from a scientific as from a practical perspective Planning concepts restructuring of education systems organizational theory on schools evaluation methodology and models of school effectiveness and school improvement are discussed as contributing to the overall conceptualization of school self evaluation A broad range of approaches is presented and methodological requirements are discussed School self evaluation contains controversial issues that reflect tension between the need for objectivity in a context that is permeated by values and potential conflicts of interests Similar tensions may be seen to exist with respect to the static and reductionist aspects of available data collection procedures in a complex and dynamic situation and the appeal for external accountability on the one hand and improvement oriented self reflection on the other The mission of the book is to clarify these tensions and offer ways to deal with them in practical applications The school effectiveness knowledge base is offered as a substantive educational frame of references that serves an important function in selecting relevant factors for data collection and the use of the evaluation results

The State And The School John Turner, 2003-12-16 There was once agreement that education was too important to be left to politicians now the view is that education is too important to be left to teachers Whereas the curriculum and syllabus were previously the concern of the professionals the government now distrusts these professionals This has resulted in the Secretary for State assuming massive powers in a series of Education Acts and there is now a national curriculum which intrudes into the fine details of the syllabus Equally the twin concepts of accountability and cost effectiveness are now as common in discussions about education as they are in discussions on industry and commerce These trends however are not restricted to any level of education or to any one country They are as widespread in the great universities as they are in primary schools and they are on the agenda not only in Britain and Europe but in Australia the US and virtually every country in the developed and developing world With this in mind this book examines the role of the state in education in many different countries and cultures
