Morgenstern, 2010-09-30 Over the past decades considerable debate has emerged surrounding the use of cost benefit analysis CBA to analyze and make recommendations for environmental and safety regulations Critics argue that CBA forces values on unquantifiable factors that it does not adequately measure benefits across generations and that it is not adaptable in situations of uncertainty Proponents on the other hand believe that a well done CBA provides useful albeit imperfect information to policymakers precisely because of the standard metrics that are applied across the analysis Largely absent from the debate have been practical questions about how the use of CBA could be improved Relying on the assumption that CBA will remain an important component in the regulatory process this new work from Resources for the Future brings together experts representing both sides of the debate to analyze the use of CBA in three key case studies the Clean Air Interstate Rule the Clean Air Mercury Rule and the Cooling Water Intake Structure Rule Phase II Each of the case studies is accompanied by critiques from both an opponent and a proponent of CBA and includes consideration of complementary analyses that could have been employed The work's editors two CBA supporters and one critic conclude the report by offering concrete recommendations for improving the use of CBA focusing on five areas technical quality of the analyses relevance to the agency decision making process transparency of the analyses treatment of new scientific findings and balance in both the analyses and associated processes including the treatment of distributional consequences

**Regulatory quality in Europe** Claudio Radaelli, Fabrizio De Francesco, 2013-07-19 The European Union and its member states are investing in ambitious programmes for better regulation and targets of regulatory quality This book available in paperback for the first time lifts the veil of excessively optimistic propositions covering the whole better regulation agenda It provides an innovative conceptual framework to handle the political complexity of regulatory governance It approaches better regulation as an emerging public policy with its own political context actors problems rules of interaction instruments activities and impacts Focusing on the key tools of impact assessment consultation simplification and access to legislation the authors provide fresh empirical evidence on the progress made in the member states and in Brussels drawing on an extensive research project and an original survey of directors of better regulation programmes in Europe Radaelli and De Francesco show how indicators define measure and appraise better regulation policy linking measures to policy processes in which the stakeholders learn by monitoring Although better regulation is a top priority for competitiveness in Europe and the legitimacy of EU policy the level of commitment and the development of tools vary considerably The major challenge for better regulation is institutionalisation this calls for clear choices in terms of what the EU wants from better regulation Essential reading for academics political scientists lawyers and public economists and policy makers in charge of regulatory
