that the Egyptians felt for their dog companions The first named dog lover in history was the earliest known queen Herneith who was buried with her hound at Saqqara Dogs and other canines also played their roles in the rich pantheon of ancient Egyptian religion figuring as semi divine messengers between the worlds of the living and the dead Perhaps the most familiar such deity is the sleek black jackal headed god Anubis guardian of the Necropolis and attendant of the underworld Swifter than the Arrow also examines the evidence that hounds living today most notably modern breeds such as the so called Pharaoh Hound are directly descended from the Egyptian hound It reveals remarkable information about the ancestry of the hounds of the Mediterranean islands that unmistakably share the appearance and character of the dogs that once raced across the Egyptian deserts This unique book throws fresh light on our understanding of ancient Egypt while providing a completely fresh insight into the development of mankind s remarkable bond with the domesticated dog The Riddle of

The Geologic Model of Religion Andrew Clifford,2012-07-17 Men are haunted by the vastness of eternity The opening line of the film Troy captures the tragic essence of personal mortality ones passing into oblivion and fading from all memory Since the prehistoric dawn of humanity death has shadowed everyone s footsteps Even into the current scientific era religion has long been the only defense The sole comfort against oblivion offering a promise of new life or even immortality The Geologic Model of Religion is a sympathetic study of this defense from its ancient beginnings drawing upon archaeology anthropology and comparative religion to clearly explain one of the most complex subjects known From the study a new model emerges which Decomposes religion into its distinct worldview and afterlife paradigms Categorizes evidence of belief systems held by prehistoric hunter gatherers culminating in the Temples of Rebirth such as Gobekli Tepe Concludes that spirituality began in the Fertile Crescent 11 000 years ago spreading with the Neolithic revolution throughout the world Shows why judgment in afterlife was the keystone in the emerging edifice of civilization and how it enabled hierarchies overcoming Dunbar s number which limited village sizes Overviews the interaction between science and religion and projects the ultimate fate of religion itself There might be 100 000 books written about religion but the Geologic Model of Religion is unlike any other Drawing upon evidence from anthropology archaeology and scripture religion is divided into worldviews and afterlife paradigms This new model evidences several long lost prehistoric religious belief systems and explains the origin of spirituality in settled societies

From the Ancient Near East to Christian Byzantium Mario Baghos,2021-03-11 This book combines concepts from the history of religions with Byzantine studies in its assessments of kings symbols and cities in a diachronic and cross cultural analysis The work attests firstly that the symbolic art and architecture of ancient cities commissioned by their monarchs expressing their relationship with their gods show us that religiosity was inherent to such enterprises It also demonstrates that what transpired from the first cities in history to Byzantine Christendom is the gradual replacement of the pagan ruler cult which was inherent to city building in antiquity with the ruler becoming subordinate to Christ exemplified by representations of the latter as the Master of All Pantokrator Beginning in Mesopotamia the book continues with an analysis of city building by rulers in Egypt Greece and Rome before addressing Judaism specifically the city of Jerusalem and Christianity as shifting the emphasis away from pagan gods and rulers to monotheistic perceptions of God as elevated above worldly kings It concludes with an assessment of Christian Rome and Constantinople as typifying the evolution from the ancient and classical world to Christendom

Origins Giovanni Padrone,2021-05-12 At the end of the last glacial period about 15 000 years ago in the territories now occupied by Bonn in Northern Germany a group of humans began to select puppies from a family of dogs Probably this cubs have a certain docility and attractiveness toward their human companions but the reason why our

Shubert, Kei Yamamoto, 2021-03-20 The wish to affiliate with a specific cultural social or ethnical group is as important today as it was in past societies such as that of the ancient Egyptians The same significance applies to the self presentation of an individual within such a group Although it is inevitable that we perceive ancient cultures through the lens of our time place and value systems we can certainly try to look beyond these limitations Questions of how the ancient Egyptians saw themselves and how individuals tried to establish and thus present themselves in society are central pieces of the puzzle of how we interpret this ancient culture This volume focuses on the topic of identity and self presentation tackling the subject from many different angles the ways in which social and personal identities are constructed and maintained the manipulations of culture by individuals to reflect real or aspirational identities and the methods modern scholars use to attempt to say something about ancient persons Building on the work of Ronald J Leprohon to whom this volume is dedicated contributions in this volume present an overview of our current state of understanding of patterns of identity and self presentation in ancient Egypt The contributions approach various aspects of identity and self presentation through studies of gender literature material culture mythology names and officialdom *AEB* ,1997

Egypt's Making Michael Rice, 2004-03-01 Already a classic and widely used text this second edition has been wholly revised and updated in the light of the many discoveries made since its first publication Michael Rice's bold and original work evokes the fascination and wonder of the most ancient period of Egypt's history Covering a huge range of topics including formative influences in the political and social organization and art of Egypt the origins of kingship the age of pyramids the nature of Egypt's contact with the lands around the Arabian Gulf and the earliest identifiable developments of the historic Egyptian personality *Egypt's Making* is a scholarly yet readable and imaginative approach to this compelling ancient civilization *History Today* ,1998 *Afrikology, Philosophy and Wholeness. An Epistemology* W. Nabudere, 2011-04-11 How do we understand and create knowledge Does scientific knowledge cover all knowledge *Afrikology* tries to answer these questions by tracing the issue of epistemology to the Cradle of Humanity in Africa and through such a reflection the Monograph establishes a basis for holistic and integrated ways of knowledge production that makes it possible to interface scientific knowledge with other forms of knowledge In this way *Afrikology* responds to the crisis created by the fragmentation of knowledge through existing academic disciplines *Afrikology* therefore advances transdisciplinarity and hermeneutics to a level where they attain a coherent basis for interacting with *Afrikology* as an epistemology which returns wholeness to understanding and knowledge production *Annual Egyptological Bibliography* ,1999 **Comparative Civilizations Review** ,2002 **Journal of Roman Archaeology** ,2004 *Elenchus of Biblica* 1997 Robert Althann, 2001-12-31
