Ecology and Resource Management Kenneth E. F. Watt, 1968 Textbook *Ecology Abstracts* ,1994 **Computer Performance Evaluation** Ramon Puigjaner, Nunzio N. Savino, Bartomeu Serra, 2003-06-26 The need to evaluate computer and communication systems performance and dependability is continuously growing as a consequence of both the increasing complexity of systems and the user requirements in terms of timing behaviour The 10th International Conference on Modelling Techniques and Tools for Computer Performance Evaluation held in Palma in September 1998 was organised with the aim of creating a forum in which both theoreticians and practitioners could interchange recent techniques tools and experiences in these areas This meeting follows the predecessor conferences of this series 1984 Paris 1988 Palma 1994 Wien 1985 Sophia Antipolis 1991 Torino 1995 Heidelberg 1987 Paris 1992 Edinburgh 1997 Saint Malo The tradition of this conference series continued this year where many high quality papers were submitted The Programme Committee had a difficult task in selecting the best papers Many new papers could not be included in the program due to space constraints All accepted papers are included in this volume Also a set of submissions describing performance modelling tools was transformed into tool presentations and demonstrations A brief description of these tools is included in this volume The following table gives the overall statistics for the submissions *Quantitative Assessments of Distributed Systems* Dario Bruneo, Salvatore Distefano, 2015-04-08 Distributed systems employed in critical infrastructures must fulfill dependability timeliness and performance specifications Since these systems most often operate in an unpredictable environment their design and maintenance require quantitative evaluation of deterministic and probabilistic timed models This need gave birth to an abundant literature devoted to formal modeling languages combined with analytical and simulative solution techniques The aim of the book is to provide an overview of techniques and methodologies dealing with such specific issues in the context of distributed systems and covering aspects such as performance evaluation reliability availability energy efficiency scalability and sustainability Specifically techniques for checking and verifying if and how a distributed system satisfies the requirements as well as how to properly evaluate non functional aspects or how to optimize the overall behavior of the system are all discussed in the book The scope has been selected to provide a thorough coverage on issues models and techniques relating to validation evaluation and optimization of distributed systems The key objective of this book is to help to bridge the gaps between modeling theory and the practice in distributed systems through specific examples **Which Degree?** ,1985 *Proceedings of the Second Biennial Conference on University Education in Natural Resources* ,1998 *Monitoring Plant and Animal Populations* Caryl L. Elzinga, Daniel W. Salzer, John W. Willoughby, James P. Gibbs, 2009-05-11 Monitoring Plant and Animal Populations offers an overview of population monitoring issues that is accessible to the typical field biologist and land managers with a modest statistical background The text includes concrete guidelines for ecologists to follow to design a statistically defensible monitoring program User friendly practical guide written

in a highly readable format The authors provide an interdisciplinary scope to address the current widespread interest in monitoring in many environmental fields including pure and applied ecology conservation biology and wildlife management Emphasizes the role of monitoring in adaptive management Defines important terminology and contrasts monitoring with other data collection activities Covers the applicable principles of sampling and shows how to design a monitoring project Provides a step by step overview of the monitoring process illustrated by flow charts and references The authors also offer guidelines for analyzing and interpreting monitoring data Illustrates the foundation of management objectives and describes their components types and development Describes common field techniques for measuring important attributes of animal and plant populations Reviews different methods for recording monitoring data in the field managing the data and communicating data to policymakers
