Race, Romanticism, and the Atlantic Paul Youngquist, 2016-05-23 In highlighting the crucial contributions of diasporic people to British cultural production this important collection defamiliarizes prevailing descriptions of Romanticism as the expression of a national character or culture The contributors approach the period from the perspective of the Atlantic maritime economy making a strong case for viewing British Romanticism as the effect of myriad economic and cultural exchanges occurring throughout a circum Atlantic world driven by an insatiable hunger for sugar and slaves Typically taken for granted the material contributions of slaves sailors and servants shaped Romanticism both in spite of and because of the severe conditions they experienced throughout the Atlantic world The essays range from Sierra Leone to Jamaica to Nova Scotia to the metropole examining not only the desperate circumstances of diasporic peoples but also the extraordinary force of their creativity and resistance Of particular importance is the emergence of race as a category of identity class and containment Race

Romanticism and the Atlantic explores that process both economically and theoretically showing how race ensures the persistence of servitude after abolition At the same time the collection never loses sight of the extraordinary contributions diasporic peoples made to British culture during the Romantic era **Circulation and Control** Marie-Stéphanie Delamaire, Will Slauter, 2021-10-08 The nineteenth century witnessed a series of revolutions in the production and circulation of images From lithographs and engraved reproductions of paintings to daguerreotypes stereoscopic views and mass produced sculptures works of visual art became available in a wider range of media than ever before But the circulation and reproduction of artworks also raised new questions about the legal rights of painters sculptors engravers photographers architects collectors publishers and subjects of representation such as sitters in paintings or photographs Copyright and patent laws tussled with informal cultural norms and business strategies as individuals and groups attempted to exert some degree of control over these visual creations With contributions by art historians legal scholars historians of publishing and specialists of painting photography sculpture and graphic arts this rich collection of essays explores the relationship between intellectual property laws and the cultural economic and technological factors that transformed the pictorial landscape during the nineteenth century This book will be valuable reading for historians of art and visual culture legal scholars who work on the history of copyright and patent law and literary scholars and historians who work in the field of book history It will also resonate with anyone interested in current debates about the circulation and control of images in our digital age
