Efficiency-improving Innovations in Social Care of the Elderly Ewan Ferlie, David Challis, Bleddyn Davies, 1989

Performance Indicators in Social Care for Older People David Challis, Paul Clarkson, 2017-03-02 The growing focus on performance review and monitoring means that awareness and use of performance indicators has increased throughout a number of public services. Set within a national context, this book reviews the historical development and measurement issues of performance indicators within social care and the public sector for older people. It then provides an approach to effective local performance measurement in services for older people and an organizing framework within which organizations can arrange their performance appraisal for older people's services. The development of performance review in social care of older people is examined, as is the process of developing local performance measures and engaging staff in enquiry and quality management. The book also reviews the process of developing performance indicators and their utilization at an agency level. Performance Indicators in Social Care for Older People will be of particular interest in the UK for local service providers who are developing approaches for local performance review. It will also be of interest internationally, especially in countries where services for older people are currently developing in a similar direction.

Equity and Efficiency Policy in Community Care Bleddyn Davies, José Fernández, 2018-02-06 This title was first published in 2000. Equity and Efficiency Policy provides a completely new perspective on post-reform community care, analyzes its fairness, effectiveness, and efficiency in a new way, and uses its powerful new techniques applied to a major national collection of evidence to suggest how to develop the Modernization Agenda. It describes for the first time how differences in the levels of each of the main services alone and in combination affect a wide range of user and carer benefits, uses this knowledge to analyze in a new way, and make policy proposals about some of the pressing policy issues of the government's Modernization Agenda.

Voluntary Organizations and Innovation in Public Services Stephen P. Osborne, 2013-01-11 The innovative capacity of voluntary organizations has become a touchstone for their role in providing public services. Across the world, there are increasing pressures on voluntary organizations to improve the quality and effectiveness of public services through innovation and change. This volume uses original research to assess the innovative capacity of voluntary organizations. It provides a conceptual framework for understanding the innovative capacity of voluntary organizations, empirical evidence detailing the nature and extent of innovation, an analysis of successful innovators in personal social services, the applicability of the for-profit model of innovation to non-profit organizations, an account of the contingent nature of voluntary organizations' relationship to their external environment and particularly their main funders. The development of a theory of innovation in non-market and non-profit conditions makes this volume an important addition to organizational studies literature.
