Egyptian Warfare Omar Khalil, In the earliest periods of Ancient Egypt military organization was relatively simplistic reflecting the needs of a society transitioning from small independent communities to a unified state During the Predynastic and Early Dynastic periods military efforts were often led by local chieftains or emerging kings whose power was consolidated through the control of small regional armies These early forces primarily consisted of able bodied men called upon when conflicts arose rather than a standing army The unification of Upper and Lower Egypt under King Narmer marked a significant turning point in the military structure With this unification came the need for more organized military strategies to maintain control over the expansive territories The pharaoh regarded as both a political and military leader played a central role in directing military campaigns and defending borders Early depictions on palettes and reliefs show the pharaoh as a warrior symbolizing strength and divine authority in battle This image was crucial in asserting dominance and maintaining internal order Weapons used during this time were relatively basic often crafted from stone wood and copper Warriors wielded maces spears and simple bows which were effective in close combat and hunting but limited in more advanced warfare Shields made from animal hides provided some defense but armor was scarce as mobility remained more valued than heavy protection Chariots which would later become integral to Egyptian military prowess had not yet been introduced and combat primarily involved foot soldiers engaging in skirmishes

Origins of the Just War Rory Cox,2023-10-31 As two of the fundamental social forces that shape human life war posing the greatest existential threat to communities and justice being the principle that makes complex communal life possible in the first place the relationship between war and justice is crucial to understanding the development of Western civilization The central argument of this book is that theories of justified violence were not created ex nihilo as exercises in abstract ethical reasoning but rather emerged as a result of communities responding to the reality of war Communities developed concepts of normative warfare from a desire to legitimate and to control armed conflicts in which they consistently engaged Scholars have repeatedly overlooked the very simple fact that war predates just war doctrine and that early archaeological and textual evidence indicates that ancient societies were more inclined to glorify warfare than to condemn it It is the contention of this study therefore that the presumption of war is the essential characteristic and common denominator of the just war tradition Underscored by this compelling thesis the book will demonstrate that over the course of three millennia Western societies displayed a remarkable degree of affinity in their attitudes to the relationship between war and justice
