Economic Thought James A. Gherity, 1964 **Economic Thought. A Historical Anthology Ed. by James A. Gherity,....** James A.. Gherity, 1965 **Economic Thought** James A. Gherity, 1969 **A History of Economic Thought** Lionel Robbins, 2000-10-16

Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts since World War II of the evolution of economic ideas. This volume represents the first time those lectures have been published. Lord Robbins 1898-1984 was a remarkably accomplished thinker, writer, and public figure. He made important contributions to economic theory, methodology, and policy analysis; directed the economic section of Winston Churchill's War Cabinet; and served as chairman of the Financial Times. As a historian of economic ideas, he ranks with Joseph Schumpeter and Jacob Viner as one of the foremost scholars of the century. These lectures, delivered at the London School of Economics between 1979 and 1981 and tape-recorded by Robbins's grandson, display his mastery of the intellectual history of economics, his infectious enthusiasm for the subject, and his eloquence and incisive wit. They cover a broad chronological range, beginning with Plato, Aristotle, and Aquinas, focusing extensively on Adam Smith, Thomas Malthus, and the classicals, and finishing with a discussion of moderns and marginalists from Marx to Alfred Marshall. Robbins takes a varied and inclusive approach to intellectual history. As he says in his first lecture, "I shall go my own sweet way, sometimes talk about doctrine, sometimes talk about persons, sometimes talk about periods." The lectures are united by Robbins's conviction that it is impossible to understand adequately contemporary institutions and social sciences without understanding the ideas behind their development. Authoritative yet accessible, combining the immediacy of the spoken word with Robbins's exceptional talent for clear, well-organized exposition, this volume will be welcomed by anyone interested in the intellectual origins of the modern world.

Medieval Islamic Economic Thought S.M. Ghazanfar, 2004-06-02. This book is a collection of papers on the origins of economic thought discovered in the writings of some prominent Islamic scholars during the five centuries prior to the Latin Scholastics, who include St. Thomas Aquinas. This period of time was labelled by Joseph Schumpeter as representing the great gap in economic history. Unfortunately, this gap is well embedded in most relevant literature. However, during this period, the Islamic civilization was one of the most fertile grounds for intellectual developments in various disciplines, including economics, and this book attempts to fill that blind spot in the history of economic thought.

Development of Economic Analysis 7th Edition, *The Growth of Economic Thought* Henry William Spiegel, 1991. In a new and updated edition of this classic textbook, Henry William Spiegel brings his discussion and analysis of economic thought into the 1990s. Maintaining the link between economics and the humanities, Spiegel's text will continue to introduce students to a wide range of topics in the history of economic thought. From reviews of previous editions: "The history of economic thought to end all histories of economic thought." Robert D. Patton, *Journal of*
