Economics David Mermelstein, 1976 **Economics** David Mermelstein, 1976 **Economics: mainstream readings and radical critiques, ed., with introductions by D. Mermelstein, special intro** David Mermelstein, Making Of Economics, The (4th Edition) - Vol Iii: The Radical Assault E Ray Canterbury, 2009-12-14 This book is the first in the field to cover exclusively the modern radical economists Science has always had its radicals economics is unexceptional in this regard The book begins with the persona of Karl Marx and his soulmate Friedrich Engels the most radical of all continuing with the central ideas of Marx including his theory of capitalism and an understanding of why in Marx's view capitalism is doomed Thereafter Thorstein Veblen fills the role as the USA radical who founded the only uniquely American school of economics the institutionalist school This is followed by Joseph Schumpeter and his theory of capitalist motion According to Schumpeter the demise of capitalism is self-inflicted through creative destruction The bestselling authors Robert Heilbroner and John Kenneth Galbraith straddle both the institutionalist and Post Keynesian schools The new left radicals emanated from Galbraith's Harvard University and are still around today The heyday of the new right came during the administration of Ronald Reagan and was led by the neo Austrians Finally the book concludes by analyzing the Post Keynesians claim to be the legitimate heirs to Keynesianism Thus far they fall into the radical camp This book is also available as a Karl Marx's Economics John Cunningham Wood, 1993 *The Political Economy of Development* Norman T. Uphoff, Warren F. Ilchman, 2023-11-15 Ilchman and Uphoff believe that political science has failed in the past to meet its own standards of rigor and cogency and does not meet standards of usefulness and relevance set by others The Political Economy of Change attempts to remedy these shortcomings by expanding the limits of social science analysis to deal with problems of allocation and productivity in all spheres of public choice not just the economic sphere Ilchman and Uphoff believe that political science has failed in the past to meet its own standards of rigor and cogency and does not meet standards of usefulness and relevance set by others The Political Economy of Change attempts to remedy these shortcomings The Death of Industrial Civilization Joel Jay Kassiola, 1990-01-01 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one **Capitalism in the UK** Mike Campbell, 2023-02-03 First published in 1981 Capitalism in the UK clearly states the Marxist position arguing that capitalism dominates the world economy and that the world's trade and multinational enterprises favour the capitalist system It shows how orthodox economics is not value free and how orthodox economics implicitly assumes that capitalism is the only possible form of economic organisation for society Designed for students on Political Economy and Marxists Economics courses this

comprehensive and concise volume provides an important counterweight to traditional first and second year introductory textbooks

The American as Anarchist David DeLeon, 2019-12-01 Originally published in 1978 When compared with socialist and communist systems in other nations the impact of radicalism on American society seems almost nonexistent David DeLeon challenges this position however by presenting a historical and theoretical perspective for understanding the scope and significance of dissent in America From Anne Hutchinson in colonial New England to the New Left of the 1960s DeLeon underscores a tradition of radical protest that has endured in American history a tradition of native anarchism that is fundamentally different from the radicalism of Europe the Soviet Union or nations of the Third World DeLeon shows that a profound resistance to authority lies at the very heart of the American value system The first part of the book examines how Protestant belief capitalism and even the American landscape itself contributed to the unique character of American dissent DeLeon then looks at the actions and ideologies of all major forms of American radicalism both individualists and communitarians from laissez faire liberals to anarcho capitalists from advocates of community control to syndicalists In the book's final part DeLeon argues against measuring the American experience by the standards of communism and other political systems Instead he contends that American culture is far more radical than that of any socialist state and the implications of American radicalism are far more revolutionary than forms of Marxism Leninism

Racial Inequality Michael Reich, 2017-03-14 In an investigation of the effects of racism on the American economy Michael Reich evaluates the leading economic theories of racial inequality and presents the new theory that discrimination against blacks increases inequality of income among whites Originally published in 1981 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Sociology of Health and Illness Peter Conrad, 2005 This collection of 49 readings offers an integrated analysis of the most important issues regarding health and health care from a critical and sociological perspective Substantive introductions provide context for the readings With ten new and two revised essays the Seventh Edition contains more coverage of key areas such as alternative medicine the pharmaceutical industry and the relationship between healthcare and politics

The Four Paradigms in Economics Kavous Ardalan, 2025-10-02 In The Four Paradigms in Economics Theories Concepts and Analytical Tools Kavous Ardalan demonstrates how these four paradigms explain any economics phenomenon differently and therefore together they provide a broader and deeper understanding of the economic phenomenon under consideration The main theme of The Four Paradigms of Economics is that social theory can usefully be conceived in terms of these four key paradigms functionalist interpretive radical humanist and radical structuralist The four paradigms are founded upon

different assumptions about the nature of social science and society and therefore provide different explanations of any phenomenon The book also looks at the major prevailing schools of thought in economics Neo Classical Economics New Institutional Economics Behavioral Economics Austrian Economics Post Keynesian Economics Institutional Economics Social Economics Radical Economics and Marxist Economics from the point of view of the four paradigms and locates them within the four paradigm framework *Community Organizing and Community Building for Health* Meredith Minkler,2005

The Weaponsmakers Jeffrey Schevitz,1979-01-01 This study lets weapons designers producers and testers speak for themselves They speak about their work during the Vietnam War and about those who criticized them for doing that work In doing so the book increases our understanding of professionals and professionalism by examining the social political and cultural factors that shape career choices and affect attitudes toward jobs and toward employing organizations It creates a typology of the high level engineers and scientists in the industry within an analysis of the overall structure of that industry Persons involved in or opposed to weapons production as well as involved in or opposed to other controversial work will value the difficult to find information presented in this book on the effects of the war on weapons industry personnel The practical conclusions drawn by the author are for government but also for universities research organizations corporations and for those opposed to the whole industry

Property and Prophets E. K. Hunt,2002-11-20 Property and Prophets is a concise history of the rise and subsequent triumph of capitalism Focused primarily on England until 1800 and the United States since 1800 the book s economic history is interspersed with the history of ideas that evolved along with the capitalist system The American Economic Review ,1977 Includes papers and proceedings of the annual meeting of the American Economic Association Covers all areas of economic research *The Fiscal Crisis of the State* James O'Connor,2017-07-12 Fiscal Crisis of the State refers to the tendency of government expenditures to outpace revenues in the U S in the late 1960s and early 1970s but its relevance to other countries of the period and also in today s global economy is evident When government expenditure constitutes a larger and larger share of total economy theorists who ignore the impact of the state budget do so at their own and capitalism s peril This volume examines how changes in tax rates and tax structure used to regulate private economic activity O Connor theorizes that particular expenditures and programs and the budget as a whole can be understood only in terms of power relationships within the private economy O Connor s analysis includes an anatomy of American state capitalism political power and budgetary control in the United States social capital expenditures social expenses of production financing the budget and the scope and limits of reform He shows that the simultaneous growth of monopoly power and the state itself generate an increasingly severe social crisis State monopolies indirectly determine the state budget by generating needs that the state must satisfy The state administration organizes production as a result of a series of political decisions Over time there is a tendency for what O Connor calls the social expenses of production to rise and the state is increasingly compelled to socialize these expenses The state has three ways to finance increased budgetary

outlays create state enterprises that produce social expenditures issue debt and borrowing against further tax revenues raise tax rates and introduce new taxes None of these mechanisms are satisfactory Neither the development of state enterprise nor the growth of state debt liberates the state from fiscal concerns Similarly tax finance is a form of economic exploitation and thus a problem for class analysis O Connor contends that the fiscal crisis of the capitalist state is the inevitable **Hearings, Reports and Prints of the Joint Economic Committee** United States. Congress. Joint Economic Committee,1972

Intellectual Property Rights K. R. G. Nair,Ashok Kumar,1994 Chiefly papers presented at the International Seminar on IPR organized by the Centre for Canadian Studies of the University of Delhi January 9 10 1993 **Catalog of Copyright Entries.
