Edwardian Christmas:

Reimagining Dinosaurs in Late Victorian and Edwardian Literature Richard Fallon, 2021-11-04 When the term dinosaur was coined in 1842 it referred to fragmentary British fossils. In subsequent decades American discoveries including Brontosaurus and Triceratops proved that these so-called terrible lizards were in fact hardly lizards at all. By the 1910s dinosaur was a household word. Reimagining Dinosaurs in Late Victorian and Edwardian Literature approaches the hitherto unexplored fiction and popular journalism that made this scientific term a meaningful one to huge transatlantic readerships. Unlike previous scholars who have focused on displays in American museums, Richard Fallon argues that literature was critical in turning these extinct creatures into cultural icons. Popular authors skilfully related dinosaurs to wider concerns about empire, progress and faith. Some of the most prominent like Arthur Conan Doyle and Henry Neville Hutchinson also disparaged elite scientists, undermining distinctions between scientific and imaginative writing. The rise of the dinosaurs thus accompanied fascinating transatlantic controversies about scientific authority.

Women, Art and Money in Late Victorian and Edwardian England Maria Quirk, 2019-05-16 Women, Art and Money in England establishes the importance of women artists' commercial dealings to their professional identities and reputations in the late nineteenth and early twentieth centuries. Grounded in economic, social and art history, the book draws on and synthesises data from a broad range of documentary and archival sources to present a comprehensive history of women artists' professional status and business relationships within the complex and changing art market of late Victorian England. By providing new insights into the routines and incomes of women artists and the spaces where they created, exhibited and sold their art, this book challenges established ideas about what women had to do to be considered professional artists. More important than a Royal Academy education or membership to exhibiting societies was a woman's ability to sell her work. This meant that women had strong incentive to paint in saleable popular and middlebrow genres which reinforced prejudices towards women's naturally inferior artistic ability, prejudices that continued far into the twentieth century. From shining a light on the difficult-to-trace pecuniary arrangements of little-researched artists like Ethel Mortlock to offering new and direct comparisons between the incomes earned by male and female artists and the genres, commissions and exhibitions that earned women the most money, Women, Art and Money is a timely contribution to the history of women's working lives that is relevant to a number of scholarly disciplines.
