Wolfe, 2008-03-04 Tom Wolfe at his very best The New York Times Book Review The Right Stuff is the basis for the 1983 Oscar Award winning film of the same name and the 8 part Disney TV mini series From America s nerviest journalist Newsweek a breath taking epic a magnificent adventure story and an investigation into the true heroism and courage of the first Americans to conquer space Millions of words have poured forth about man s trip to the moon but until now few people have had a sense of the most engrossing side of the adventure namely what went on in the minds of the astronauts themselves in space on the moon and even during certain odysseys on earth It is this the inner life of the astronauts that Tom Wolfe describes with his almost uncanny empathetic powers that made The Right Stuff a classic **History's Greatest**

One Giant Leap Leon Wagener,2005-01-01 On July 20 1969 the whole world stopped It was a day in which a man who grew up on a farm without electricity would announce One small step for man one giant leap for mankind In this the first ever biography of Neil Armstrong Leon Wagener explores the man whose walk on the moon is still compared to humankind s progenitor s crawl out of the primordial ooze And whose retreat back to a farm in his native Ohio soon after the last ticker tape confetti fell has left him looked upon as a reclusive hermit ever since This is the true story of a national hero whose life long quest to walk on the moon truly mirrors our best selves an American who braved incredible danger daily over a long career finally achieving what seemed impossible and broke free of the Earth s surly bonds proving forever that man can reach for the stars and succeed Relying on hundreds of interviews with family and friends of the astronaut plus generous access to the NASA files

First Man James R. Hansen, 2012-11-27 On July 20, 1969, the world stood still to watch American astronaut Neil A. Armstrong become the first person ever to step on the surface of another heavenly body. Upon his return to Earth, Armstrong was celebrated for his monumental achievement. He was also, as NASA historian Hansen reveals in this authorized biography, misunderstood. Armstrong's accomplishments as an engineer, a test pilot, and an astronaut have long been a matter of record, but Hansen's access to private documents and unpublished sources and his interviews with more than 125 subjects, including more than fifty hours with Armstrong himself, yield the first in-depth analysis of this elusive, reluctant hero.

The 1960s on Film Jim Willis, Mark Miller, 2021-10-11 *The 1960s on Film* tells the narrative of the 1960s through the lens of the movie camera, analyzing 10 films that focus on the people, events, and issues of the decade. Films create both an impression of and, at times, for younger audiences, a primary definition of events, people, and issues of an era. *The 1960s on Film* examines the 1960s as the decade was presented in ten films that focused on that decade. This book analyzes both what the films have to say about the era and how close they come to accurately depicting it. For example, films such as *Mississippi Burning* and *Selma* tell the story of racial conflict and hope for reconciliation in the 1960s. Other films such as *The Right Stuff* and *Hidden Figures* show the deep fascination America had at that time with the burgeoning space program and NASA, while *Easy Rider* analyzes the role of rock music and drugs among young people of the decade. *The Deer Hunter* studies the controversies surrounding the war in Vietnam.

Into That Silent Sea Francis French, Colin Burgess, 2007 A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles.

Answers Alan Kohls, 2015-07-31 Who is Andrew Elric and what's he doing here? Says he's here with answers. As Andrew would explain it: We live our lives shrouded with mysteries. We're compelled to show faith in explanations that we really don't believe in: the origins of our being, the nature and existence of God, are we alone in the universe? Less weighty issues as well as stuff we'd just like to know: who really shot Kennedy? What happened to Jimmy Hoffa? You think about it and know there really are answers to all of it, but you don't have access to them. I've got those answers, and more importantly, proof for all of it. Some of it you can hold in your hand. You follow the news; you know this place is going to blow. I'm here to try and stop it. Religion, race, nationalism. We all come from the same place. But the world has suffered through too many charlatans and false prophets. I'm going to use these proofs to get you savages to settle down. Andrew has recruited renowned attorney, author, and sports agent Aron Samuelson to help him get the word out. Aron, in the throes of a midlife crisis, is looking for the next big thing in his life. As they say, be careful what you wish for.

The Unified Operations of the Human Soul Jeffrey C. Waddington, 2015-07-24 This book endeavors to examine and critically assess the theological anthropology of Jonathan Edwards with a view to considering how this anthropology coheres with his apologetic methodology Specifically the question has been raised whether Edwards doctrine of man is consistent with the picture painted of Jonathan Edwards by John Gerstner that he was the epitome of the classical apologist It is argued that Edwards practiced an eclectic apologetic sans apologetic self awareness In other words Edwards was a child of his training and time
