Economic Policy No 25 A European Forum

Jon Carleton Messenger, Naj Ghosheh

Economic Policy No 25 A European Forum:

Between Bonn and Berlin Mary N. Hampton, Christian S  , 1999 Examining Germany's image of political drift the authors focus on current debates regarding the country's welfare state European monetary policy security policy warnings about a supposed German hegemony symbolic or geopolitical implications of the return to Berlin and new complexities in party politics and public opinion While there is far more similarity between the Berlin Republic and its West German predecessor than there ever could have been between DWeimarD and D Bonn D the authors also show that united Germany is in many ways more than an enlarged version of its successful forerunner *European Trade Policies and Developing Countries* L. B. M. Mennes, J. Kol, 1998 This book looks at how patterns of world trade are changing how EEC protectionism affects developing countries how special deals and exceptions are bought in some cases and looks to the future to see how the situation may develop Work Sharing during the Great Recession Jon Carleton Messenger, Naj Ghosheh, 2013-01-01 Work sharing is a labour market instrument devised to distribute a reduced volume of work to the same or similar number of workers over a diminished period of working time in order to avoid redundancies This fascinating and timely study presents the concept and history of work sharing and explores the complexities and trade offs involved in its use as both a strategy for preserving jobs and a policy for increasing employment The expert contributors examine the resurgence in the use of work sharing as a job preservation strategy via country case studies of work sharing programmes implemented across the globe during the Great Recession of 2008-2009 These studies clearly illustrate that work sharing has been successful as a crisis response measure in a number of countries Lessons learned and their implications are presented alongside prescriptions on how to design permanent work sharing policies that would provide appropriate incentives to generate positive effects for employment and promote a sustainable and job rich economic recovery This enlightening book will prove invaluable to academics researchers students and policymakers in the fields of labour economics public sector economics and social policy

The Limits of Stabilization William Easterly, Luis Serv  n, 2003-10-01 Over the 1980s and 1990s most Latin American countries witnessed a retrenchment of the public sector away from infrastructure provision and an opening up of infrastructure activities to the private sector This book analyzes the consequences of these policy changes from two perspectives First it reviews in a comparative framework the major trends in infrastructure provision in Latin America over the last two decades Second it evaluates the implication of these trends for economic growth and public deficits in the region The book shows that in most countries private participation did not fully offset the public sector retreat The result was a slowdown in infrastructure accumulation which entailed a significant growth cost and weakened the intended impact of the infrastructure spending cuts on public sector insolvency Economic Developments In India : Monthly Update, Volume -35 Analysis, Reports, Policy Documents WITH CD-ROM Editors : Raj Kapila & Uma Kapila, 2000 **The Gold Standard at the Turn of the Twentieth Century** Steven Bryan, 2010 By the end of the nineteenth century the world was ready to adopt the

gold standard out of concerns of national power prestige and anti English competition Yet although the gold standard allowed countries to enact a virtual single world currency the years before World War I were not a time of unfettered liberal economics and one world one market harmony Outside of Europe the gold standard became a tool for nationalists and protectionists primarily interested in growing domestic industry and imperial expansion This overlooked trend provocatively reassessed in Steven Bryan s well documented history contradicts our conception of the gold standard as a British based system infused with English ideas interests and institutions In countries like Japan and Argentina where nationalist concerns focused on infant industry protection and the growth of military power the gold standard enabled the expansion of trade and the goals of the age industry and empire Bryan argues that these countries looked less to Britain and more to North America and the rest of Europe for ideological models Not only does this history challenge our idealistic notions of the prewar period but it also reorients our understanding of the history that followed Policymakers of the 1920s latched onto the idea that global prosperity before World War I was the result of a system dominated by English liberalism Their attempt to reproduce this triumph helped bring about the global downturn the Great Depression and the collapse of the interwar world

Of Openness and Distance Ms.Katrin Elborgh-Woytek,2003-10-01 This paper analyzes developments in the structure of trade in the Commonwealth of Independent States CIS during the transition decade and finds that it changed less than in other transition economies Trade openness of the CIS increased between 1993 and 1997 but has fallen to a lower level plateau since then owing to regional and country specific factors These include slower progress in transition geographic aspects restrictions on trade governance and corruption problems weak infrastructure lack of regional cooperation and political conflicts Regression results show that trade openness of the CIS countries would likely increase substantially if market oriented reforms were pursued more vigorously

Managing the Regulatory Process J. Luis Guasch,Pablo Tomas

Spiller,1999-01-01 developing countries complementing their far reaching privatization programs are engaged in deregulating various sectors of their economies and devising new regulatory frameworks for others particularly the utilities sectors As economies become more open pressures on countries to become more competitive drive the call for regulatory reform to reduce costs and foster increased productivity competitiveness and growth This report provides an overview of the costs and benefits of regulation throughout the world It provides case histories of regulation in different countries developed and developing and in various sectors such as transportation utilities and power It presents different strategies that were employed Furthermore it identifies lessons learned and lays the foundations for a best practice scenario for other countries to adopt While the challenges to regulatory reform are considerable so are the efforts that developing countries are making to face them These lessons when properly adapted to each country s own environment can significantly increase the likelihood of effective regulation

The Glitter of Gold Marc Flandreau,2004-03-04 This book studies the so far unexplored operation of the international monetary system that prevailed before the emergence of the international gold standard in 1873 Conventional wisdom has it that the emergence of gold as a global anchor was both an inescapable and desirable evolution given the exchange rate stability it provided and Britain s economic predominance This study draws on a wealth of archival sources and abundant new statistical evidence fully detailed in the appendix to demonstrate that global exchange rate stability always prevailed before the making of the gold standard This was despite the heterogeneity among national monetary regimes based on gold silver or both The reason for the stability before the establishment of the gold standard is France s bimetallic system France by being in a position to trade gold for silver and vice versa effectively pegged the exchange rate between gold and silver at its legal ratio of 15 5 Part I of the book studies exactly how this mechanism worked Part II focuses on the respective behaviour of private concerns and arbitrageurs on the one hand and authorities such as the Bank of France on the other hand in order to underline the constraints and opportunities that were associated with bimetallism as an international regime Finally Part III provides a new view on the collapse of bimetallism and its replacement by a gold standard It is argued that bimetallism might well have survived and that the emergence of the gold standard was by no means inescapable Rather it resulted from a massive coordination failure at both national and international levels a failure that was a preview of the interwar collapse of the gold standard

The International Politics of Eurasia: v. 10: The International Dimension of Post-communist Transitions in Russia and the New States of Eurasia S. Frederick Starr,Karen Dawisha,2024-11-01 This ambitious ten volume series develops a comprehensive analysis of the evolving world role of the post Soviet successor states Each volume considers a different factor influencing the relationship between internal politics and international relations in Russia and in the western and southern tiers of newly independent states The collapse of the Soviet Union and the discrediting of Marxism Leninism as a source of political legitimacy have prompted a search for fresh principles of political organization that will shape the nature of political culture in all the post Soviet countries This volume

focuses on the International dimension of Post communist transitions **Working Paper Series** ,2001 OECD Economic Surveys: Norway 2019 OECD,2019-12-09 Wellbeing in Norway is high GDP per capita is among the top ranking countries and the country scores well in measures of inclusiveness Several challenges must be addressed however if this good standing is to be sustained The economy is vulnerable to trade risks Also though property markets and related credit appear to be heading for a soft landing risks remain Norway has substantial opportunities for more effective public spending remain and exploiting these will become more important as fiscal space narrows Productivity growth remains low requiring attention to business policy *Contemporary Topics in Finance* Iris Claus,Leo Krippner,2019-04-29 The literature surveys presented in this edited volume provide readers with up to date reviews on eleven contemporary topics in finance Topics include unconventional monetary policy implicit bank guarantees and financial fraud all linked to the exceptional event of the Global Financial Crisis Explores how recent studies on inflation risk premia and finance and productivity have benefitted from new empirical methods and the availability of relevant data Demonstrates how angel investing venture capital relationship lending and microfinance have benefitted from increased research as they have become more seasoned Investigates crowdfunding and crypto currencies which have both arisen from recent technological developments *Economic Policy in a Highly Dollarized Economy* International Monetary Fund,2003-09-30 This study examines the challenges and issues facing policymakers in highly dollarized economies Focusing on Cambodia which achieved almost complete dollarization during 1991 95 the authors review recent developments in the literature on dollarization and examine the costs and benefits of dollarization in Cambodia including the ensuing macroeconomic policy implications They carry out an econometric estimation of cash foreign currency circulation in Cambodia in order to gauge the degree of dollarization In addition to this analysis the authors present a short description of Cambodia s economic financial and structural background **Governance and Economic Development** Joachim Ahrens,2002-01-01 this volume is an excellent resource for those interested in the analysis of institutions design and economic development Oscar Alfranca Progress in Development Studies The main theme of this study is the political economy of policy reform in less developed countries and post socialist countries Given the complexity of economic development and transition Joachim Ahrens views failures in policy reform poor public sector management rent seeking corruption and over centralization as systematic though not exclusive instances of institutional failure *Governing the World Economy* Willem Molle,2013-09-05 The major problems the world faces have increased since the turn of the millennium Recurrent storms on the financial markets have ravaged many countries poverty is still widespread notwithstanding decades of massive development aid the environment remains in acute jeopardy and the major world institutions have often reached an impasse in attempting to combat these difficulties The issues ask for rapid and consistent action by policy makers but the interests of international organizations such as the WTO World Bank and Kyoto protocol have become too diversified to come to multilateral agreements setting uniform rules and asking for strict compliance with these

rules Alternative solutions are sought and development in the future is likely to be characterized by fuzzy and complex interactions between flexible groups of actors seeking agreements on the solutions for the most pressing new problems Progress will become rather unpredictable and will depend on time place and subject specific cases as well as convergence of interests This need not be only negative Flexible solutions have the advantage that they can be easily adapted in case the conditions change In this new book the follow up to his Global Economic Institutions Willem Molle maps out the unfolding of this process International Trade, Competitive Advantage and Developing Economies Caf Dowlah,2015-07-30 Available research suggests that less developed countries have significant competitive advantage over developed countries in three major areas of international trade agriculture textiles and clothing T C and cross border labor mobility Incidentally these are also the trade sectors which experienced widespread protectionist measures especially in developed world for decade after decade Under the World Trade Organization WTO which replaced the General Agreement on Tariff and Trade GATT in 1995 much of the restrictions in T C trade has been phased out but still this sector faces much higher tariff and non tariff barriers than any other manufacturing sector in world economy The agricultural sector also experienced significant dismantling of deeply entrenched trade barriers under the WTO over the course of last two decades but the sector still remains plagued with quite extensive domestic supports export subsidies and tariff barriers At the same time despite both theoretical expositions and empirical trends point to significant potential gains from cross border labor mobility the sector remains mired in a complex quagmire of economic and political restrictions around the world Thus all three sectors in which less developed countries have exports interests still remain less liberalized than the sectors in which developed countries have exports interests This book provides an in depth and up to date scholarly analysis of all three trade sectors agriculture T C and cross border labor mobility with a penetrating scrutiny of historical backgrounds and developments crosscurrents of interests and perspectives of both developed and developing countries and evolving trade patterns and potentials in a more liberalized and globalized world economy The book also identifies critical economic issues and options for less developed countries in the WTO negotiations for further liberalization of agriculture T C and cross border labor mobility This volume will be an important point of reference for students scholars and practitioners of international trade economic development development economics and WTO related issues Manpower Planning & Economic Development K P Yadav,2006 On the life and works of Ruskin Bond b 1934 Indo English litterateur
