Ecologism Towards Ecological Citizenship Concepts In The Social Thoughts:

Ecologism Mark J. Smith, 1998 Ecological thinking has gained increasing prevalence in recent decades affecting political social and everyday life sparking great conflicts of interest in public policy areas In this accessible text Mark Smith considers these conflicts and proposes a new approach to environmental responsibility Ecologism addresses how we understand nature and the environment and applies this understanding to current sociological approaches Smith examines how the core questions raised by a green perspective transform the frame of reference for modern thinking He then outlines the distinctive features of ecological thought discussing two areas of contention the present generation's obligation to future generations and the relationship existing between humans and animals He then explores the difficulties in applying conventional ideas such as rights or justice to issues of the environment as well as the possibility that green thinking could lead to a new politics of obligation one grounded firmly in ecological citizenship Designed as an essential text for students of environmental studies politics and sociology this book is necessary reading for anyone with an interest in ecology and its social environment

International Environmental Law Gerry Nagtzaam, Evan van Hook, Douglas Guilfoyle, 2019-10-23 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law *Advances in Ecopolitics* Liam Leonard, 2008-01-01

Advances in Ecopolitics includes a range of publications which each discuss a significant element in the environmental theory which now represent an important aspect of sustainable living **Rethinking Australian Citizenship** Wayne Hudson, John Kane, 2000-06 The notion of citizenship is now being taken up internationally as a way to rethink questions of social cohesion and social justice In Europe the concept of national identity is under close scrutiny while the pressures of globalizing markets and the power of transnational corporations everywhere raise questions about the true place and meaning of citizenship in civil society In Australia a traditional view of citizens belonging to a single nation made up of one people with a special relationship to one land has been thrown open to challenge by a range of differing perspectives *Rethinking Australian Citizenship* considers the major debates Some chapters look at contemporary theoretical debates while others reinvent Australian citizenship from a particular perspective on civil life The result is a rich and coherent volume that shows the diverse ways in which Australian citizenship can be rethought **Thinking Through the Environment** Mark J.

Smith,2005-09-30 This broad ranging and thought provoking set of readings stresses the diversity of responses in the way the natural environment has been understood and questioned in the modern world [The Transition to Sustainable Living and Practice](#) Liam Leonard,John Barry,2009-12-21 Offers a series of insights into real alternatives to the economic malaise with an examination of key themes such as transition towns traditional villages new green financial concepts the sustainable utopia sustainability and activism ecofeminism green protectionism intentional communities and a green philosophy of money

The Making of International Environmental Treaties Gerry Nagtzaam,2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law

Handbook on International Political Economy Ralph Pettman,2012 International political economy IPE is a highly complex discipline drawing not only from the fields of politics and economics but also those as varied as philosophy history and anthropology Now widely accepted as a key dimension to contemporary world affairs it is no longer possible to talk about international relations without talking about production and distribution finance and investment as well as consumption and trade To ensure that our understanding of these topics is relevant to today s world there is a constant need to revisit and challenge what is known about these topics Besides being a comprehensive account of international political economy for academic study this extensive collection also highlights salient issues that scholars analysts and state leaders are most concerned with in today s world Amongst these are issues concerning the rise of China and India as new economic superpowers stability in the EU s political economy the viability of the existing multilateral system of global trade recent financial crises as well as the impact of globalisation and marketisation on the world s workers and our physical environment With contributions from prominent academics such as Susan K Sell George Washington University D C and Geoffrey Blainey Professor Emeritus University of Melbourne this volume makes for both a stimulating and thought provoking read

Governance for Sustainability Klaus Bosselmann,Ron Engel,Prue Taylor,2008 This report is currently available in an electronic format only To view the report and others published by the International Union for Conservation of

Nature IUCN please visit IUCN s website Governance for sustainability is defined as the set of written and unwritten rules that link ecological citizenship with institutions and norms of governance It is a complex topic because it addresses the three issues of globalization democracy and sustainability No form of governance can succeed if there is no common bond between those who govern and those who are being governed The real issue is whether the common good that is the sustainability of life can be pursued through democratic forms of governance This publication compiles information evaluations and case studies to enable the reader to explore and reflect upon governance for sustainability **Reassessing Political Ideologies**

Michael Freeden,2004-08-02 This book is a high level examination of each of the major ideologies that have shaped political thinking action and conflict Each chapter provides a critical overview of the current state of the major ideologies and a retrospective assessment of the strengths weaknesses developments and transformations of these ideologies over the past century The volume poses a strong challenge to those who have loudly proclaimed the end of ideology by demonstrating that it is impossible to understand current political developments without an appreciation of their ideological context It features internationally respected contributors who are authorities in their fields and will be an invaluable resource for both students and specialists in areas including Politics and International Relations Against Ecological Sovereignty Mick

Smith,2011-09-29 Links the political critique of sovereign power with ecological concerns **Rethinking State Theory**

Mark J Smith,Mark J. Smith,2013-10-11 In the last two decades objects of analysis such as the state have increasingly been seen as uncertain and contested theoretical concepts Mark J Smith presents a counter argument that highlights how existing theoretical approaches can provide useful tools for understanding contemporary political developments Feminist Political Ecology and the Economics of Care Christine Bauhardt,Wendy Harcourt,2018-12-07 This book envisages a different form of

our economies where care work and care full relationships are central to social and cultural life It sets out a feminist vision of a caring economy and asks what needs to change economically and ecologically in our conceptual approaches and our daily lives as we learn to care for each other and non human others Bringing together authors from 11 countries also representing institutions from 8 countries this edited collection sets out the challenges for gender aware economies based on an ethics of care for people and the environment in an original and engaging way The book aims to break down the assumed inseparability of economic growth and social prosperity and natural resource exploitation while not romanticising social material relations to nature The authors explore diverse understandings of care through a range of analytical approaches contexts and case studies and pays particular attention to the complicated nexus between re productivity nature womanhood and care It includes strong contributions on community economies everyday practices of care the politics of place and care of non human others as well as an engagement on concepts such as wealth sustainability food sovereignty body politics naturecultures and technoscience Feminist Political Ecology and the Economics of Care is aimed at all those interested in what feminist theory and practice brings to today s major political economic and environmental debates around sustainability

Conceptualizing Environmental Citizenship for 21st Century Education Andreas Ch. Hadjichambis, Pedro Reis, Demetra Paraskeva-Hadjichambi, Jan Činčera, Jelle Boeve-de Pauw, Niklas Gericke, Marie-Christine Knippels, 2020-02-26
This Open Access book is about the development of a common understanding of environmental citizenship. It conceptualizes and frames environmental citizenship taking an educational perspective. Organized in four complementary parts, the book first explains the political, economic and societal dimensions of the concept. Next, it examines environmental citizenship as a psychological concept with a specific focus on knowledge, values, beliefs and attitudes. It then explores environmental citizenship within the context of environmental education and education for sustainability. It elaborates responsible environmental behaviour, youth activism and education for sustainability through the lens of environmental citizenship. Finally, it discusses the concept within the context of different educational levels such as primary and secondary education in formal and non-formal settings. Environmental citizenship is a key factor in sustainability, green and circular economy and low carbon society and an important aspect in addressing global environmental problems. It has been an influential concept in many different arenas such as economy, policy, philosophy and organizational marketing. In the field of education, the concept could be better exploited and established. However, education and especially environmental discourses in science education have a great deal to contribute to the adoption and promotion of environmental citizenship.

The Politics of the Environment Neil Carter, 2007-04-19
The continuous rise in the profile of the environment in politics reflects growing concern that we may be facing a large scale ecological crisis. The new edition of this highly acclaimed textbook surveys the politics of the environment, providing a comprehensive and comparative introduction to its three components: ideas, activism and policy. Part I explores environmental philosophy and green political thought. Part II considers parties and environmental movements and Part III analyses policy making and environmental issues at international, national and local levels. This second edition has been thoroughly updated with new and revised discussions of many topics including the ecological state, ecological citizenship, ecological modernisation and the Greens in government and also includes an additional chapter on Globalisation, Trade and the Environment. As well as considering a wide variety of examples from around the world, this textbook features a glossary, guides to further study, chapter summaries and critical questions throughout.

Enlightenment and Ecology Tarinski Yavor Tarinski, 2021-02-20
Throughout his life, prophetic American philosopher Murray Bookchin created social ecology as a comprehensive social program for the challenges of our present era. Through tireless teaching, speaking, organizing and writing, Bookchin presented a humanist vision of ecology based on community, direct democracy and the better promises of the Enlightenment, showing how we could transform our society into one that is free and egalitarian. Enlightenment and Ecology is an international collection of commemorative essays by scholars and activists who have each incorporated the ideas of social ecology into their own work. This book also examines how the Kurdish freedom movement is using the

Bookchin's utopian ideas In a time of urgent need for radical change these essays provide both precious historical lessons and a transformative road map Science Knowledge and the Environment Michael Little, Liz Lakin, Keith Ross, 2013-12-19 First Published in 2000 The timing of this book is auspicious in that we can look backwards at the twentieth century as the period of maximum environmental impact by humans in their history while looking forward to a new era of potential improvement by drawing on and learning from this experience This book's purpose therefore is to consider how to address education for children to become informed and concerned adults who will be able to understand critically the implications of these choices and act wisely in the wider interests of society and the planet as a whole Research Handbook on Fundamental Concepts of Environmental Law Douglas Fisher, 2016-11-25 The quality and the strength of an environmental legal system is a reflection of the conceptual foundations upon which it is constructed The Research Handbook on Fundamental Concepts of Environmental Law illuminates key aspects of environmental governance through the lens of their underlying dimensions for example the form structure and language of international regional and national instruments the function of norms objectives and standards and the relevance of economic analysis and of integrated policy formulation **The Philosophical Roots of the Ecological Crisis** Joshtrom Isaac Kureethadam, 2018-06-11 The Philosophical Roots of the Ecological Crisis Descartes and the Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural world and the metaphysical dualism between humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences
