Economics Of Seasonal Migration:

The Analytics of Seasonal Migration - - ECONOMICS LETTERS. , *International Handbook on the Economics of Migration* Amelie F. Constant,Klaus F. Zimmermann,2013-09-30 This is an extremely impressive volume which guides readers into thinking about migration in new ways In its various chapters international experts examine contemporary migration issues through a multitude of lenses ranging from child labor human t *International Handbook on Migration and Economic Development* Robert E.B. Lucas,2014-12-31 This Handbook summarizes the state of thinking and presents new evidence on various links between international migration and economic development with particular reference to lower income countries The connections between trade aid and migration ar **The Economics of Migration in the Volta Basin of Ghana** Daniel Tsegai,2005 **Economics of Seasonal Migration** D. V. Kasar,1992 **The Economics of Agricultural Development** George W. Norton,Jeffrey Alwang,William A. Masters,2014-06-03 Persistent problems with poverty rapid population growth and malnutrition in many developing countries are among the most serious issues facing the world today This book examines the causes severity and effects of these problems as well as potential solutions The authors consider the implications of globalization of goods services and capital for agriculture poverty and the environment and identify linkages in the world food system stressing how agricultural and economic situations in poor countries affect industrialized nations and vice versa Focusing on the role that agriculture can play in improving economic and nutritional wellbeing and how that role might be enhanced this book is essential reading **The Economics of Climate-Resilient Development** Sam Fankhauser,Thomas K.J. McDermott,2016-07-27 Some climate change is now inevitable and strategies to adapt to these changes are quickly developing The question is particularly paramount for low income countries which are likely to be most affected This timely and unique book takes an integrated look at the twin challenges of climate change and development The book treats adaptation to climate change as an issue of climate resilient development rather than as a bespoke set of activities flood defences drought plans and so on combining climate and development challenges into a single strategy It asks how the standard approaches to development need to change and what socio economic trends and urbanisation mean for the vulnerability of developing countries to climate risks Combining conceptual thinking with practical policy prescriptions and experience the contributors argue that to address these questions climate risk has to be embedded fully into wider development strategies Essays on the Economics of Migratory Fish Stocks Ragnar Arnason,Trond Bjørndal,2012-12-06 Following the publication of seminal papers by professors H S Gordon in 1954 and A D Scott in 1955 active research has led to rapid progress in our understanding of the economics of fisheries Fishing however is a complicated activity involving intricate interactions between man made fishing capital and naturally produced fish stocks in an inherently dynamic and stochastic setting Consequently in spite of significant advances important sections of fisheries economics remain largely unexplored One such area is the economics of migratory fish stocks In 1985 the editors of this volume

embarked on a research project concerned with the optimal utilization of common Nordic fish stocks A fundamental feature of some of the most important of these fish stocks such as the Atlanto Scandian herring and the Icelandic capelin is their migratory behaviour Not only do the migrations continuously alter the economic conditions for harvesting these species They also result in the periodical transfer of stock concentrations from one exclusive fisheries jurisdictions to another It was readily apparent that this behaviour constituted a crucial determinant of the appropriate harvesting pattern of these stocks More importantly however migrations are by no means a unique feature of Nordic fish stocks In fact it appears that migratory behaviour is exhibited albeit in varying degrees by all species of fish It therefore stands to reason that migrations constitute an important aspect of the economics of fisheries in general

Economics of Agricultural Development

George W. Norton, Jeffrey Alwang, William A. Masters, 2021-08-01 Economics of Agricultural Development examines the causes severity and effects of poverty population growth and malnutrition in developing countries It discusses potential solutions to these problems progress made in many countries in recent years and the implications of globalization for agriculture poverty and the environment Topics covered in the book include Means for utilizing agricultural surpluses to further overall economic development The sustainability of the natural resource environment Gender issues in relation to agriculture and resource use The contribution of improved technologies to agricultural development The importance of agricultural policies and institutions to development and trade Actions to encourage more rapid agricultural and economic development This new edition reflects the following developments Growth in environmental challenges due to climate change Continued progress in agricultural and economic development in many low income countries while other countries and regions are being left behind Continued growth in demand for higher valued farm products This book is essential reading for undergraduate students seeking to understand the economics of agricultural development and the world food system including environmental and human consequences international trade and capital flows It contains a wealth of real world case studies and is accompanied by a website

The Cultures of Economic Migration

Tope Omoniyi, 2016-03-16 This volume explores the processes of economic migration the social conditions that follow it and the discourses that underlie research into it Reflecting critically on economic migration and on the process of studying and creating knowledge about it the contributors address the question of whether recent enquiries into modernity bring a newer and better comprehension of the nature of dislocation and movement or whether these serve simply to replicate familiar modes of placing people and individuals The book is organized into perspectives in and on specific continents Europe Asia and Africa in order to explore notions regarding economic migration within and across regions as well as towards displacing the Eurocentrism of many studies of migration

Migration and the Economy Mathias Mgbeafulu, *The Economic Geography of Cross-Border Migration* Karima Kourtit, Bruce Newbold, Peter Nijkamp, Mark Partridge, 2020-12-07 This handbook presents a collection of high quality authoritative scientific contributions on cross border migration written by a carefully selected group of recognized migration experts from around the globe In recent years cross border migration has become an important and intriguing issue from both a scientific and policy perspective In the age of migration the volume of cross border movements of people continues to rise while the nature of migration flows in terms of the determinants length of stay effects on the sending and host countries and legal status of migrants is changing dramatically Based on a detailed economic geographical analysis this handbook studies the motives for cross border migration the socio economic implications for sending countries and regions the locational choice determinants for cross border migrants and the manifold economic geographic consequences for host countries and regions Given the complexity of migration decisions and their local or regional impacts a

systematic typology of migrants motives legal status level of education gender age singles or families etc is provided together with an assessment of push factors in the place of origin and pull factors at the destination On the basis of a solid analytical framework and reliable empirical evidence it examines the impacts of emigration for sending areas and of immigration for receiving areas and provides a comprehensive discussion of the policy dimensions of cross border migration Migration, Transfers and Economic Decision Making among Agricultural Households Calogero Carletto, Benjamin Davis, Paul Winters, 2020-08-19 The increasing volume of remittances and public transfers in rural areas of the developing world has raised hopes that these cash inflows may serve as an effective mechanism for reducing poverty in the long term by facilitating investments and raising productivity particularly in agriculture where market failures are most manifest This book systematically tests the empirical relationship between cash transfers and productive spending in agriculture amongst rural households in six different countries of the developing world Together the studies point to little impact of migration and public and private transfers on agricultural productivity instead facilitating a transition away from agriculture or to a less labour intensive type of agriculture From a policy perspective the studies raise the question of how to maintain rural economies as migration and social assistance are unlikely to provide a sustainable way to overcome rural poverty in the long run for those that remain in rural areas For the foreseeable future agriculture will play an important role in alleviating poverty and sustaining growth in rural areas Yet public and private transfers are not providing much of the impetus needed to raise the sector's productivity Whether the transfers are invested in agriculture will ultimately depend on the attractiveness of the sector which is largely determined by the policies of governments and donors This book was published as a special issue of the Journal of Development Studies **International Handbook of Development Economics** Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address The extensive bibliography at the end of each essay adds further value to this collection Ashwini Deshpande Economic and Political Weekly These new volumes impress along two dimensions First they highlight important connections between economic development and variables such as culture warfare and ethnicity which are sometimes ignored by mainstream economists Second they analyze the economic development experience of different regions such as Africa Latin America and East Asia a valuable reference for scholars and practitioners in the field Highly recommended H A Faruq Choice This two volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field Authors

are drawn from around the world and write on a wide range of topics After providing an introduction to the subject by examining issues like the meaning and measurement of development historical and interdisciplinary approaches empirical regularities and data problems the contributors provide a wealth of perspectives on and analyses of development economics They discuss alternative approaches to development the macroeconomics of growth factors and sources of economic development such as capital labor entrepreneurship resources and technology major sectors of concern such as agriculture industry services and the informal sector and international issues such as trade capital and labor flows and technology transfers Income distribution and poverty the state and other institutions and actual development experiences are explored The contributors provide analytical contributions as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives Scholars students policymakers and other development practitioners will all find this comprehensive reference invaluable

Economic Geographies Ray Hudson, 2005-01-11 The social and political power of the verity that there are no such things as economies only economic geographies demands an analysis of the complex flows and relations implied by it At last here is a book the book which addresses the questions central to the critical understanding of economies and their formative geographies This is a highly creative and transformative contribution Roger Lee Professor of Geography Queen Mary University of London How do we conceptualise the production and reproduction of social life What are the most appropriate ways to conceptualise capitalist economies and their geographies Economic Geographies integrates ideas of structure agency and practice to provide a detailed overview of recent key debates in economic geography from political economy and Marxism to post structuralism an explanation of the of relations between production retail and consumption governance and regulation a discussion of the economy in terms of circuits flows and spaces that systematically relates the material to the cultural Economic Geographies is a systematic audit of related developments in economic geography and the social sciences these include consumption economy and nature and culture The text will be required reading for upper level undergraduates on courses in economic geography

Migration, Gender and Home Economics in Rural North India Dinesh K. Nauriyal, Nalin Singh Negi, Rahul K. Gairola, 2019-10-21 This book critically examines the socio economic impacts of out migration on households and gender dynamics in rural northern India The first of its kind this study unearths through detailed regional and demographical research the ways in which economic and migratory trends of male family members in rural India in general and hilly regions of Garhwal in particular affect the wives children extended families and agricultural lands that they have left behind It offers vital research in how rural India's socio economic formations and topographic characteristics can today more effectively contribute to the national and global economy with respect to migratory trends gender dynamics and home life Furthermore it investigates the collapse of agricultural and many other traditional economic activities without a corresponding creation of fresh economic opportunities This book moreover elucidates how male out migration from rural to urban centres has greatly re shaped kinship and

economic structures at places of origin and has consequently had a serious impact on the socio psychological well being of family members This book will be of great value to scholars and researchers of development economics agricultural economics environment studies sociology social anthropology population studies gender and women s studies social psychology migration and diaspora studies South Asian studies and behavioral studies **South Asia Economic Focus** World Bank,2022-10-06 South Asia is facing renewed challenges The impact of the Russia Ukraine war on food and energy prices on domestic inflation is long lasting Externally countries current account balances deteriorate rapidly as imports rise on the back of economic recovery and rising inflation remittances decline and foreign capital flows out following monetary tightening in advanced economies An economic slowdown in advanced economies and trading partners can also be a drag to the exports sector and remittances inflows which many countries in the region depend on These immediate challenges can translate to persistent deterrent to long term growth and development Higher energy prices already are changing the attitude of many countries outside the region about green transition and carbon reduction The South Asia region is thus at a critical juncture The theme chapter provides a deep dive into COVID 19 and migration Migrant workers and remittances flows are important for South Asia as sources of income and means to smooth local income shocks for households and as an important source of foreign reserves for the country The pandemic changed the flows of migration as some migrants had to return home and some had to stay in foreign countries due to COVID related restrictions The chapter studies the long run trend of migration in the region how COVID 19 impacted migration and remittance inflows whether migration has or has not recovered and proposes policies to address underlying problems *Development Economics* Alain de Janvry,Elisabeth Sadoulet,2021-05-30 This second edition of *Development Economics Theory and Practice* continues to provide students and practitioners with the perspectives and tools they need to think analytically and critically about the current major economic development issues in the world Alain de Janvry and Elisabeth Sadoulet identify seven key dimensions of development growth poverty vulnerability inequality basic needs sustainability and quality of life and use them to structure the contents of the text The book gives a historical perspective on the evolution of thought in development It uses theory and empirical analysis to present readers with a full picture of how development works how its successes and failures can be assessed and how alternatives can be introduced The authors demonstrate how diagnostics design of programs and policies and impact evaluation can be used to seek new solutions to the suffering and violence caused by development failures In the second edition more attention has been given to ongoing developments such as pursuit of the Sustainable Development Goals continuously rising global and national inequality health as a domestic and international public good cash transfers for social protection carbon trading for sustainability This text is fully engaged with the most cutting edge research in the field and equips readers with analytical tools for impact evaluation of development programs and policies illustrated with numerous examples It is underpinned throughout by a wealth of student friendly features including case studies quantitative problem

sets end of chapter questions and extensive references The companion website contains Excel and Stata exercises for students alongside materials for instructors This unique text is ideal for those taking courses in development economics economic growth and development policy and will provide an excellent foundation for those wishing to pursue careers in development
