**The Political Economy Of European Monetary Unification** Barry Eichengreen, 2018-03-08

The first edition of this book was published in 1994 as the future of monetary unification in Europe was very much in doubt. With Economic and Monetary Union now in place it is appropriate to bring the scholarship on the topic up to date for the students of international political economics. To this effect, essayists Jeffrey Frieden, Geoffrey Garrett, Lisa L. Martin, Benjamin J. Cohen revised four of the original chapters to reflect new conditions. Editors Barry Eichengreen and Jeffrey Frieden completely rewrote the introductory essay. Three new chapters by Matthew Gabel, Charles Engel, and Paul De Grauwe et al. cover public support for EMU, local currency pricing, and whether Europe is now better off. The updated volume's purpose remains that of bringing the latest in scholarship in Economics and Political Science to bear on the European monetary integration.

**Who Elected the Bankers?** Louis W. Pauly, 2018-09-05 A former banker and staff member of the International Monetary Fund, Louis W. Pauly explains why people are deeply concerned about the emergence of a global economy and the increasingly integrated capital markets at its heart. In nations as diverse as France, Canada, Russia, and Mexico, the lives of citizens are disrupted when national policy falls out of line with the expectations of international financiers. Such dilemmas, ever more conspicuous around the world, arise from the disjuncture between a rapidly changing international economic system and a political order still constituted by sovereign states. The evolution of global capital markets inspires an understandable fear among people that the governing authorities, accountable to them, are losing the power to make substantive decisions affecting their own material prospects and those of their children. Pauly points out that today's capital markets resulted from decisions taken over many years by sovereign states and particularly by the leading industrial democracies, who simultaneously crafted the instrument of multilateral economic surveillance. The effort to build adequate political foundations for global capital markets spans the twentieth century and links the histories of such institutions as the League of Nations, the International Monetary Fund, the European Union, and the Group of Seven.

**Dangerous Commerce** Virginia Haufler, 2019-06-07 As businesses search increasingly for opportunities beyond their national borders, they face the risk that political change in other countries will jeopardize their efforts. Anything from minor shifts in regulations to sudden revolutions can threaten business investment, trade, and credit. Virginia Haufler shows that a crucial factor in the expansion of global markets has been the private sector's creation of a sophisticated insurance industry to redistribute the risks entailed in foreign commerce: a privately constructed safety net for international transactions. Haufler believes that the network of relationships and institutions established by the insurers constituted a privately led regime for the management of international risk. She analyzes political risks insurance during three periods of substantial uncertainty: the era from the turn of the century to the beginning of World War I, when British global power began to wane; the interwar years leading up to the collapse of world trade and a second world war; and the debt crisis decade of the 1980s. Public and private involvement in supplying insurance against international risks has

varied depending on demand the availability of resources and the norms of what can be insured As the scale and complexity of risks have expanded Haufler suggests responsibility has shifted from commercial insurers first to the state and now to multilateral institutions *Allies, Adversaries, and International Trade* Joanne Gowa, 2020-11-10 During the Cold War international trade closely paralleled the division of the world into two rival political military blocs NATO and GATT were two sides of one coin the Warsaw Treaty Organization and the Council for Mutual Economic Assistance were two sides of another In this book Joanne Gowa examines the logic behind this linkage between alliances and trade and asks whether it applies not only after but also before World War II **Global Trade** John J. Kirton, 2017-05-15 Trade has long been a core part of international relations Bilateral plurilateral and multilateral trade flows and agreements have arisen in many ways and in many areas over the centuries From regional arrangements such as the North American Free Trade Agreement to the all encompassing General Agreement on Tariffs and Trades and now the World Trade Organization the system of global trade has seen struggles and successes alike The traditional debate over liberalization and protectionism remains central today and with ever expanding globalization facing all states the future of global trade seems to be no less controversial than it was centuries ago By assembling the key scholarly works that have defined the field of global trade this work addresses these debates and examines the past to see what the future of global trade might look like Developing Nations and the Politics of Global Integration Stephan Haggard, 1995-04-01 Developing countries are becoming important players in the world economy Although they were slow to liberalize trade they are now joining the more economically advanced nations in implementing trade reforms and in taking steps to deepen global integration The lowering of trade barriers and the growth of foreign investment have benefited the developing countries but have also created vulnerabilities including risks of dependence and political interference Is deeper integration in the best interest of developing countries In this book part of the Integrating National Economies series Stephen Haggard examines the position of the developing countries in the international trade regime Focusing on the nations of East and Southeast Asia and Latin American Haggard explores the cause of economic liberalization policies in the developing nations He argues that various international constraints such as economic shocks and political pressures from the economically advanced nations pushed developing countries to open up to international competition and to pursue economic relations with advanced industrial states Haggard addresses such central questions as Will developing countries benefit from the deep integration agenda Will they instead join closed regional blocs that fragment the international economy Will the developing nations orient themselves toward the multilateral institutions particularly the World Trade Organization or will they gravitate toward regional arrangements Haggard argues that the advanced developing countries have become strong supporters of the multilateral system and that the extent of regionalism has been over stated He contends that a more serious threat is the lure of bilateralism and the effort of the advanced industrial states to impose standards on developing countries that are inappropriate or politically counterproductive A

Schirm, 2007 Globalization systematically encompasses the debates and the results of research of political scientists on various core aspects of the interrelation between politics and economics in the process of globalisation      **Comparative Regionalism** Etel Solingen, 2014-07-11 This book comprises key essays on comparative regionalism and more broadly on regional conflict and cooperation by Professor Etel Solingen The study of regionalism a subject pioneered by Solingen in the 1990s is now an established field of inquiry with a large community of scholars and practitioners around the world This book provides a window into an evolving conceptual framework for comparing regional arrangements with a special emphasis on non European regions Framed by a comprehensive previously unpublished introduction the chapters provide a broad spectrum of analysis on domestic political economy democracy regional institutions and global forces as they shape different regional outcomes and trajectories in economics and security Themes as different as the regional effects of democratization in the Middle East and East Asia the rise of China Euro Mediterranean relations and regional nuclear trajectories are traced back to a common analytical core The nature of domestic ruling coalitions serves as the pivotal analytical anchor explaining the effects of globalization and economic reform on different regional arrangements This collection provides a focal point that brings this work together in a new light and will be of much interest to students of regionalism international relations theory international and comparative political economy international history and grand strategy
