**Joyce in the Belly of the Big Truck; Workbook** Joyce A. Cascio, 2005-05 *Economic Policy for the Environment and Natural Resources* Anastasios Xepapadeas, 1996 Economic Policy for the Environment and Natural Resources presents some of the most important recent work on the theory and application of environmental policy at both the national and international level. At the national level it focuses on instruments for pollution control. At the international level it discusses measures to promote international cooperation for the protection of the environment. This book covers a wide range of major issues including the legal aspects of environmental protection, environmental policy under oligopolistic conditions, voluntary agreements as a policy instrument, participation in international coalitions, and environmental policy in dynamic trade models. In discussing the applications of environmental policy it includes issues such as the profitability of emission saving techniques, water management, and acid rain models. This book will be essential reading for both policymakers and professional economists who are concerned with environmental policy.

Natural Resources and the Green Economy, 2012-09-28 Considering that natural resources or green capital are the drivers of globalisation, this book focuses on the link between investment, trade, and natural resource management in the context of the growing economic inequalities between states. It argues that there is a need to pay attention to the environmental and social conflicts arising out of economic globalisation and the response of regulatory and institutional mechanisms to the challenges of rapid resource depletion. This book will provide the readers a better understanding of the overlapping legal regimes, disagreement, and diversities of legal processes and the benefits and risks.
