Towards a Maqāṣid al-Sharī'ah Index of Socio-Economic Development Salman Syed Ali, 2019-09-05 Islamic economics which is a discipline for studying economic behaviour from an Islamic perspective advocates comprehensive human development defined by advancement and progress in multiple dimensions beyond GDP income or standard of living Not only should socio economic progress be in all dimensions but it should also have a higher purpose A society is considered economically and socially developed if adequate protections are provided for faith life intellect progeny and wealth This concept of balanced progress itself is an important idea recognized by the sociologists However the same has so far not been measured or used in policy making by economists Similarly lack of adequate protections in a society along these dimensions indicates poverty which is another way of measuring slack in development The chapters in this edited volume deal with conceptualization of socio economic development on these lines and show how to measure socio economic development in a comprehensive way The book will be of interest to academics in the fields of economics economic development and Islamic economics It will also be of interest to policy makers engaged in economic development social progress and poverty alleviation
