Samuels, 2013-04-17 1 Warren J Samuels

The study of economics as discourse requires a perspective that focuses on the relationships among knowledge or truth discourse or language and meaning Central to this task is the recognition that the conduct of economic analysis uses words and that words embody meanings that are applied to the object of study but do not necessarily derive from that object although they define that object for us Knowledge Economists are engaged in efforts to understand and explain the economy In the pursuit of this knowledge they have attempted to make coherent the respects in which belief is to be accepted as knowledge or the senses in which this knowledge has the quality of truth The field of methodology in economics parallels the fields of epistemology and philosophy of science in the attempt to make sense of and to prescribe the terms on which efforts at knowledge may be accepted as true or the terms on which statements can be accepted as knowledge The conduct of such methodological inquiry typically treats economics as a science 1 2 ECONOMICS AS DISCOURSE engaged in the pursuit of truth as an epistemological category though there have almost always been economists who were skeptical of the status of economics as a science and the pursuit of knowledge is only one of three putative functions of economics the other two being psychic balm and social control
