Nios Summary Deepak Meena, *Healthcare Funding and Christian Ethics* Stephen Duckett, 2023-01-26

Healthcare has an impact on everyone and healthcare funding decisions shape how and what healthcare is provided. In this book, Stephen Duckett outlines a Christian biblically grounded ethical basis for how decisions about healthcare funding and priority setting ought to be made. Taking a cue from the parable of the Good Samaritan (Luke 10:25-37), Duckett articulates three ethical principles drawn from the story: compassion as a motivator, inclusivity or social justice as to benefits, and responsible stewardship of the resources required to achieve the goals of treatment and prevention. These are principles he argues that should underpin a Christian ethic of healthcare funding. Duckett's book is a must for healthcare professionals and theologians struggling with moral questions about rationing in healthcare. It is also relevant to economists interested in the strengths and weaknesses of the application of their discipline to health policy.

Modern Microeconomics: Theory and Applications, 19th Edition Ahuja H.L., 2022-01-03

Microeconomics Roger A. Arnold, 2005

Offering a unique blend of solid theoretical content and student accessibility, this text: 1. covers all the basics of microeconomics; 2. gives students a clear idea of how economists think about the world; 3. stresses the key concepts in economics; and 4. is extremely rich in intriguing applications that convey the prevalence of economics in everyday life. Many principles instructors are constantly challenged with the goal of getting students excited about realization that economics is everywhere. Arnold has taken this to another level. He is so passionate about touching his students that he felt the need to write a *Microeconomics* text that is dedicated to opening the science of economics through the pictures and applications of our lives. Arnold is considered the most innovative author in this market to meet the fast pace interests of both instructors and students. His five themes of Theory and Model building, Key Concepts, Primary and Secondary Consequences, Real World Applications, and the idea that Economics is about gifts, exchanges, and transfers set the tone for a teaching text that is extremely approachable by instructors and students.
