The Economic Future of City and Suburb David L. Birch, Committee for Economic Development, 1970 *The Economic Future of City and Suburb* David L. Birch, Committee for Economic Development, 1970 **The economic Future of city and suburb** David L. Birch, 1972 *The Central City Problem and Urban Renewal Policy, a Study Prepared ... for the Subcommittee on Housing and Urban....* United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 1973 **The Dynamics of Neighborhood Change** James Mitchell, Real Estate Research Corporation. Public Affairs Counseling, 1975 This document has evolved over three years to meet the need for a more comprehensive understanding of how neighborhoods change The Office of Policy Development and Research at HUD formulated policy alternatives to stem the rising tide of abandoned residential buildings It showed abandonment as the last stage of a process not a random or isolated phenomenon The failure of programs to counteract and halt the decline of neighborhoods has stemmed mainly from an imperfect understanding of this process There have also been political problems with acting in neighborhoods before the symptoms were painfully evident and from the tendency of program developers to deal with the house rather than the people who own it rent it loan on it or insure it Few programs have recognized that those people were part of a total neighborhood rather than occupants of individual buildings The process of neighborhood change is triggered and fueled by individual collective and institutional decisions These are made by a myriad of people households bankers real estate brokers investors speculators public service providers police fire schools sanitation etc and others It is a reasonable conclusion that if a concentrated effort is made to affect these decisions then neighborhood decline can be slowed halted or in some circumstances reversed **Analysis of Neighborhood Decline in Urban Areas** George Sternlieb, James W. Committee on Banking, Housing, and Urban Affairs, 1973 City Life-Cycles and American Urban Policy R. D. Norton, 2013-10-22 City Life Cycles and American Urban Policy is an interdisciplinary study of differential urban development in the United States since 1945 that aims to place urban policy choices in historical perspective The book discusses the issues and establishes a framework within which relevant quantitative measurements can be interpreted The text also describes systematic empirical tests which typically take the form of regression equations and traces city population changes into two proximate causes annexation and urban growth The reasons for annexation contrasts among the nation's largest cities the second city growth determinant and the institutional explanation for fiscal differential among large cities are also considered The book further tackles the issue of federal fiscal assistance to declining cities Economists will find the book invaluable Planning Frontiers in Rural America

When America Became Suburban Robert A. Beauregard,2006-08-25 In the decades after World War II the United States became the most prosperous nation in the world and a superpower whose dominance was symbolized by the American suburbs Spurred by the decline of its industrial cities and by mass suburbanization people imagined a new national identity one that emphasized consumerism social mobility and a suburban lifestyle The urbanity of the city was lost In *When America Became Suburban* Robert A Beauregard examines this historic intersection of urban decline mass suburbanization domestic prosperity and U S global aspirations as it unfolded from 1945 to the mid 1970s Suburban expansion and the subsequent emergence of sprawling Sunbelt cities transformed every aspect of American society Assessing the global implications of America s suburban way of life as evidence of the superiority of capitalist democracy Beauregard traces how the suburban ideology enabled America to distinguish itself from both the Communist bloc and Western Europe thereby deepening its claim of exceptionalism on the world historical stage Placing the decline of America s industrial cities and the rise of vast suburban housing and retail spaces into a cultural political and global context Beauregard illuminates how these phenomena contributed to a changing notion of America s identity at home and abroad *When America Became Suburban* brings to light the profound implications of de urbanization from the siphoning of investments from the cities and the effect on the quality of life for those left behind to a profound shift in national identity Robert A Beauregard is a professor in the Graduate School of Architecture Planning and Preservation at Columbia University He is the author of *Voices of Decline The Postwar Fate of U S Cities* and editor of *Economic Restructuring and Political Response and Atop the Urban Hierarchy* **Remaking**

Post-Industrial Cities Donald K. Carter,2016-03-02 *Remaking Post Industrial Cities Lessons from North America and Europe* examines the transformation of post industrial cities after the precipitous collapse of big industry in the 1980s on both sides of the Atlantic presenting a holistic approach to restoring post industrial cities Developed from the influential 2013 *Remaking Cities* Congress conference chair Donald K Carter brings together ten in depth case studies of cities across North America and Europe documenting their recovery from 1985 to 2015 Each chapter discusses the history of the city its transformation and prospects for the future The cases cross cut these themes with issues crucial to the resilience of post industrial cities including sustainability doing more with less public engagement and equity social economic and environmental the most important issue cities face today and for the foreseeable future This book provides essential lessons learned from the mistakes and successes of these cities and is an invaluable resource for practitioners and students of planning urban design urban redevelopment economic development and public and social policy **City-building In America** Anthony M Orum,2018-10-08 Why do some cities grow and expand while others dwindle and decline Why is

Milwaukee a town of the past while Minneapolis St Paul seems reborn and infused with future dynamism And what do Milwaukee and the Twin Cities have to tell us about other cities prospects the trials and destinies of industrial Cleveland and post industrial Austin Anthony Orum s new book tells the story of these cities and at the same time of all cities Here the urban past present and future are woven into one compelling tale Orum traces the shift in the sources of urban growth from entrepreneurs to institutions and highlights the emergence of local government as a prominent force indeed as an institution in shaping the trajectory of the urban industrial heartland This complex trajectory includes all aspects of urban boom and bust population trends economic prosperity politics and culture as well as hard to pin down qualities like a city s collective hope and vision Interspersing social theory historical ethnography and comparative analysis to help explain the fates of different cities Orum lucidly portrays factory openings labor strikes elections evictions urban blight white flight recession and rejuvenation to show the core histories and future shape of cities beyond the particulars presented in these pages The reader will discover the key people and politics of cities along with the forces that direct them With a rich variety of sources including newspapers diaries census materials maps photo essays and perhaps most captivating original oral histories *City Building in America* is ideal for anyone interested in urban transformation and for courses in urban sociology urban politics industrial sociology social change and social mobility

Keeping the Faith Abel A. Bartley, 2000-04-30 An examination of the political and economic power of a large African American community in a segregated southern city this study attacks the myth that blacks were passive victims of the southern Jim Crow system and reveals instead that in Jacksonville Florida blacks used political and economic pressure to improve their situation and force politicians to make moderate adjustments in the Jim Crow system Bartley tells the compelling story of how African Americans first gained then lost then regained political representation in Jacksonville Between the end of the Civil War and the consolidation of city and county government in 1967 the political struggle was buffeted by the ongoing effort to build an economically viable African American economy in the virulently racist South It was the institutional complexity of the African American community that ultimately made the protest efforts viable Black leaders relied on the institutions created during Reconstruction to buttress their social agitation Black churches schools fraternal organizations and businesses underpinned the civil rights activities of community leaders by supplying the people and the evidence of abuse that inflamed the passions of ordinary people The sixty year struggle to break down the door blocking political power serves as an intriguing backdrop to community development efforts Jacksonville s African American community never accepted their second class status From the beginning of their subjugation they fought to remedy the situation by continuing to vote and run for offices while they developed their economic and social institutions
