Economic And Social Survey Of Asia And The Pacific 2005:

Economic and social survey of Asia and the Pacific, 2008, 2008 **Economic and Social Survey of Asia and the Pacific** United Nations Publications, 2016 The Survey 2014 will examine the regions challenges to support its economic growth and to promote inclusive and sustainable development Part I of the report will focus on the regions outlook as it contends with the ongoing global recovery and assesses the regions policy response to remaining and emerging vulnerabilities A special theme is domestic resource mobilization in Asia Pacific which will explore the challenges on strengthening tax revenues Part II of the report discusses strategic approaches to strengthen regional connectivity to achieve shared prosperity **Economic and Social Survey of Asia and the Pacific** United Nations. Economic and Social Commission for Asia and the Pacific, 2008 Economic and Social Survey of Asia and the Pacific 2005 United Nations. Economic and Social Commission for Asia and the Pacific, 2005 Economic and Social Survey of Asia and the Pacific 2006 United Nations. Economic and Social Commission for Asia and the Pacific, 2006 This edition of the yearly survey examines regional economic and social developments in the Asia and the Pacific region during 2005 The growth rate slowed moderately in 2005 mainly as a result of high oil prices and softening of growth in global trade For 2006 it is expected that growth maintains its current momentum providing that oil prices do not increase significantly and global external imbalances do not unwind suddenly Projects for the region would also be affected if avian influenza develops into a human pandemic Efforts are needed to ensure all benefits of high growth are passed on to the poor via good employment opportunities for all

Economic and Social Survey of Asia and the Pacific, 2015, 2015 The Survey 2015 assesses the region's outlook as it navigates through global uncertainties providing policy options and strategies to sustain inclusive and sustainable growth The report analyses a wide range of areas including economic growth inflation trade and investment financial markets inequality employment and environmental concerns The special theme of Survey 2015 argues that although rapid economic growth in the Asia Pacific region has been accompanied by significant declines in poverty rates development is about more than growth and poverty The report reviews trends and patterns of inclusive growth in the region and motivates why both the private and public sectors should do more to address existing inequalities This edition comes in two parts which will not be sold separately East Asia and the Global Crisis Shaun Breslin, 2013-09-13 This book traces the impact of the global financial crisis on East Asia and the way that key regional states responded to the crisis It considers the extent to which the region is decoupling from the global economy or the West the impact of crises on the definition of region and the effectiveness and functioning of regional institutions and governance mechanisms including environmental governance A key focus of the book is the increasing legitimacy of statist alternatives to neo liberal development strategies and modes of governance or perhaps more correctly the extent to which the legitimacy of western norms and practices have been delegitimized by the crisis This book was originally published as a special issue of Contemporary Politics **Youth, Media**

and Culture in the Asia Pacific Region Usha M. Rodrigues, Belinda Smaill, 2009-05-05 Youth Media and Culture in the Asia Pacific Region presents an analysis of youth media activities in a diverse but geographically connected Asia Pacific region. The region which is spatially connected by its colonial and imperial past is becoming a significant player in the globalized world. In this context youth situated in these economically, politically and socially structured communities are redefining their locales through their patterns of media use. The discourse of youth in this disparate region is manifest in the media through their identity articulations and social activism. The book illustrates that these youth subcultures in the Asia Pacific are part of the well marketed global consumerism culture and yet at other times independent of the commodifying impetus of global capital. It draws on case studies to examine some of the media practices youth in the region are engaged in and elucidates the process of social change taking place in some Asia Pacific nations. This book contributes to the important and growing field of youth media studies. The regionalization of media research is necessarily recuperated here bringing large populations of media users into a frame of reference that allows critical reflection on the new waves of use and sociality in the Asia Pacific region. Stephanie Hemelryk Donald, Professor of International Studies, UTS.

Economic and Environmental Impact of Free Trade in East and South East Asia Kakali Mukhopadhyay, Paul J. Thomassin, 2009-12-18 In recent years the East and South East Asian region has witnessed a rapid expansion of regional economic cooperation through bilateral and plurilateral free trade agreements. The current book attempts to comprehensively analyze the economic and environmental impacts of regional economic integration in East and South East Asia to the year 2020. This region has some of the fastest growing economies of the world. A global economic model was used to undertake the analysis. A rare feature of the book is the detailed environmental implications of the Regional Trade Agreements focusing on air, water and waste pollution. Economic integration among the East and South East Asian region has been an important agenda item for the academic and policy communities in recent years. The study provides insight into pursuing a concrete multilateral trade liberalization policy combining ASEAN and other countries in East Asia and throws more light on the on going trade and environment debate. This book will be a good addition to the field of trade and the environment. The academic community, primarily researchers and policy makers and world bodies such as the WTO, ADB and the World Bank will benefit from the book.
