Regional Development and Public Policy Challenges in India Rakhee Bhattacharya, 2015-07-09 This book emphasizes the need for experimenting with more deliberate and rigorous policy processes to attain balanced regional development which can promote both equity and efficiency in India s development discourse The institutional mechanisms for dealing with regional imbalance in India have not been very successful so far With rising discrepancies in development demand for autonomy continues along with a new dimension of regionalism arising from submerged identity along with political and economic aspirations which demanded new channels for solution So far attempts to create space for autonomy have possibly

not optimally accommodated the conceptual mechanisms like equity and democratic process. Thus democratizing policy process using six pillars of voice, knowledge, objective, fundamental values, implementation framework and public awareness can ensure a better policy outcome for dealing with the persistent challenges of regional disparity in India. This book further focuses on the need for democratizing the policy process for regional development through discussion and inclusion. Such a transition needs innovation in policy regime which can be attained through following six pillars: i) Democratic voice of stakeholders in policy development and implementation; ii) Clear policy objectives that advance the common good based on voice; iii) Unbiased sound and comprehensive knowledge and data bases; iv) Consistency with constitutional values; v) A sound implementation framework ensuring user friendliness, transparency and rationality of decision making processes; effective grievance redress, clear accountability and independent evaluation; vi) Public awareness and support of policies with relevant and public participation in implementation.

Public Opinion, Democracy, and Market Reform in Africa Michael Bratton, Robert Mattes, E. Gyimah-Boadi, 2005. This book is a groundbreaking exploration of public opinion in sub-Saharan Africa. Based on the Afrobarometer, a survey research project, it reveals what ordinary Africans think about democracy and market reforms, subjects on which almost nothing is otherwise known. The authors find that support for democracy in Africa is wide but shallow and that Africans feel trapped between state and market. While Africans are learning about reform on the basis of knowledge, reasoning and experience, few countries are likely to attain full fledged democracies and markets anytime soon.

Imagining India in Discourse Mohan Jyoti Dutta, 2017-01-02. The economic liberalization of India, changes in global structures and the rapid emergence of India on the global landscape have been accompanied by the dramatic rise in popular public and elite discourses that offer the promise to imagine India. Written mostly in the future tense, these discourses conceive of India through specific frames of global change and simultaneously offer prescriptive suggestions for the pathways to fulfilling the vision. Both as summary accounts of the shifts taking place in India and in the relationships of India with other global actors as well as roadmaps for the immediate and longer term directions for India, these discourses offer meaningful entry points into elite imaginations of India. Engaging these imaginations creates a framework for understanding the tropes that are mobilized in support of specific policy formulations in economic, political, cultural and social spheres. Connecting meanings within networks of power and structure help make sense of the symbolic articulations of India within material relationships.
