Management Thomas Rolf,2004-01-30 Inhaltsangabe Abstract The submitted dissertation critically discusses business
models in the context of customer dimensions under uncertain market conditions The following questions summarise the
fields of investigation How do business models adapt to rapidly changing and buyer driven markets What are the next two
steps after Customer Relationship Management Can the gap in the process chain between Customer Relation Management
and Supply Chain Management be bridged and how How can a method be developed in order to measure the current
customer orientation of a company and to compare companies among each other Are customer oriented companies more
profitable As a deductive research approach is used beneath a small number of inductive elements an investigation in both
secondary and primary data is imperative Subsequently a critical review of related literature along with a supporting inquiry
is part of the dissertation The scope of the work includes background information the discussion of future business models as
well as an empiric impression of customer orientation in German small and medium sized enterprises The most significant
conclusions can be recapitulated as follows Simple customer orientation can lead to less innovation furthermore to
unprofitable business and in the worst case to the elimination of a company Customer oriented strategy is about building
processes that are able to react to any environmental or economical modification as fast as possible The evolution of
Customer Relation Management will lead to new customer driven and pulled business models including innovative
measurement methods like Return on Customer The gap between Customer Relation Management and Supply Chain
Management will in all probability be bridged new concepts e g Customer Chain Management will represent this task A
balanced Customer Centric Index developed as a benchmark instrument as part of the dissertation shows that only a third of
the examined companies can be interpreted as customer oriented on the other hand Sales Marketing is regarded as the
initial and most influencing process A statistical connection between being customer oriented and profit could not be proved
As a surprising and unintentional result the survey revealed that focusing on a small market niche is at least for SME a more
profitable business Eventually the dissertation leaves behind additional questions that could not be *Public Service*
