Economic Man:

The End of Economic Man George P. Brockway, 2001 The book that took the mystery out of economics and put free will back in

The End of Economic Man George P. Brockway, 1995 For those who wish to take the mystery out of money and interest rates they can do no better than read George P Brockway *The End of Economic Man* E Ray Canterbury *The Literate Economist*

Beyond Economic Man Marianne A. Ferber, Julie A. Nelson, 2009-04-01 This is the first book to examine the central tenets of economics from a feminist point of view In these original essays the authors suggest that the discipline of economics could be improved by freeing itself from masculine biases *Beyond Economic Man* raises questions about the discipline not because economics is too objective but because it is not objective enough The contributors nine economists a sociologist and a philosopher discuss the extent to which gender has influenced both the range of subjects economists have studied and the way in which scholars have conducted their studies They investigate for example how masculine concerns underlie economists concentration on market as opposed to household activities and their emphasis on individual choice to the exclusion of social constraints on choice This focus on masculine interests the contributors contend has biased the definition and boundaries of the discipline its central assumptions and its preferred rhetoric and methods However the aim of this book is not to reject current economic practices but to broaden them permitting a fuller understanding of economic phenomena These essays examine current economic practices in the light of a feminist understanding of gender differences as socially constructed rather than based on essential male and female characteristics The authors use this concept of gender along with feminist readings of rhetoric and the history of science as well as postmodernist theory and personal experience as economists to analyze the boundaries assumptions and methods of neoclassical socialist and institutionalist economics The contributors are Rebecca M Blank Paula England Marianne A Ferber Nancy Folbre Ann L Jennings Helen E Longino Donald N McCloskey Julie A Nelson Robert M Solow Diana Strassmann and Rhonda M Williams

Robinson Crusoe's Economic Man Ulla Grapard, Gillian Hewitson, 2012-04-27 In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719 The authors critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural specificity The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer producer trying to maximize his personal well being Using poststructuralist feminist postcolonial Marxist and literary criticism approaches the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature the political economy of colonization international trade and the pervasive gendered organization of social relations The

contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism. They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses. Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts.

From Economic Man to Economic System Harold Demsetz, 2011-08-29 A collection of essays discussing human behaviour and the institutions of capitalism. The essays are non technical and can be used by students of all disciplines interested in capitalism and in economic behaviour. They often present unconventional views of the topics they discuss. Those containing unconventional views discuss self interested behaviour, selfish gene theory, the meaning and social function of private ownership, the externality problem, the nature of the firm and the rise of capitalism. The essays offer a useful supplementary reading source for courses in business economics and law that deal with human behaviour in the marketplace and with capitalism, ownership, markets and firms.

Thoughtful Economic Man J. Gay Tulip Meeks, 1991-08-15 An authoritative examination of the implications of conventional conceptions of rational economic man for all economic study as well as the role of rationality and morals in economics.

NEW PARADIGM ECONOMICS TIANYU DAI, 2023-06-01 A new era calls for new economics. This book offers a new paradigm of economics with a new perspective and a new fundamental logic system in this new century. The new paradigm originates from a fundamental fact. The main behavioral subjects of socio economic activities are not individuals but social organizations composed of individuals such as families, enterprises, schools, research institutes, government branches, charity organizations and so on. So this book replaces the controversial assumption of economic man with the model of the minimum economic system abstracted from reality and establishes a new logic analysis framework of economic unit, the minimum economic system, economic flow, the input and output between economic units, economic field, the space time distribution of economic units and their movement which is totally different from all existing economics theories. As a result, this book reconstructs economics on a foundation of natural science and systems science and can explain the secret of China's rapid economic growth and other economic puzzles at the level of fundamental logic. This book replaces neoclassical and modern orthodox economics with a new economics meta theory, making it a fascinating read and providing a valuable reference for researchers, teachers and students majoring in economics.

Handbook of Contemporary Behavioral Economics Morris Altman, Offering the comprehensive articulation of behavioral economics theory, this book includes coverage of critical areas such as the Economic Agent, Context and Modeling, Decision Making, Experiments and Implications, Labor Issues, Household and Family Issues, Life and Death, Taxation, Ethical Investment and Tipping and more.

Schneider, 1974 *Markets* Patrik Aspers, 2011-03-07 Order by Standard, Fixed and Switch role Markets, Neoclassical Market Theories, The Stock Exchange, Markets in Markets, Differentiation and Fixed Roles, Monopolistic Competition, Out of the Market, Monopoly, Back into the Market, Summary.

Differentiation of Goods and Identities Economic Thinking Status Markets Summary The Study of Market Making Mutual Adjustment and Social Order Mutual Adjustment Leads to Markets Organized Market Making Performing Markets Making and Controlling Market Forms Change in Markets Summary Everyday Interaction and Markets What Do We Know How to Study Markets Ask Seven Questions What Remains To Be Done The Economic Person Peter L. Danner, 2002 This book emphasizes that analysis of broad economic changes treats people abstractly while a personalist view sees them as human agents who while needing and generating economic goods must still be responsive to others and be aware of values and goals beyond temporal well being Visit our website for sample chapters *The Dynamic Society* Graeme Snooks, 2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought provoking and controversial conclusions **Morals by Agreement** David Gauthier, 1987-05-21 In this book the author argues that moral principles are principles of rational choice According to the usual view of choice a rational person selects what is likely to give the greatest expectation of value or utility But in many situations if each person chooses in this way everyone will be worse off than need be Instead Professor Gauthier proposes a principle whereby choice is made on an agreed basis of co operation rather than according to what would give the individual the greatest expectation of value He shows that such a principle not only ensures mutual benefit and fairness thus satisfying the standards of morality but also that each person may actually expect greater utility by adhering to morality even though the choice did not have that end primarily in view In resolving what may appear to be a paradox the author establishes morals on the firm foundation of reason **The World in the Model** Mary S. Morgan, 2012-09-17 During the last two centuries the way economic science is done has changed radically it has become a social science based on mathematical models in place of words This book describes and analyses that change both historically and philosophically using a series of case studies to illuminate the nature and the implications of these changes It is not a technical book it is written for the intelligent person who wants to understand how economics works from the inside out This book will be of interest to economists and science studies scholars historians sociologists and philosophers of science But it also aims at a wider readership in the public intellectual sphere building on the current interest in all things economic and on the recent failure of the so called economic model which has shaped our beliefs and the world we live in **Mastering Public Administration** Jos C.
