**Part II. Seven Major Sources of Economic Progress**  
**Practice Test**  
**Multiple Choice Questions**

1. Why is private ownership an important source of economic prosperity?
- a. It eliminates the opportunity cost of using a resource.
  - b. It provides owners with a strong incentive to develop and use assets in ways that others value highly.
  - c. It allows owners to do anything they want with their property.
  - d. It makes it possible for owners to ignore the desires of others without having to bear the cost.

Answer: b

2. Under a system of private property, could a 60-year-old owner of a tree farm benefit by planting and caring for a crop of Douglas firs, most of which will not be ready to harvest for 50 years?
- a. No, the farmer will be dead before the crop will be ready for harvest.
  - b. Yes, the farmer will benefit from increased valuation of the land as the trees grow and the harvest moves closer.
  - c. No, the value of the land will decline since the farmer is taking it out of production for the next 50 years.
  - d. Yes, but only if the project is subsidized by the government or private conservation groups.

Answer: b

3. Which of the following is most important if a country is going to achieve and sustain rapid economic growth?
- a. High tariffs and imposition of other trade restrictions.

**Economics for the Common Good** Jean Tirole, 2019-05-14 When Jean Tirole won the 2014 Nobel Prize in Economics he  
suddenly found himself being stopped in the street by complete strangers and asked to comment on issues of the day no  
matter how distant from his own areas of research His transformation from academic economist to public intellectual  
prompted him to reflect further on the role economists and their discipline play in society The result is Economics for the  
Common Good a passionate manifesto for a world in which economics far from being a dismal science is a positive force for  
the common good Economists are rewarded for writing technical papers in scholarly journals not joining in public debates  
But Tirole says we urgently need economists to engage with the many challenges facing society helping to identify our key  
objectives and the tools needed to meet them To show how economics can help us realize the common good Tirole shares his  
insights on a broad array of questions affecting our everyday lives and the future of our society including global warming  
unemployment the post 2008 global financial order the euro crisis the digital revolution innovation and the proper balance  
between the free market and regulation Providing a rich account of how economics can benefit everyone Economics for the  
Common Good sets a new agenda for the role of economics in society Provided by publisher      *The Publishers Weekly* , 1889

Fully accessible to students and scholars alike this engaging book introduces the constructivist approach to understanding  
world affairs In a highly readable and witty way it shows how people and their social relations are the basis for everything  
around us International Relations included      *Modeling Spatial and Economic Impacts of Disasters* Yasuhide  
Okuyama, Stephanie E. Chang, 2013-06-29 This volume is dedicated to the memory of Barclay G Jones Professor of City and  
Regional Planning and Regional Science at Cornell University Over a decade ago Barclay took on a fledgling area of study  
economic modeling of disasters and nurtured its early development He served as the social science program director at the  
National Center for Earthquake Engineering Research NCEER a university consortium sponsored by the National Science

Foundation and the Federal Emergency Management Agency of the United States In this capacity Barclay shepherded and attracted a number of regional scientists to the study of disasters He organized a conference held in the ill fated World Trade Center in September 1995 on The Economic Consequences of Earthquakes Preparing for the Unexpected He persistently advocated the importance of social science research in an establishment dominated by less than sympathetic natural scientists and engineers In 1993 Barclay organized the first of a series of sessions on Measuring Regional Economic Effects of Unscheduled Events at the North American Meetings of the Regional Science Association International RSAI This unusual nomenclature brought attention to the challenge that disasters largely unanticipated often sudden and always disorderly pose to the regional science modeling tradition The sessions provided an annual forum for a growing coalition of researchers where previously the literature had been fragmentary scattered and episodic Since Barclay s unexpected passing in 1997 we have continued this effort in his tradition
