The Academy, 1894 **The Academy and Literature** Charles Edward Cutts Birch Appleton, Charles Edward Doble, James Sutherland Cotton, Charles Lewis Hind, William Teignmouth Shore, Alfred Bruce Douglas, Ellis Ashmead-Bartlett, Thomas William Hodgson Crosland, 1894 *The Fundamental Principles of Old and New World Civilizations* Zelia Nuttall, 1901 ANCIENT EGYPT, JERUSALEM AND THE STARS ARCHAEOASTRONOMICAL EVIDENCE OF A SECRET SACRED ASTRONOMY GIACOMO ALBANO, 2023-02-25 Examining the astronomical alignments of the main Egyptian monuments the author shows that almost none of them is oriented to the rise or set of Sirius or Orion at the time of construction How is it possible The reader will discover that in reality all are oriented in some way to the rising points of the stars of Orion or Sirius when they were in the extreme phases of their cycle Since there is not only one of the most important Egyptian monuments that escapes this rule of orientation it is evident that it was the true secret technique behind these choices Being a specialist in stellar astrology in the last part of the book the author shows how these stellar mechanisms have worked well beyond the field of Archaeoastronomy He illustrates the most important encadrement by declination active for thousands of years and still active involving some of the brightest stars in the firmament We will see how and why Giza and Jerusalem been the places where it has most strongly manifested the greatest effects in the field of sacred and religions albeit in different ways and for different reasons The truth is that the Sacred Astronomy practiced by the Egyptians is completely unknown to contemporary scholars Moreover it was not a simple belief or superstition of that people It is the Supreme Science that describes how the cosmos really works and not only for the events of sacred history The Egyptian priests and initiates probably derived this knowledge from a tradition dating back to the dawn of time Since these stellar configurations regulate not only the most important events of sacred and prophane history but also the places the events that occur their knowledge may open new scenarios for human knowledge far superior and far more radical of the much acclaimed scientific discoveries that are not able to identify the primary and occult causes of events nor to reveal the Mystery that surrounds our existence **The Dawn of Astronomy** J. Norman Lockyer, 2006-04-28 A pioneer in the fields of astrophysics and astro archeology J Norman Lockyer believed that ancient Egyptian monuments were constructed in strict relation to the stars In this celebrated study he explores the relationship between astronomy and architecture in the age of the pharaohs Lockyer addresses one of the many points already extensively investigated by Egyptologists the chronology of the kings of Egypt All experts are in accord regarding the identity of the first monarch but they cannot agree upon the dates of his reign within a thousand years The author contends that by applying a knowledge of astronomy to the actual site orientation of the region s pyramids and temples accurate dating can be achieved In order to accomplish this Lockyer had to determine the level of the ancient Egyptian ideas of astronomy Some of his inferences have been invalidated by subsequent scholarship but many of his other conclusions stand firm and continue to provide sensational leads into contemporary
