Putting Ideas to Work emphasizes its practical task Political ideas drawn from historical and analytical political philosophy are used to help rethink current public problems and imagine potential solutions to them Putting Ideas to Work is organized around five central tensions in political theory and practice individual and community freedom and equality justice and political order democracy and capitalism and power and citizenship Each section begins with a description and analysis of several contemporary public problems arising from these tensions Key political thinkers are then drawn upon to help understand the genesis of the public problems and to offer alternative ways of thinking about them The text is anchored throughout to an idea of strong democracy that functions as a standard against which theory and practice are measured

Human Nature in Modern Economics Anna Horodecka, 2022-06-15 *Human Nature in Modern Economics* offers a precise definition of the concept of human nature in economics, something that is so far lacking in the theoretical and methodological literature. This book develops tools for the analysis of human nature through the construction of the author's meta-model based on anthropological and psychological foundations, allowing for comparisons of anthropological assumptions made in economic theories. The model demonstrates that the normative functions of human nature may affect the economic reality. The chapters argue that the concept of human nature determines our thinking about the economy and economics, including fundamental methodologies, methods, and theories. Thus, the differences between various economic schools may result from the different assumptions of these schools about human nature. Those evolving views of human nature proceed to explain the development of both orthodox mainstream and heterodox economics. The book marks a significant addition to the literature on the history of economic thought, heterodox economics, economic theory, and economic methodology. For students, it is a supplement to standard textbooks as it explains the current state of economics, especially in its heterodox branches. It will allow scholars to discover the importance of what they assume about human nature and how it may influence their research process.
